Pregnancy comes with some cost, however, a pregnant woman needs to be responsible, so as to best support the health of her future child. The growing fetus (the term used to denote the baby-to-be prior to birth) depends entirely on its mother's healthy body for all needs. Consequently, pregnant women must take steps to remain as healthy and well-nourished as they possibly can. Pregnant women should take into account the many health care and lifestyle considerations described in this center. you should educate yourself on what to expect when expecting. From early signs of pregnancy,a woman should start using a pregnancy calculator from conception to monitor week to week of growth. pregnancy week calculator helps through the trimesters. Pregnancy is typically divided into three trimesters. The first trimester is from week one through 12 and includes conception. Conception is when the sperm fertilizes the egg. The fertilized egg then travels down the fallopian tube and attaches to the inside of the uterus, where it begins to form the embryo and placenta. The first trimester carries the highest risk of miscarriage (natural death of embryo or fetus). The second trimester is from week 13 through 28. Around the middle of the second trimester, movement of the fetus may be felt. At 28 weeks, more than 90% of babies can survive outside of the uterus if provided with high-quality medical care. The third trimester is from 29 weeks through 40 weeks. This book is designed to educate you about what pregnancy entails.
