Positive Thinking Anthony Ekanem,2016-08-12 You have probably had someone tell you to think positive when you were in a trying situation. That is because the power of positive thinking is something that is a widely held belief. Most people easily accept that when you give off positive energy, you can infect others with that positive energy and that they will return that energy to you. It is basically the idea that what you put out there will come back to you. Positive influences are all around us. They exist because people love to feel good. People prefer the positive to the negative. You can likely relate to this. You would probably rather be around someone who is upbeat and full of energy than someone who is depressed and moping around. People see that thinking positive and having a positive attitude can play a large role in their life. Positive thinking can be very powerful and by putting it to work in your life; you can reap the positive benefits.

The Power of Positive Thinking in Business Scott W. Ventrella,2001-06-24 One of the most powerful forces in business today is the positive psychology movement -- overcoming self-defeating attitudes and developing our talents and positive traits. Much of the new thinking, in fact, stems directly from the concepts in Norman Vincent Peale's great classic bestseller, The Power of Positive Thinking, which has been translated into forty-two languages and has sold over 22 million copies. Now, after years of extensive research and field testing, working in cooperation with the Peale Center and major corporations nationwide, Scott Ventrella has adapted those concepts into a systematic program for people in business to achieve greater levels of personal and professional performance. The Power of Positive Thinking in Business provides a practical way for each of us to develop and actually strengthen the ten traits of a positive thinker. Inevitably, our performance rises to new levels when we learn how to overcome negative attitudinal barriers such as fear, lack of self-confidence, and low self-esteem, and instead develop the traits that characterize a positive thinker: optimism, enthusiasm, belief, integrity, courage, confidence, determination, patience, calmness, and focus. The Power of Positive Thinking in Business encourages us to concentrate on objective, rational thinking instead of self-limiting beliefs and negative self-talk. The result is an increased ability to deal effectively with tough situations and difficult people, in both business environments and personal lives. Together, rational thinking and the ten traits of a positive thinker can turn defeatist behavior into productive actions that will overcome the toughest of challenges with powerful, positive results. Best of all, these practical yet powerful concepts are applicable to businesspeople at all levels, disciplines, and functions within an organization, and have been adapted to appeal to people of all faiths.

Positive Thinking: Nils,2015-06-16 Those who think positively, get more out of life. They live happier. They live healthier. They have better relationships with other people. They don't take life too seriously. They live like winners and win as they go through life. Sad and gray was yesterday. Today, optimism is in demand and on the rise. Positive thinking and meditation are a path to enlightenment. Properly practiced positive thinking leads to inner happiness, peace, health and good interpersonal relations. Positive thinking is a mental technique, that must be practiced wisely. It should not be misused to repress feelings or problems. Positive thinking must be used sensitively and healingly. The combination of mind work and meditation is the basis of the eightfold yoga path (Patanjali).

Bright-sided Barbara Ehrenreich,2009-10-13 Exposes the downside of America's penchant for positive thinking, which the author believes leads to self-blame and a preoccupation with stamping out negative thoughts on a personal level, and, on a national level, has brought on economic disaster.
