Private Sector Entrepreneurship in Global Health Kathryn Mossman,Anita MaGahan,Will Mitchell,Onil Bhattacharyya,2019-07-24 Poor access to care in low- and middle-income countries due to high costs, geographic barriers, and a shortage of trained medical staff has motivated many organizations to rethink their model of health service delivery. Many of these new models are being developed by private sector actors, including non-profits, such as non-governmental organizations, and for-profits, such as social enterprises. By partnering extensively with public sector organizations, these non-state actors have enormous potential to scale innovation in global health. Understanding how these leading organizations operate and target hard-to-reach groups may yield key insights to sustainably improve health care for all. Private Sector Entrepreneurship in Global Health includes writings by management, medicine, and social science experts who have studied trends in private sector health care innovations over the last ten years. It provides a wide range of examples from many regions and health areas and outlines tools to assess the performance of innovative private sector health programs in low- and middle-income countries. The studies reported in this volume explore new marketing and finance models, digital health innovations, and unique organizational processes emerging from the private sector to serve those most in need. Drawing on the analysis of over one thousand organizations engaged in health market innovations, this volume is a valuable resource for researchers and students in management, global health, medicine, development studies, health economics, and anthropology, as well as program managers, social impact investors, funders, and policymakers interested in understanding approaches emerging from the private sector in health care.

Private Antitrust Litigation Bernardine Adkins,Samuel Beighton,2012 Sentencing Referencer 2013 provides clear and practical guidance on over 100 sentencing topics laid out in an easy to navigate A-Z format. This is an invaluable tool to be used both in court and in the office and is the first port of call when seeking basic sentencing guidance. It takes the reader through each sentencing topic, the topics are laid out in alphabetical order, and legislation most applicable to the case is highlighted, followed by advice and the procedures to follow in court.

The Research Anthology on Business Law, Policy, and Social Responsibility is a comprehensive addition to any institution's collection, addressing the diverse needs of those exploring the landscape of business law and policy.

Connecting Families Carman Neustaedter,Steve Harrison,Abigail Sellen,2012-08-28 New technologies are radically changing the way that families connect with one another: we can text our teenagers from work, eat dinner with far-away parents via video link, and instantly upload and share photos after a family day out. Whether we are bridging time or distance, and whether we are enhancing our closest relationships or strengthening the bonds of extended family, as computer technologies alter the communication landscape, they in turn are changing the way we conduct and experience family life. This state of the art volume explores the impact of new communication systems on how families interact – how they share their lives and routines,

engage in social touch, and negotiate being together or being apart – by considering a range of different family relationships that shape the nature of communication. Composed of three sections, the first looks at what is often the core of a 'family', the couple, to understand the impact of technology on couple relationships, communication, and feelings of closeness. The second section studies immediate families that have expanded beyond just the individual or couple to include children. Here, the emphasis is on connection for communication, coordination, and play. The third section moves beyond the immediate family to explore connections between extended, distributed family members. This includes connections between adult children and their parents, grandparents and grandchildren, and adult siblings. Here family members have grown older, moved away from 'home', and forged new families. Researchers, designers and developers of new communication technologies will find this volume invaluable. Connecting Families: The Impact of New Communication Technologies on Domestic Life brings together the most up-to-date studies to help in understanding how new communication technologies shape – and are shaped by – family life, and offers inspiration and guidance for design by making clear what families need and value from technological systems.

Advances in Experimental Political Science James N. Druckman,Donald P. Green,2021-04-01 Experimental political science has changed. In two short decades, it evolved from an emergent method to an accepted method to a primary method. The challenge now is to ensure that experimentalists design sound studies and implement them in ways that illuminate cause and effect. Ethical boundaries must also be respected, results interpreted in a transparent manner, and data and research materials must be shared to ensure others can build on what has been learned. This book explores the application of new designs; the introduction of novel data sources, measurement approaches, and statistical methods; the use of experiments in more substantive domains; and discipline-wide discussions about the robustness, generalizability, and ethics of experiments in political science. By exploring these novel opportunities while also highlighting the concomitant challenges, this volume enables scholars and practitioners to conduct high-quality experiments that will make key contributions to knowledge.

New Perspectives on Emotions in Finance Jocelyn Pixley,2012-12-12 The financial crisis that started in 2007 is a concern for the world. Some countries are in depression and governments are desperately trying to find solutions. In the absence of thorough debate on the emotions of money, bitter disputes, hatred and 'moralizing' can be misunderstood. New Perspectives on Emotions in Finance carefully considers emotions often left unacknowledged, in order to explain the socially useful versus de-civilising, destructive, nature of money. This book offers an understanding of money that includes the possible civilising sentiments. This interdisciplinary volume examines what is seemingly an uncontrollable, fragile world of finance and explains the 'panics' of traders and 'immoral panics' in banking, 'confidence' of government and commercial decision makers, 'shame' or 'cynicism' of investors and asymmetries of 'impersonal trust' between finance corporations and their many publics. Money is shown to rely on this abstract trust or 'faith', but such motivations are in crisis with 'angry' conflicts over the 'power of disposition'. Restraining influences – on 'uncivilised emotions' and rule breaking – need democratic consensus, due to enduring national differences in economic 'sentiments' even in ostensibly similar countries. Promising ideas for global reform are assessed from these cautionary interpretations. Instead of one 'correct' vision, sociologists in this book argue that corporations and global dependencies are driven by fears and normless sentiments which foster betrayal. This book is not about individuals, but

habitus and market crudities. Human 'nature' or 'greed' cannot describe banks, which do not 'feel' because their motivations are not from personal psyches but organisational pressures, and are liable to switch under money's inevitable uncertainties. This more inclusive social science studies emotions as a crucial factor among others, to expand the informed public debate among policy makers, bankers, academics, students and the public.

eHealth Applications Seth M. Noar,Nancy Grant Harrington,2012-05-22 eHealth Applications: Promising Strategies for Behavior Change provides an overview of technological applications in contemporary health communication research, exploring the history and current uses of eHealth applications in disease prevention and management. This volume focuses on the use of these technology-based interventions for public health promotion and explores the rapid growth of an innovative interdisciplinary field. The chapters in this work discuss key eHealth applications by presenting research examining a variety of technology-based applications. Authors Seth M. Noar and Nancy Grant Harrington summarize the latest in eHealth research, including a range of computer, Internet, and mobile applications, and offer observations and reflections on this growing area, such as dissemination of programs and future directions for the study of interactive health communication and eHealth. Providing a timely and comprehensive review of current tools for health communication, eHealth Applications is a must-read for scholars, students, and researchers in health communication, public health, and health education.

Programming Salesforce Marketing Cloud ZHONGCHEN ZHOU,2019-04-03 This book introduces concepts to integrate with marketing cloud using API and build custom components in a platform agnostic way, including the following aspects: Marketing Cloud Package Custom Journey Builder Activity API Integration (Server to Server & Web App) Custom Marketing Cloud App Server Side JavaScript These concepts will be applicable to any programming language and platform. Global Health Leadership Mellissa Withers,Judith McCool,2018-12-07 This timely book serves as an overview of the challenges in global health leadership from multiple perspectives, bringing together an interdisciplinary group of academics, researchers, and leaders from around the world who are conducting innovative and high-quality research in the field of global health (GH). The book helps illustrate theoretical and conceptual ideas of leadership using recent examples of GH challenges from the Asia-Pacific region. Leadership is an important element of education and training in GH. Leadership can be demonstrated by many sectors, including local and national government, intergovernmental and non-governmental organizations, multilateral organizations, civil society, and private individuals and corporations. The cases included in this book provide an analysis of the major components to successful efforts in GH, including cooperation, cultural competency, vision, and community ownership. Given that GH practice is typically conducted in team settings with members from various backgrounds, this book provides students, faculty, and professionals in public health and related fields with an opportunity to examine multiple examples of leadership in different contexts. Readers learn how leaders have overcome challenges faced in the operationalization of complex health interventions, foreign policy, and working with key stakeholders and organizations. This book aims to help students to: Identify key trends and issues working in GH contexts; Analyze situations in GH and explain the ways public health, health care, and other organizations can work together or individually to affect the health of a community; Recognize the ways that diversity influences policies, programs, services, and the health of a community; Support diverse perspectives in developing, implementing, and evaluating policies, programs, and services that affect the health of a community; Identify characteristics of GH leaders; Learn about ways to identify and measure success in leadership; and Understand the challenges and barriers faced in GH programs and how to overcome those.

Information Technologies and Economic Development in Latin America Alberto Chong,Mónica Yáñez-Pagans,2020-02-29 Information Technologies and Economic Development in Latin America provides a collection of rigorous empirical studies that contributes to a better understanding of the role and impact of old and new information technologies on Latin American economic development. It provides evidence using randomized and quasi-experimental designed studies for different information and communication technologies interventions. In evaluating their development impact a critical concern has been to contribute to the little existing evidence. In fact, whereas many ICT projects in the developing world have been promoted by multilateral organizations, bilateral aid agencies and nongovernmental organizations in recent years, the extent to which these interventions and policies actually contribute to the development of the region is unclear. The book provides evidence on what works and what does not.
