Make Time Jake Knapp, John Zeratsky, 2018-09-25 From the New York Times bestselling authors of Sprint comes “a unique and engaging read about a proven habit framework [that] readers can apply to each day” (Insider, Best Books to Form New Habits). “If you want to achieve more (without going nuts), read this book.”—Charles Duhigg, author of The Power of Habit Nobody ever looked at an empty calendar and said, The best way to spend this time is by cramming it full of meetings! or got to work in the morning and thought, Today I'll spend hours on Facebook! Yet that's exactly what we do. Why? In a world where information refreshes endlessly and the workday feels like a race to react to other people's priorities faster, frazzled and distracted has become our default position. But what if the exhaustion of constant busyness wasn't mandatory? What if you could step off the hamster wheel and start

taking control of your time and attention? That's what this book is about. As creators of Google Ventures' renowned design sprint, Jake and John have helped hundreds of teams solve important problems by changing how they work. Building on the success of these sprints and their experience designing ubiquitous tech products from Gmail to YouTube, they spent years experimenting with their own habits and routines, looking for ways to help people optimize their energy, focus, and time. Now they've packaged the most effective tactics into a four-step daily framework that anyone can use to systematically design their days. Make Time is not a one-size-fits-all formula. Instead, it offers a customizable menu of bite-size tips and strategies that can be tailored to individual habits and lifestyles. Make Time isn't about productivity, or checking off more to-dos. Nor does it propose unrealistic solutions like throwing out your smartphone or swearing off social media. Making time isn't about radically overhauling your lifestyle; it's about making small shifts in your environment to liberate yourself from constant busyness and distraction. A must-read for anyone who has ever thought, If only there were more hours in the day..., Make Time will help you stop passively reacting to the demands of the modern world and start intentionally making time for the things that matter.

The Bottom of the Pool Andy Andrews, 2019-06-18 This is how it's done. This is why it's done this way. This is the result you can expect if you do it. These three pieces of information inform a conclusion about every part of each of our lives. Yet it is these three pieces of information that most often set an insidious trap—a trap that has held the imaginations of generations captive to the belief that because they are doing the best they can do, they are accomplishing the best that can be done. And while each of these three statements are true, not one of them is the truth. Dive deeper with bestselling author Andy Andrews as he shares his unique philosophy

regarding foundational thinking. Through his unique and captivating storytelling, Andy helps you search for the reality that lies beyond the boundaries established in the name of “best practices,” “industry standards,” or “the way things are done.” For it’s at the bottom of the pool that you discover a pathway to extraordinary results that most people in your position do not even know are possible.

The Science of Pocket Billiards Jack H. Koehler,1995 THE SCIENCE OF POCKET BILLIARDS covers the complete spectrum from the basic fundamentals to the most complex concepts in pocket billiards. There are no opinions, no fairy tales from dead pool players, and no Voodoo explanations that violate the laws of physics in this book. Every concept from stance and stroke to cue-stick induced deflection is examined from a technical point of view. Take english as an example concept. English is examined and analyzed in minute detail. There is inside english, outside english, draw english, follow

english, running english, and reverse english. Then add to that collision-induced english, transferred english, and cushion-induced english. It may sound like the concept of english is a chaotic mess but it all comes together like pieces of a jigsaw puzzle. Bank shots are a problem for everyone and especially so for the casual pool player. The brain of each individual is wired a little differently. A banking system that works best for one person may not work for another individual. This book presents eight different banking systems; try them all to determine which system works best for you. POOL & BILLIARD MAGAZINE has the largest circulation of any monthly pool magazine in the world. In their August 1994 issue they did an evaluation of all the available instructional books and video tapes. They concluded, Subjectively and, I hope, objectively, I think THE SCIENCE OF POCKET BILLIARDS by Jack H. Koehler is the best. THE SCIENCE OF POCKET BILLIARDS covers the entire spectrum from the basics to the most advanced concepts in pool. The occasional player can skim through the book and learn enough for a lifetime of casual play while an avid pool enthusiast can study this book for months, or even years, and continue to gain knowledge. 8 1/2 X 11, 253 pages (Paperback only)
