Understanding Mass Higher Education David Palfreyman, TED TAPPER, 2005-10-05 In recent years most western democracies have experienced a shift from elite to mass higher education, with the United States leading the way. This text compares the experience of this very important social change within different nation states. Whilst recognising the critical global economic forces that appear to explain the international nature of the change, it sees the issues as rooted within different national traditions. There is a particular focus upon the discourse of access, especially the political discourse. The book addresses questions such as: * How has expansion been explained? * Has expansion been generated by state intervention or by a combination of economic and social forces? * What are the forms of political intervention? * What points of agreement and conflict are generated within the wider society by expanding access? Leading academic experts explore the ways in which different systems of higher education have accommodated mass access, constructing comparative pictures and comparative interpretations and lessons in an accessible and informative style. This book should be critical reading for students in education, sociology and politics, as well as policy-makers and academics.

Foundations of p-adic Teichmüller Theory Shinichi Mochizuki, 2014-01-06 This book lays the foundation for a theory of uniformization of p-adic hyperbolic curves and their moduli. On one hand, this theory generalizes the Fuchsian and Bers uniformizations of complex hyperbolic curves and their moduli to nonarchimedean places. That is why in this book, the theory is referred to as p-adic Teichmüller theory, for short. On the other hand, the theory may be regarded as a fairly precise hyperbolic analog of the Serre-Tate theory of ordinary abelian varieties and their moduli. The theory of uniformization of p-adic hyperbolic curves and their moduli was initiated in a previous work by Mochizuki. And in some sense, this book is a continuation and generalization of that work. This book aims to bridge the gap between the approach presented and the classical uniformization of a hyperbolic Riemann surface that is studied in undergraduate complex analysis. Features: Presents a systematic treatment of the moduli space of curves from the point of view of p-adic Galois representations. Treats the analog of Serre-Tate theory for hyperbolic curves. Develops a p-adic analog of Fuchsian and Bers uniformization theories. Gives a systematic treatment of a nonabelian example of p-adic Hodge theory. Titles in this series are co-published with International Press of Boston, Inc., Cambridge, MA.

Developing Advanced Assessment Skills Ann Saxon, Sue Lillyman, 2011 This book will help you to develop some of the essential assessment skills that are needed to support patients with long-term conditions in secondary and primary care settings. You may be at the beginning of your career, or you may be an experienced practitioner who is moving into long-term conditions care. At whatever level you may be, this book will give you some guidance on how to use appropriate assessment tools and to reflect on your experience from practice. Supporting patients with long-term conditions is not solely the domain of nursing. This book is intended to be suitable for a range of practitioners who are interested in developing their assessment skills further. However some examples have been given from a nursing perspective. The exercises throughout the book have been designed to encourage you to reflect on your practice and draw from the wide range of evidence that is available to support your development. You can work through them at your own pace and return to chapters that you need to learn more about.

Democracy’s Capital Lauren Pearlman,2019-09-10 From its 1790 founding until 1974, Washington, D.C.--capital of the land of the free--lacked democratically elected city leadership. Fed up with governance dictated by white stakeholders, federal officials, and unelected representatives, local D.C. activists catalyzed a new phase of the fight for home rule. Amid the upheavals of the 1960s, they gave expression to the frustrations of black residents and wrestled for control of their city. Bringing together histories of the carceral and welfare states, as well as the civil rights and Black Power movements, Lauren Pearlman narrates this struggle for self-determination in the nation's capital. She captures the transition from black protest to black political power under the Lyndon Johnson and Richard Nixon administrations and against the backdrop of local battles over the War on Poverty and the War on Crime. Through intense clashes over funds and programming, Washington residents pushed for greater participatory democracy and community control. However, the anticrime apparatus built by the Johnson and Nixon administrations curbed efforts to achieve true home rule. As Pearlman reveals, this conflict laid the foundation for the next fifty years of D.C. governance, connecting issues of civil rights, law and order, and urban renewal.
