Applications Of Generalized Nets Krassimir T Atanasov, 1993-03-31 This book discusses some applications of Generalized Nets (GNs). They include the functioning and results of the work of expert systems, flexible manufacturing systems, neuron networks, computers, medical, transportational, chemical and other processes. Processes can be simulated, controlled and optimized on the basis of these GNs. A program package for GNs (PPGN) is described.

Public Priority Setting: Rules and Costs Peter B. Boorsma, Kees Aarts, Albert E. Steenge, 2012-12-06 At present we observe a decreasing role for the state in many areas where it used to be prominent. Amidst severe budgetary cuts, the state and its organs are confronted with ever louder calls for efficiency in public office ('value for money') and public performance. Simultaneously we see in many democratic welfare states the rise of new institutional forms and social organizations responding to new public priorities. Phenomena like privatization and de-regulation, new forms of regulation and self-regulation, and the rise of special issue groups are an expression of this. This book seeks to provide order in some of today's issues and to offer analysis and explanation for selected topics. The book opens with contributions on the importance of concepts of present-day institutional economics interpreting modern governmental behavior and organization. Subsequent chapters deal with new developments in various fields such as environmental management and conservation, political legitimacy, or the new roles for covenants. Audience: This volume will be of interest for scholars in the fields of public service, government studies and adjacent branches of economics, political science and law.

Principles of Highway Engineering and Traffic Analysis Fred L. Mannering, Scott S. Washburn, 2012-03-27 The 5th edition of the Mannering's Principles of Highway Engineering and Traffic Analysis continues to offer a concise approach that covers all the necessary fundamental concepts. New features in this edition include updates and more consistency with the latest edition of the Highway Capacity Manual (HCM); the inclusion of sample FE exam questions, call-out of common mistakes; and added coverage on a qualitative description of the mechanistic approach.

**Ambient Communications and Computer Systems** Yu-Chen Hu, Shailesh Tiwari, Munesh C. Trivedi, K. K. Mishra, 2020-03-13 This book features high-quality, peer-reviewed papers from the International Conference on Recent Advancement in Computer, Communication and Computational Sciences (RACCCS 2019), held at Aryabhatta College of Engineering & Research Center, Ajmer, India, on August 16–17, 2019. Presenting the latest developments and technical solutions

in computational sciences, it covers a variety of topics, such as intelligent hardware and software design, advanced communications, intelligent computing technologies, advanced software engineering, the web and informatics, and intelligent image processing. As such it helps those in the computer industry and academia to use the advances in next-generation communication and computational technology to shape real-world applications.

Innovative Priority Mechanisms in Service Operations Shiliang Cui,Zhongbin Wang,Luyi Yang,2023-06-23 This book introduces the most advanced and recent theoretical research on innovative priority mechanisms in service settings. It covers cutting-edge topics on service innovations such as line-sitting, service-position-trading, referral priority programs, queue-scalping, distance-based priority, and dynamic priority policy. It also contains a variety of practical examples and applications which help managers to make better decisions and to develop a coherent business strategy. This book appeals to a wide readership, from academics and Ph.D. students who are interested in priority mechanisms, to service managers and researchers in the service industry. This is an open access book.

**The mindsponge and BMF analytics for innovative thinking in social sciences and humanities** Quan-Hoang Vuong,Minh-Hoang Nguyen,Viet-Phuong La,2022-10-10 Academia is a competitive environment. Early Career Researchers (ECRs) are limited in experience and resources and especially need achievements to secure and expand their careers. To help with these issues, this book offers a new approach for conducting research using the combination of mindsponge innovative thinking and Bayesian analytics. This is not just another analytics book. 1. A new perspective on psychological processes: Mindsponge is a novel approach for examining the human mind's information processing mechanism. This conceptual framework is used to construct models in studies. The framework is highly flexible and widely applicable for many different types of information processes. The mindsponge approach can help researchers discover interesting ideas or even formulate their very own theories when investigating psychosocial phenomena. This approach brings a fresh wind to the current landscape of social sciences and humanities (SSH). 2. Easy-to-follow analysis protocol: The Bayesian Mindsponge Framework (BMF analytics) is useful in terms of computing and visualizing power but also easy to learn and apply. Contrary to being intimidating, the Bayesian analytics section of this book is presented in a reader-friendly manner with a detailed yet clear step-by-step procedure. Examples are from published BMF articles, allowing readers to immediately practice the method and quickly create their own applications. With educational purposes in mind, the book is very suitable for ECRs who are looking to innovate their research methods. 3. Advocating for low-cost, high-quality research: Doing science can be very costly. Mindsponge innovative thinking and BMF analytics help produce impactful studies using openly available data on online repositories. This is based on the authors' previous works and experiences. The book presents examples of employing the open R package bayesvl on secondary data from different sources. With less financial constraints, researchers can have more freedom of thought to pursue their curiosity and creativity. ECRs

in low- and middle-income countries may find this aspect crucial in their careers. 4. Support and collaboration: The authors share their insights from experiences in the academic publishing system to help readers get through the processes of manuscript writing and peer-reviewing more easily. The authors are also ready to support other researchers with further inquiries and collaboration opportunities at the following website, <https://mindsponge.info>. This book is for: a) ECRs whose only abundant resources are their innovation capacity and strength of will; b) Researchers in SSH who want to explore a novel approach to thinking and study conducting; c) Low- and middle-income countries' researchers looking for a cost-effective research protocol; and, d) Innovative thinkers who want to turn their interesting thoughts into good publications.

Get Your Travel On! Taryn White, 2016-06-15 Time or money should never be considered a barrier to pursuing travel dreams. With a little effort and planning, there are countless ways to see the world. Get Your Travel On! is a complete guide that shares advice, tools, and tips that will make travel easier for anyone ready to take a break from day-to-day stress and satisfy their wanderlust.

**Fundamentals of Decision Making and Priority Theory With the Analytic Hierarchy Process** Thomas L. Saaty, 2000 This book is a comprehensive summary, primarily of the author's own thinking and research, about the Analytic Hierarchy Process and decision making. It includes advanced mathematical theory and diverse applications. Fundamentals of Decision Making has all the latest theoretical developments in the AHP and new theoretical material not published elsewhere. We consider this book to be the replacement for the original book on the subject, The Analytic Hierarchy Process that was published by McGraw Hill Publishers, New York.

**An Introduction to Optimal Satellite Range Scheduling** Antonio Jose Vazquez Alvarez, Richard Scott Erwin, 2015-12-11 The satellite range scheduling (SRS) problem, an important operations research problem in the aerospace industry consisting of allocating tasks among satellites and Earth-bound objects, is examined in this book. SRS principles and solutions are applicable to many areas, including: Satellite communications, where tasks are communication intervals between sets of satellites and ground stations Earth observation, where tasks are observations of spots on the Earth by satellites Sensor scheduling, where tasks are observations of satellites by sensors on the Earth. This self-contained monograph begins with a structured compendium of the problem and moves on to explain the optimal approach to the solution, which includes aspects from graph theory, set theory, game theory and belief networks. This book is accessible to students, professionals and researchers in a variety of

fields, including: operations research, optimization, scheduling theory, dynamic programming and game theory. Taking account of the distributed, stochastic and dynamic variants of the problem, this book presents the optimal solution to the fixed interval SRS problem and how to migrate results into more complex cases. Reference algorithms and traditional algorithms for solving the scheduling problems are provided and compared with examples and simulations in practical scenarios.

AI and IoT Meet Mobile Machines: Towards a Smart Working Site Xiang, Yusheng, 2022-06-20 Infrastructure construction is society's cornerstone and economics' catalyst. Therefore, improving mobile machinery's efficiency and reducing their cost of use have enormous economic benefits in the vast and growing construction market. In this thesis, I envision a novel concept smart working site to increase productivity through fleet management from multiple aspects and with Artificial Intelligence (AI) and Internet of Things (IoT).
