Dynamics of an Authoritarian System Mária Csanádi,Márton Gerő,Miklós

Hajdu,Imre Kovách,István János Tóth,Mihály Laki,2022-07-12 This conceptually synthetic and empirically rich book demonstrates the vulnerability of democratic settings to authoritarianism and populism. Six scholars from various professional fields explore here the metamorphosis of a political party into a centralized authoritarian system. Viktor Orbán and his Fidesz party needed less than ten years to accomplish this transformation in Hungary. In 2010, after winning a majority that could make changes in the constitution – two-thirds of the parliamentary seats, they evolved and stabilized the system, which produced again the two-thirds majority in 2014 and 2018. The authors reveal how a democratic setting can be used as a device for political capture. They show how a political entity managed to penetrate almost all sub-fields of the economy to arrive at institutionalized corruption, and how the centralized power structure reproduces itself. With the help of a powerful empirical apparatus—among others analyses of more than 220,000 public tenders, redistributions of state subsidies, and the interconnectedness of those privileged with the political elite – the authors detail the functioning of a crony system and the network aspects of political connections in the rapid enrichment of politically-linked businesses. Their studies demonstrate the role of political capture in this redistribution and

how this capture leads to a new social stratification.

Institutional Entrepreneurship and Policy Change Caner Bakir, Darryl S. L. Jarvis, 2018-02-19 This book is about the role of agents in policy and institutional change. It draws on cross-country case studies. The focus on 'agency' has been an important development, enabling researchers to better reveal the causal mechanisms generating institutional change (i.e., how institutional change actually takes place). However, past research has generally been limited to specific intellectual silos or scholarly domains of inquiry. Policy scholars, for example, have tended to focus on the various mechanisms and levels at which agency operates, drawing on institutionalist perspectives but not always actively contributing to institutionalist theory. Institutional perspectives, by contrast, have tended to operate at macro-levels of enquiry, embracing the ontological primacy of institutions in processes of isomorphism but not necessarily contributing to or embracing policy perspectives that engage in more granular analyses of policy making processes, implementation, and the instantiation of institutional and policy change. Despite the obvious complementarities of these two intellectual traditions, it is surprising how little collaborative work, or indeed cross fertilization of theory and analytical design has occurred. The core novelty of this volume is thus its focus on agential actors within institutional settings and processes of entrepreneurship that facilitate isomorphism and policy change. The book's theoretical framework is grounded in variants of

institutional theory, especially historical, sociological and organisational institutionalism and policy entrepreneurship literature. The overall conclusion is that both institutionalists and public policy scholars have largely overlooked the importance of complex interactions between interdependent structures, institutions, and agents in processes of institutional and policy change.

The Retreat of Liberal Democracy Gábor Scheiring, 2020-08-26 This book is the product of three years of empirical research, four years in politics, and a lifetime in a country experiencing three different regimes. Transcending disciplinary boundaries, it provides a fresh answer to a simple yet profound question: why has liberal democracy retreated? Scheiring argues that Hungary's new hybrid authoritarian regime emerged as a political response to the tensions of globalisation. He demonstrates how Viktor Orbán's Fidesz exploited the rising nationalism among the working-class casualties of deindustrialisation and the national bourgeoisie to consolidate illiberal hegemony. As the world faces a new wave of autocratisation, Hungary's lessons become relevant across the globe, and this book represents a significant contribution to understanding challenges to democracy. This work will be useful to students and researchers across political sociology, political science, economics and social anthropology, as well democracy advocates.

Energy Cultures Michael C. LaBelle, 2020-11-27 This thought-provoking book explores the concept of energy cultures as a means of understanding social

and political relations and how energy injustices are created. Using Eastern Europe as an example, it examines the radical transition occurring as the region leaves behind the legacy of the Soviet Union, and the effects of the resulting power struggle between the energy cultures of Russia and the European Union.

Contemporary Housing Struggles Ioana Florea, Agnes Gagy, Kerstin Jacobsson, 2022 This OA book provides a comparative study of housing contention in Budapest and Bucharest in 2008-2021. The financialization of housing and the resulting inequalities, expulsions and social contention are a central characteristic of today's capitalist crisis. These two East European cities that fall outside the usual focus of urban movements research provide an illuminating case of similar structural conditions governed by different political constellations at the national and local scales. Instead of searching for unilinear narratives connecting structural tensions to politicized claims, the book offers an in-depth contextual analysis of multiple forms of contention, their (often unintentional) interactions, and their broader political-structural background, including tensions surrounded by political silence. The authors analyze the two cases and their comparative lessons through what they propose as a structural field of contention approach to the multiple, interconnected ways in which structural tensions become (or not) politicized in today's social movements. The book will appeal to everyone interested in today's urban tensions and social movements. .

OECD Economic Surveys: Hungary 2021 OECD,2021-07-30 The COVID-19 pandemic interrupted the strong economic growth performance in 2016-19, which entailed large increases in employment and real incomes, and the lowest unemployment rate in thirty years. The swift vaccination rollout allows a faster recovery from the pandemic from mid-2021 onwards.

New Zealand's Global Responsibility László Szöllősi-Cira,2022-01-01 New Zealand often plays leading roles in implementing progressive ideas. This book investigates what explanatory factors facilitated the country to become such a relevant normative actor. New Zealand's case suggests that democratic institutions, skilled bureaucracy, and ambitious politicians play the crucial roles to create global influence. The case studies included in this book develop the argument that small states can better influence international politics by focusing on domestic issues. In contributing to discourses on New Zealand's possible future role, the book is an invaluable resource to intellectuals, researchers, and students alike.

Lexicography of Coronavirus-related Neologisms Annette Klossa-Kückelhaus,Ilan Kernerman,2022-12-19 This volume brings together contributions by international experts reflecting on Covid19-related neologisms and their lexicographic processing and representation. The papers analyze new words, new meanings of existing words, and new multiword units, where they come from, how they are transmitted (or differ) across languages, and how their use and meaning are reflected in dictionaries of all sorts.

Recent trends in as many as ten languages are considered, including general and specialized language, monolingual as well as bilingual and printed as well as online dictionaries.

The Gender Regime of Anti-Liberal Hungary Eva Fodor, 2021-11-30 This Open Access book explains a new type of political order that emerged in Hungary in 2010: a form of authoritarian capitalism with an anti-liberal political and social agenda. Eva Fodor analyzes an important part of this agenda that directly targets gender relations through a set of policies, political practice and discourse—what she calls “carefare.” The book reveals how this is the anti-liberal response to the crisis-of-care problem and establishes how a state carefare regime disciplines women into doing an increasing amount of paid and unpaid work without fair remuneration. Fodor analyzes elements of this regime in depth and contrasts it to other social policy ideal-types, demonstrating how carefare is not only a set of policies targeting women, but an integral element of anti-liberal rule that can be seen emerging globally.

Nations in Transit 2014 Freedom House, 2014-09-24 Since 1995, Freedom House’s Nations in Transit series has monitored the status of democratic change from Central Europe to Eurasia, pinpointing the region’s greatest reform opportunities and challenges for the benefit of policymakers, researchers, journalists, and democracy advocates alike.

Energy Union Svein S. Andersen, Andreas Goldthau, Nick Sitter, 2016-10-27 This book contributes to an ongoing debate about the EU as a global actor, the

organization's ability to speak with one voice in energy affairs, and the external dimension of the regulatory state. Investigating whether the Energy Union amounts to a fundamental shift towards Europe's new 'Liberal Mercantilism', it gathers high-level contributors from academia and the policy world to shed light on the changing nature of the EU's use of power in one of its most crucial policy fields. It argues that the Energy Union epitomizes a change in the EU's approach to managing its economic power. Whilst the EU remains committed to a liberal approach to international political economy, it seems ready to promote regulation for the purpose of augmenting its own power at the expense of others, notably Russia. This edited collection will appeal to political scientists, economists and energy experts. div

Twenty-Five Sides of a Post-Communist Mafia State Balint Magyar, Julia Vasarhelyi, 2017-02-28 The twenty-five essays accompany, illustrate and underpin the conceptual framework elaborated in *Post-Communist Mafia State*, published in conjunction with this volume. Leading specialists analyze the manifestations of the current political regime in Hungary from twenty-five angles. Topics discussed include the ideology, constitutional issues, social policy, the judiciary, foreign relations, nationalism, media, memory politics, corruption, civil society, education, culture and so on. Beyond the basic features of the economy the domains of taxation, banking system, energy policies and the agriculture are treated in dedicated studies. The essays are

based on detailed empirical investigation about conditions in today's Hungary. They nevertheless contribute to the exploration of the characteristic features of post-communist authoritarian regimes, shared by an increasing number of countries in Europe and Central Asia. Joint publication with Noran Libro, Budapest

Investment Arbitration in Central and Eastern Europe Csongor Nagy, 2019
Central and Eastern Europe (CEE) is the testing ground for investment arbitration in Europe: the majority of the cases against EU Member States are proceedings launched against countries from the region. Despite their relevance, CEE experiences have not been analysed in a comprehensive manner. This book is the first of its kind to present an extensive collection of case law on investment arbitration within Europe. Contributors provide contextual analysis, taking political, economic and regulatory factors into account, to create an accessible text for practitioners and scholars alike.

Power, Energy, and the New Russian Imperialism Anita Orban, 2008-09-30
Russia is the world's foremost energy superpower, rivaling Saudi Arabia as the world's largest oil producer and accounting for a quarter of the world's exports of natural gas. Russia's energy reserves account for half of the world's probable oil reserves and a third of the world's proven natural gas reserves. Whereas military might and nuclear weapons formed the core of Soviet cold war power, since 1991 the Russian state has viewed its monopolistic control of Russia's energy resources as the core of its power

now and for the future. Since 2005, the international news has been filled with Russia's repeated demonstrations of its readiness to use price, transit fees, and supply of gas and oil exports as punitive policy instruments against recalcitrant states that were formerly part of the Soviet Union, striking in turn the Ukraine, Georgia, Azerbaijan, Armenia, Belarus, and Lithuania. Orban reveals for the first time in *Power, Energy, and the New Russian Imperialism* Russia's readiness to wield the same energy weapon against her neighbors on the west, all of them former Soviet satellite states but now EU and NATO member nations: the three Baltic nations and the five East European nations of Poland, Slovakia, Hungary, the Czech Republic, and Slovenia. Orban shows how the Kremlin since 1991 has systematically used Russian energy companies as players in a concerted neo-mercantilist, energy-based foreign policy designed to further Russia's neo-imperial ambitions among America's key allies in Central East Europe. Her unprecedented analysis is key to predicting Russia's strategic response to American negotiations with Poland and the Czech Republic to host the US missile shield. She also reveals the economic and diplomatic modus operandi by which Russia will increasingly apply its energy clout to shape and coerce the foreign policies of the West European members of the EU, as Russia's contribution to EU gas consumption increases from a quarter today to three-quarters by 2020. Orban proves that Russia's neo-mercantilist energy strategy in East Europe is not at all dependent on the person of Putin, but began under Yeltsin and

continues under Medvedev, the former chairman of Gazprom.

Snakes in Myth, Magic, and History Diane Morgan, 2008-09-30 The snake is one of humankind's most powerful and ambiguous symbols: it has at various times represented immortality and death, male and female, deity and demon, circle and line, killer and healer, the highest wisdom and the deepest subconscious. By virtue of its mysterious movement, potent poison, fearful grip, unblinking gaze and lightning quick strike, the power and image of the snake has wound its way into every culture. Whether snakes are worshipped as gods, feared as devils, or handled in religious ceremonies to test faith, snakes have played a critical role in the human heritage. This book explores the cult of the snake in world history, religion, and folklore. Fascination with snakes has been around since the dawn of time. Even today, images of snakes attract attention, fear, disgust, or admiration. Morgan examines that obsession with this mysterious creature, covering in vivid details such topics as mythical snakes like the Plumed Serpent, serpent iconography, tall tales, as well as the psychological symbolism that has attached itself to snakes. Cultures as diverse as pre-Columbian America, India, Egypt, China, sub-Saharan Africa, Celtic Europe, and the United States have all accorded the serpent a special place in their culture—apparently regardless of whether or not real snakes play an important part in the life of the people. Here, the mysterious nature of the snake unfolds, enchanting readers with a colorful and lively discussion of its place in our history, stories, religions, and cultures.

Under Siege Scott N. Romaniuk, 2022-02-07 This book critically examines the effects of the Hungarian government's counterterrorism and security policies and practices on the operational capacities of civil society organizations. It argues that the government's security regime has significantly altered the autonomous space of organizations and severely strained state-society relations.

Divisive integration. The triumph of failed ideas in Europe – revisited
Steffen Lehndorff, 2014-04-01 This book is a follow-up to the ETUI 2012 volume 'The triumph of failed ideas'. The focus of the book is the weight attributed to the different economic and social development paths in ten individual EU countries, and their interaction with the austerity regime established at EU level which in fact is deepening the crisis rather than paving ways out of it. The most dangerous implication of this policy approach is, according to this study, that it is driving countries apart - misleadingly in the name of 'Europe', hence the title of the book 'divisive integration'. The main message of the book is that a gradual recovery is possible only if there is a change of course in individual countries that then triggers reactions in the policies of other countries and perturbations at the EU level. However, these changes in individual countries is no longer feasible without a green light or at least toleration from the level of the European institutions.

Ethical Failures of the COVID-19 Pandemic Response Péter Marton, 2022-12-08 This book draws attention to the non-biological-political, economic, societal

and cultural—variables shaping both the emergence and persistence of the COVID-19 pandemic and the global response to it, with a particular focus on political decisionmakers' role in the domestic and international politics surrounding the process of the pandemic. The book identifies the strategic and underlying ethical failures of decision making, using a process-tracing approach to reconstruct considerations, decisions and actions by key leaders—interested in thus weaving a global narrative of the response. The author highlights key speech acts, and interprets the causal implications embedded in a chronological and contextualised appraisal of events, statements and public health measures. The book further discusses the normative ethics of pandemic response, and presents lessons drawn from the present experience. It also offers a normative analysis taking into consideration pre-pandemic guidelines for response, including in the literature of public health ethics and pandemic preparedness plans.

Financial Risk Management for Cryptocurrencies Eline Van der Auwera, Wim Schoutens, Marco Petracco Giudici, Lucia Alessi, 2020-09-20 This book explores the emerging field of risk management and risk analysis of cryptocurrencies, an area that has been generating considerable research. It begins by providing an introduction to digital finance and the concept of cryptocurrencies and blockchain technologies. It then describes in detail the intrinsic risks involved in cryptocurrencies, an area that, to date, has not been fully documented or investigated. Lastly, it discusses the various types

of risk, with a focus on design, operational, market and quantitative risks. Providing insights into the analysis and management of cryptocurrencies, and serving as a starting point for a more in-depth risk analysis, this book will appeal to professionals and researchers interested in familiarizing themselves with the risks in cryptocurrencies, including academics, portfolio managers, risk-managers, quants, financial professionals, regulators, economists, asset managers and traders.
