El público de la prensa en España a finales del siglo XVIII

(1781-1808) Elisabel Larriba,2013 El desarrollo de la prensa en España no estuvo exento de vacilaciones, pero tuvo un papel decisivo en la expansión de ideas que buscaban la modernización económica, política y social. En este libro se realiza un exhaustivo análisis de los compradores y lectores de periódicos en la España de la Ilustración. A partir de un corpus de 8526 suscriptores individuales, estudia los hábitos lectores de las distintos estamentos, grupos socioprofesionales y sexos, revisa la circulación de la prensa en la Península y las colonias, examina el

impacto de las publicaciones nacionales y locales, y reconstruye el papel que ejercieron distintas instituciones, desde la Corona a las Sociedades Económicas de Amigos del País o la Inquisición. Alternando una visión de conjunto con calas concretas de casos especialmente representativos, la autora elabora un riguroso panorama sociológico, imprescindible para estudiar los comienzos de la prensa en España y para conocer el proceso de transmisión de las ideas en los albores de la Edad Contemporánea.

OJD, 40 años de prensa en España, 1965-2005 Fermín Vílchez, 2005 Nos ofrece la evolución de la prensa española desde la época franquista hasta ahora.

Oralización de la prensa española Ana Mancera Rueda, 2009
¿Es posible escribir como se habla? ¿Pueden encontrarse huellas de la oralidad en los textos periodísticos? ¿Qué propósito persigue el columnista que se dirige a sus lectores como si conversara con ellos? El uso del español coloquial en la prensa ¿puede ayudar a solventar la crisis del sector, incrementando el número de lectores? Estas son algunas de las cuestiones que se plantean en las páginas de este estudio, que analiza los rasgos de la oralidad

coloquial presentes en la prensa española. Y es que, hasta hace escasas décadas, la literatura parecía ser la única fuente de información válida para conocer los elementos característicos del discurso conversacional. Sin embargo, los textos periodísticos - y no sólo los más actuales, también algunos artículos y noticias decimonónicos - son capaces de recrear la situación de máxima proximidad comunicativa. El estudio de este fenómeno se centra especialmente en la columna de opinión. Para ello se ha escogido un corpus de 180 columnas publicadas fundamentalmente entre 2000 y 2007 en periódicos muy distintos - de ámbito nacional o local, de periodicidad diaria o semanal, publicaciones gratuitas, algunos medios digitales, suplementos dominicales, etc. -, con el objeto de demostrar que este fenómeno puede apreciarse - en mayor o menor medida - en el amplio espectro mediático de la prensa española.

Prensa, guerra y revolución Alberto Gil Novales,2009 La prensa española del período 1808-1814 engendra y anuncia desde

su actualidad la futura grandeza periodística del Trienio Liberal, a la vez que lo hace el resto de Europa. Pese a que la mentira y el servilismo de muchos órganos de expresión sean motivo de indignación, es cierto que basta pensar en unos pocos títulos para comprender la inmensa aportación que hicieron al logro colectivo de España. En esta cuidada edición se relacionan 644 periódicos publicados en el territorio nacional, todos impresos excepto dos, sin excluir algunas publicaciones en español que vieron la luz en Bayona, Gibraltar, Londres y América.

La prensa española de nuestro tiempo Arturo Mori, 1943

Prensa y política en la España contemporánea. El negocio de la influencia Juan Carlos Sánchez Illán, 2022-09-01 En este libro se trata esencialmente de estudiar, en el caso español, la evolución histórica de los distintos medios de comunicación como elementos decisivos en la configuración de la esfera pública o de la comunicación social. Un proceso que ha ido evolucionando, con giros radicales, desde la simpleza brutal del absolutismo hasta el presente, caracterizado por la enorme complejidad del papel de los medios periodísticos en el sistema democrático. El modelo de evolución histórica de la prensa en España ha sido el del proceso de construcción de una esfera pública muy frágil e inestable. La

construcción del modelo de prensa se ha producido en un marco que ha basculado radicalmente desde el absolutismo al liberalismo oligárquico, para pasar después a la dictadura y, finalmente, al sistema complejo de una democracia constitucional. La empresa periodística típica en España presenta, en este sentido, ciertas peculiaridades que la diferencian netamente de una iniciativa meramente mercantil. En la creación y sostenimiento de estas empresas influyen diversos factores ajenos al estricto lucro capitalista: elementos que pueden incluso sostenerla en régimen de déficit contable, porque es mucho más importante la influencia política que a través de esta empresa se consigue y compensa suficientemente, constituyendo una contrapartida eficaz para los desembolsos que ciertas personalidades, instituciones o grupos de interés y de presión hacen a fondo perdido, como manera de influir y condicionar a la opinión pública. Esto es lo que en este ensayo se denomina el negocio de la influencia, muchas veces intangible, pero siempre necesario para que individuos, medios, grupos de presión o partidos, puedan interactuar en la esfera pública. Se trata, en definitiva, de algo mucho más valioso que la cuenta de resultados de la empresa: la influencia política, económica y social, el manejo de la reputación, el prestigio y el buen nombre de

personas e instituciones.
