The Pregnancy Test Melissa Heckscher, Emily Sicking, M.D., 2011-05-03

Expecting moms have plenty of weird and blush-worthy questions they'd rather not ask their doctors: "Is it okay to get a bikini wax?" "Can my baby cry in the womb?" "Why have I gained so much weight?" The Pregnancy Test turns these questions and others into a delightful multiple-choice guessing game, complete with carefully researched and informative responses to the wildest and most outrageous concerns. Authors Melissa Heckscher and Dr. Emily Sicking test readers' knowledge of everything from fetal development to labor and delivery—and along the way, you'll learn why pregnant women should stay off roller coasters and go easy on caffeine. The perfect gift for new moms (and a terrific refresher course for seasoned veterans), The Pregnancy Test answers everything you've ever wondered while expecting.

Pregnancy Test Karen Weingarten, 2023-03-09 Object Lessons is a series of short, beautifully designed books about the hidden lives of ordinary things. In the 1970s, the invention of the home pregnancy test changed what it means to be pregnant. For the first time, women could use a technology in the privacy of their own homes that gave them a yes or no answer. That answer had the power to change the course of their reproductive lives, and it chipped away at a paternalistic culture that gave gynecologists—the majority of whom were men—control over information about women's bodies. However, while science so often promises clear-cut answers, the reality of pregnancy is often much messier. *Pregnancy Test* explores how the pregnancy test has not always lived up to the fantasy that more information equals more knowledge. Karen Weingarten examines the history and cultural representation of the pregnancy test to show how this object radically changed sex and pregnancy in the late 20th and early 21st centuries. Object Lessons is published in partnership with an essay series in the The Atlantic.

Pregnancy Tests Explained (2Nd Edition) Dr Patrick Chia FRCOG FAFP (Mal), Dr Vijayan V FRCOG, 2023-01-29 Antenatal diagnosis has come a long way. As newer, more accurate, and less-invasive screening tests are available, doctors must constantly update themselves via the most recent research and publications. Good antenatal care is essential. Over the last decade we have seen rapid advances in medical technology that allowed the development of tools and tests essential to help reduce the risks to the mother and her developing foetus. The high-resolution transvaginal probe, with its crystal-clear view of the foetus, now make it possible for first-trimester diagnoses. From the perspective of the doctor, these tests will provide vital information that will be utilised to optimise antenatal care. It will afford early and timely intervention in terms of in utero therapy or prepare the mother for a potentially unfavourable outcome. Owing to the introduction of newer testing techniques, we have seen a shift in screening strategies. It has broadened the scope of antenatal testing from increasingly higher resolution ultrasound scans to genome molecular tests. In addition, non-invasive prenatal diagnoses are increasingly available and becoming more affordable.

Research Handbook on Childhoodnature Amy Cutter-Mackenzie-Knowles, Karen Malone, Elisabeth Barratt Hacking, 2020-04-06 This handbook provides a compilation of research in Childhoodnature and brings together existing research themes and seminal authors in the field alongside new cutting-edge research authored by world-class researchers drawing on cross-cultural and international research data. The underlying objectives of the handbook are two-fold: • Opening up spaces for Childhoodnature researchers; • Consolidating Childhoodnature research into one collection that informs education. The use of the new concept 'Childhoodnature' reflects the editors' and authors' underpinning belief, and the latest innovative concepts in the field, that as children are nature this should be redefined in this integrating concept. The handbook will, therefore, critique and reject an anthropocentric view of nature. As such it will disrupt existing ways of considering children and nature and reject the view that humans are superior to nature. The work will include a Childhoodnature Companion featuring works by children and young people which will effectively enable children and young people to not only undertake their own research, but also author and represent it alongside this Research Handbook on Childhoodnature.

Biomarkers in Psychiatry Judith Pratt, Jeremy Hall, 2019-01-05 This volume addresses one of the Holy Grails in Psychiatry, namely the evidence for and potential to adopt 'Biomarkers' for prevention, diagnosis, and treatment responses in mental health conditions. It meshes together state of the art research from international renowned pre-clinical and clinical scientists to illustrate how the fields of anxiety disorders, depression, psychotic disorders, and autism spectrum disorder have advanced in recent years.

Childhood and Nature David Sobel, 2008 Presents a collection of essays combining anecdotal and theoretical insights into environmental ethics and human ecology to help foster environmentally responsible students.

Wild Pedagogies Bob Jickling, Sean Blenkinsop, Nora Timmerman, Michael De Danann Sitka-Sage, 2018-06-22 This book explores why the concept of wild pedagogy is an essential aspect of education in these times; a re-negotiated education that acknowledges the necessity of listening to voices in a more than human world, and (re)learning how to dwell in a place. As the geological epoch inexorably shifts to the Anthropocene, the authors argue that learning to live in and engage with the world is increasingly crucial in such times of uncertainty. The editors and contributors examine what wild pedagogy can truly become, and how it can be relevant across disciplinary boundaries: offering six touchstones as working tools to help educators forge an onward

path. This collaborative work will be of interest to students and scholars of wild pedagogies, alternative education and the Anthropocene, and for all those engaged in re-wilding education.

The Posthuman Child Karin Murris, 2016-03-17 The Posthuman Child combats institutionalised ageist practices in primary, early childhood and teacher education. Grounded in a critical posthumanist perspective on the purpose of education, it provides a genealogy of psychology, sociology and philosophy of childhood in which dominant figurations of child and childhood are exposed as positioning child as epistemically and ontologically inferior. Entangled throughout this book are practical and theorised examples of philosophical work with student teachers, teachers, other practitioners and children (aged 3-11) from South Africa and Britain. These engage arguments about how children are routinely marginalised, discriminated against and denied, especially when the child is also female, black, lives in poverty and whose home language is not English. The book makes a distinctive contribution to the decolonisation of childhood discourses. Underpinned by good quality picturebooks and other striking images, the book's radical proposal for transformation is to reconfigure the child as rich, resourceful and resilient through relationships with (non) human others, and explores the implications for literary and literacy education, teacher education, curriculum construction, implementation and assessment. It is essential reading for all who research, work and live with children.

Equity as Praxis in Early Childhood Education and Care Zuhra Abawi, Ardavan Eizadirad, Rachel Berman, 2021-05-22 Equity as Praxis in Early Childhood Education and Care aims to map, deconstruct, and engage with different models of equity as they pertain to the early childhood education landscape in Ontario. Drawing on marginalized narratives of gender, race, Indigeneity, dis/ability and inclusion, and migration, immigration, and displacement, the authors discuss how to advance the field and make it more equitable for children, families, early childhood educators, and all other practitioners. This edited collection outlines the current political climate of early childhood education and care in Ontario through a critical analysis of policies and dominant discourses of equity and inclusion. By prompting readers to reflect on and critique their understandings of children, families, communities, and practices in the field, the authors seek to provide counternarratives to Eurocentric developmentalist hegemonies and an alternative strength-based approach to critical and transformative praxis. This vital text encourages rethinking how narratives of equity and inclusion are constructed and what this means for young children and their families in Ontario, as well as throughout Canada. This is an essential resource for students in early childhood education and care, early childhood studies, and education programs. FEATURES: - Includes perspectives from multiple positionalities in the field to provide a critical and interdisciplinary approach - Draws on a reconceptualist lens to present a critique of developmentalist approaches - Encourages readers to engage with the content by practising critical self-examination and considering social factors and forces that inform their own concepts

The Human Relationship with Nature Peter H. Kahn, 1999 Winner of Outstanding Book Award, 2000, Moral Development and Education, American Educational Research Association. Winner of the 2000 Book Award from the Moral Development & Education Group of the American Educational Research

Association Urgent environmental problems call for vigorous research and theory on how humans develop a relationship with nature. In a series of original research projects, Peter Kahn answers this call. For the past eight years, Kahn has studied children, young adults, and parents in diverse geographical locations, ranging from an economically impoverished black community in Houston to a remote village in the Brazilian Amazon. In these studies Kahn seeks answers to the following questions: How do people value nature, and how do they reason morally about environmental degradation? Do children have a deep connection to the natural world that gets severed by modern society? Or do such connections emerge, if at all, later in life, with increased cognitive and moral maturity? How does culture affect environmental commitments and sensibilities? Are there universal features in the human relationship with nature? Kahn's empirical and theoretical findings draw on current work in psychology, biology, environmental behavior, education, policy, and moral development. This scholarly yet accessible book will be of value to practitioners in the social science and environmental fields, as well as to informed generalists interested in environmental issues and children.

13 Things Mentally Strong People Don't Do Amy Morin, 2014-12-23 Kick bad mental habits and toughen yourself up.—Inc. Master your mental strength—revolutionary new strategies that work for everyone from homemakers to soldiers and teachers to CEOs. Everyone knows that regular exercise and weight training lead to physical strength. But how do we strengthen ourselves mentally for the truly tough times? And what should we do when we face these challenges? Or as psychotherapist Amy Morin asks, what should we avoid when we encounter adversity? Through her years counseling others and her own experiences navigating personal loss, Morin realized it is often the habits we cannot break that are holding us back from true success and happiness. Indulging in self-pity, agonizing over things beyond our control, obsessing over past events, resenting the achievements of others, or expecting immediate positive results holds us back. This list of things mentally strong people don't do resonated so much with readers that when it was picked up by Forbes.com it received ten million views. Now, for the first time, Morin expands upon the thirteen things from her viral post and shares her tried-and-true practices for increasing mental strength. Morin writes with searing honesty, incorporating anecdotes from her work as a college psychology instructor and psychotherapist as well as personal stories about how she bolstered her own mental strength when tragedy threatened to consume her. Increasing your mental strength can change your entire attitude. It takes practice and hard work, but with Morin's specific tips, exercises, and troubleshooting advice, it is possible to not only fortify your mental muscle but also drastically improve the quality of your life.

Children in the Anthropocene Karen Malone, 2018-12-04 This book elaborates the need, in a rapidly urbanizing world, for recognition of the ecological communities we inhabit in cities and for the development of an ethics for all entities (human and non-human) in this context. Children and their entangled relations with the human and more-than-human world are located centrally to the research on cities in Bolivia and Kazakhstan, which investigates the future challenges of the Anthropocene. The author explores these relations by employing techniques of intra-action, diffraction and onto-ethnography in order to reveal the complexities of children's lives. These tools are

supported by a theoretical framing that draws on posthumanist and new materialist literature. Through rich and complex stories of space-time-mattering in cities, this work connects children's voices with a host of others to address the question of what it means to be a child in the Anthropocene.

Research Handbook on Mediating International Crises Jonathan Wilkenfeld, Kyle Beardsley, David Quinn, 2019 Current conceptions of mediation can often fail to capture the complexity and intricacy of modern conflicts. This Research Handbook addresses this problem by presenting the leading expert opinions on international mediation, examining how international mediation practices, mechanisms and institutions should adapt to the changing characteristics of contemporary international crises.
