Semiconductor Industry J. Michael Sherer,2018-10-03 Given the myriad exhaust compounds and the corresponding problems that they can pose in an exhaust management system, the proper choice of such systems is a complex task. Presenting the fundamentals, technical details, and general solutions to real-world problems, Semiconductor Industry: Wafer Fab Exhaust Management offers practical guidance on selecting an appropriate system for a given application. Using examples that provide a clear understanding of the concepts discussed, Sherer covers facility layout, support facilities operations, and semiconductor process equipment, followed by exhaust types and challenges. He reviews exhaust point-of-use devices and exhaust line requirements needed between process equipment and the centralized exhaust system. The book includes information on wet

scrubbers for a centralized acid exhaust system and a centralized ammonia exhaust system and on centralized equipment to control volatile organic compounds. It concludes with a chapter devoted to emergency releases and a separate chapter of examples illustrating these systems in use. Drawing on the author's 20 years of industry experience, the book shows you how to customize strategies specific to your needs, solve current problems, and prevent future issues in your exhaust management systems.

He Pou Hiringa Katharina Ruckstuhl, Merata Kawharu, Maria Amoamo, 2021-11-29 'The creation of new science requires moving beyond simply understanding one another's perspectives. We need to find transformative spaces for knowledge exchange and progress.' Māori have a long history of innovation based on mātauranga and tikanga – the knowledge and values passed down from ancestors. Yet Western science has routinely failed to acknowledge the contribution of Indigenous peoples and their vital worldviews. Drawing on the experiences of researchers and scientists from diverse backgrounds, this book raises two important questions. What contribution can mātauranga make to addressing grand challenges facing New Zealand and the world? And in turn, how can Western science and technology contribute to the wellbeing of Māori people and lands?
