Port Cities and Intruders Michael N. Pearson,1998-02-26 Over many centuries, the Swahili coast of East Africa had intricate connections with India, with the Islamic world and with the peoples of the the interior. There was major economic, social and religious interchange. The intrusion of the Portuguese in the 16th century was merely the latest of many foreign influences. This study in world history examines a particular time and place to show the diversity and complexity of cultural and economic contacts.

Port Cities of Atlantic Iberia, c. 1500–1900 Professor Patrick O'Flanagan,2013-06-28 Charting the evolution of the port cities of Atlantic Spain and Portugal over four centuries, this book examines the often dynamic interaction between the large privileged ports of Lisbon, Seville and Cadiz (the Metropoles) and the smaller ports of, among others, Oporto, Corunna and Santander (the Second Tier). The book particularly focuses on the implications of state-sponsored commercial policies for the main ports of Atlantic Iberia during the monopoly period extending from 1503 to c.1778, and briefly considers the implications of the suppression of monopoly for these centres over the remainder of the nineteenth century. Patrick O'Flanagan employs a wealth of source material to provide a multi-faceted survey of the growth of these port cities, moving deftly from local concerns to regional developments and global relationships. Beyond Spain and Portugal, the book also considers the important role played by the Atlantic archipelagoes of the Canaries, the Azores and Madeira. This formidable study is an essential addition to the library of those studying Atlantic Iberia, historical geography, and transatlantic economic relationships of this period.

Michigan Gold Daniel Fountain,1992 The glitter of gold created an era when a few determined prospectors searched the rugged hills and forests of Michigan's Upper Peninsula for the valuable mineral. Their stories range from the discovery of Lake Superior's mineral wealth in the 1840's to the modern mining and prospecting practices today.

The Environment in World History Stephen Mosley,2023-11-03 Now in its second edition and refreshed by a decade of new research, The Environment in World History uncovers the deep-rooted causes of interconnected climate, biodiversity, and ecological crises that have brought the environment to the top of the global political agenda in the twenty-first century. Its expanded chapters and case studies explore a wide range of issues including the following: the hunting of wildlife and the loss of biodiversity across the globe; deforestation and the development of strategies to protect the world's forests; soil degradation caused by worldwide agricultural expansion, one of the most profound ways that humans have altered the planet; the widening impact of urban-industrial growth and the deepening ecological footprints of the world's cities; and the rising levels of air, land and water pollution as the trade-off for continued economic growth worldwide. Covering the last five hundred years, it offers an essential environmental perspective on well-known world history narratives of imperialism and colonialism, trade and commerce, technological progress and the advance of civilisation. Clearly written and fully up-to-date, it is an invaluable resource for all students of world history and environmental studies.

South Asia in World History Marc Jason Gilbert,2017 This book explores how world historical processes, from changes in environment to the movement of peoples and ideas, have shaped and continue to shape the history of South Asia and its place in the wider world.

Coins and Currency Mary Ellen Snodgrass,2019-07-29 During ancient times currency took varied forms, including beaver skins, bales of tobacco, and sea salt blocks. As art and technology advanced, monetary systems and currencies altered. Today, coins and currency provide an historical and archeological record of culture, religion, politics, and world leaders. This updated second edition offers numerous entries of historical commentary on the role of coins and currency in human events, politics, and the arts. It begins with the origin of coins in ancient Sumer, and follows advancements in metallurgy and minting machines to paper, plastic, and electronic moneys designed to ease trade and halt counterfeiting and other forms of theft. A timeline of monetary history is provided along with a glossary and bibliography. Numerous photographs of coins and bills provide an up-close look at beautiful and ingenious artifacts.

Merchants and Ports in the Indian Ocean World Radhika Seshan,Ryuto Shimada,2023-06-05 The Indian Ocean world has a rich history of socio-economic and cultural exchanges across time and space. This book and its companion, Connecting the Indian Ocean World explore these connections around the wider Indian Ocean world. The book looks at the extensive range of maritime networks that criss-crossed pre-modern Asia and the Indian Ocean region connecting ports, peoples and cultures. It explores the connected histories of these regions and the movement of merchants, commodities and money which created the multi-cultural and cosmopolitan port cities like Surat and Nagasaki. With contributions from Indian and Japanese scholars, the volume analyses travellers' accounts and trade routes between Japan and India, offering insights into how maritime movement shaped culture, politics and the social life of people in the most populated and productive regions of the world in the early modern period. Rich in archival material, this book will be of interest to scholars and researchers of Indian Ocean history, maritime history, economic and commercial history, Asian and South Asian history and social anthropology.

Strenuous Decades Chi-cheung Choi,Tomoko Shiroyama,Venus Viana,2022-03-07 The movement of goods and passengers between port cities not only stimulates growth in coastal trading networks and centers but also inevitably changes the social and economic lives of people in these port cities and, subsequently, of their fellow compatriots farther inland. Studies of port cities have focused on the interactive political and economic relationship between trading centers. The center of attention in this book is socioeconomic life and cultural identity, which are shaped by the movement of goods, people, knowledge, and information, particularly when the community faces a crisis. Transnational studies focus on cross-border connections between people, institutions, commodities, and ideas, with an emphasis on their global presence. This book looks at the responses of different localities to the same global crisis. It gathers a selection of the fifty papers presented at the conference on Coping with Transnational Crisis: Chinese Economic and Social Lives in East Asian Port Cities, 1850-1950, held in Hong Kong on June 7-11, 2016. The period from the 1850s to the outbreak of war in the Pacific in the late 1930s encompasses two major transnational crises with significant impacts on the Chinese population in Southeast Asian port cities in terms of their way of living and the construction of their identity: the emergence of bubonic plague in the 1880s and 1920s and the global economic crisis in the late 1920s and early 1930s. The authors discuss the social and economic lives in various South East Asian port cities where many residents had to cope with these transnational crises. They do so through examining institutional measurements, rituals and festivals, communication, knowledge and information exchange as well as identity (re)construction. In addition, they explore how local communities responded to knowledge and information between the port cities and cities as well as inland locations. The chapters in this book offer solid grounds for future comparisons, not only based on a specific time or event but also on how society reacted over time, space, and various types of crises.

Religion and Trade Francesca Trivellato,Leor Halevi,Cátia Antunes,2014 This title focuses on trade across religious boundaries around the Mediterranean Sea and the Atlantic and Indian Oceans during the second millennium, when transportation technology was fragile and religion often a primary marker of identity. It examines a wide range of commercial exchanges from first encounters between strangers who worshipped different gods and originated in different continents to everyday transactions between merchants who lived in the same city yet belonged to diverse confessional groups.

Scarcity and Frontiers Edward B. Barbier,2010-12-23 Throughout much of history, a critical driving force behind global economic development has been the response of society to the scarcity of key natural resources. Increasing scarcity raises the cost of exploiting existing natural resources and creates incentives in all economies to innovate and conserve more of these resources. However, economies have also responded to increasing scarcity by obtaining and developing more of these resources. Since the agricultural transition over 12,000 years ago, this exploitation of new 'frontiers' has often proved to be a pivotal human response to natural resource scarcity. This book provides a fascinating account of the contribution that natural resource exploitation has made to economic development in key eras of world history. This not only fills an important gap in the literature on economic history but also shows how we can draw lessons from these past epochs for attaining sustainable economic development in the world today.

The Princeton Companion to Atlantic History Joseph C. Miller,Vincent Brown,Jorge Cañizares-Esguerra,Laurent Dubois,Karen Ordahl Kupperman,2015-01-18 The first encyclopedic reference to Atlantic history Between the fifteenth and nineteenth centuries, the connections among Africa, the Americas, and Europe transformed world history—through maritime exploration, commercial engagements, human migrations and settlements,

political realignments and upheavals, cultural exchanges, and more. This book, the first encyclopedic reference work on Atlantic history, takes an integrated, multicontinental approach that emphasizes the dynamics of change and the perspectives and motivations of the peoples who made it happen. The entries—all specially commissioned for this volume from an international team of leading scholars—synthesize the latest scholarship on central themes, including economics, migration, politics, war, technologies and science, the physical environment, and culture. Part one features five major essays that trace the changes distinctive to each chronological phase of Atlantic history. This is an indispensable resource for students, researchers, and scholars in a range of fields, from early American, African, Latin American, and European history to the histories of economics, religion, and science. The first encyclopedic reference on Atlantic history Features five major essays and more than 125 alphabetical entries Provides essential context on major areas of change: Economies (for example, the slave trade, marine resources, commodities, specie, trading companies) Populations (emigrations, Native American removals, blended communities) Politics and law (the law of nations, royal liberties, paramount chiefdoms, independence struggles in Haiti, the Hispanic Americas, the United States, and France) Military actions (the African and Napoleonic wars, the Seven Years' War, wars of conquest) Technologies and science (cartography, nautical science, geography, healing practices) The physical environment (climate and weather, forest resources, agricultural production, food and diets, disease) Cultures and communities (captivity narratives, religions and religious practices) Includes original contributions from Sven Beckert, Holly Brewer, Peter A. Port Cities in Asia and Europe Arndt Graf, Chua Beng Huat, 2008-11-20 With the demise of European socialist economies and the marketization of Asian communist countries, a new global capitalism has reshaped the configuration of the world economy, with speed a determining factor to all transactions of information, finance, goods and services and people. Sea-ports that were significant for a slower but no less global economy have been undergoing transformation to stay economically and culturally relevant. Some manage to reinvent themselves as tourist cities, some face decline if they do not manage to transform. This volume looks at a number of port cities in Asia and Europe that face this pressure. With contributions considering history, contemporary developments, contacts between ports, the representation of ports and the relations between port cities and their hinterlands. This comparative study identifies many parallels between local histories and developments in the Asian and European port cities, as well as new opportunities for sharing experiences and learning from the developments and decisions in similar situations in other port cities.

[The Atlantic in World History, 1490-1830](#) Trevor Burnard, 2019-12-12 *The Atlantic in World History, 1490-1830* looks at the historical connections between four continents – Africa, Europe, North America and South America – through the lens of Atlantic history. It shows how the Atlantic has been more than just an ocean: it has been an important site of circulation and transmission, allowing exchanges and interchanges which have profoundly shaped the development of the world. Divided into four thematic sections, Trevor Burnard's sweeping yet concise narrative covers the period from the voyages of Columbus to the New World in the 1490s through to the end of the Age of Revolutions around 1830. It deals with key topics including the Columbian exchange, Atlantic slavery and abolition, war as a global phenomenon, the Age of Revolution, religious conversion, nation-building, trade and commerce and intellectual movements such as the Enlightenment. Rather than focusing on the 'rise of the West', Burnard stresses the interactive nature of encounters between various parts of the world, setting local case studies within his broader interconnected narrative. Written by a leading historian of Atlantic history, and including further reading lists, images and maps as well as a companion website featuring discussion questions, timelines and primary source extracts, this is an essential book for students of Atlantic and world history.
