Visualizing Digital Discourse Crispin Thurlow, Christa Dürscheid, Federica Diémoz, 2020-02-10 The first dedicated volume of its kind, Visualizing Digital Discourse brings together sociolinguists and discourse analysts examining the role of visual communication in digital media. The volume showcases work from leading, established and emerging scholars from across Europe, covering a diverse range of digital media platforms such as messaging, video-chat, gaming and wikis; visual modalities such as emojis, video and layout; methodologies like discourse analysis, ethnography and conversation analysis; as well as data from different languages. With an opening chapter by Rodney Jones, the volume is organized into three parts: Besides Words and Writing, The Social Life of Images, and Designing Multimodal Texts. From the perspective of these broad domains, chapters tackle some of the major ideological, interactional and institutional implications of visuality for digital discourse studies. The first part, beginning with a co-authored chapter by Crispin Thurlow, focuses on micro-level visual practices and their macro-level framing – all with particular regard for emojis. The second part, beginning with a chapter from Sirpa Leppänen, examines the ways visual resources are used for managing personal relations, and the wider cultural politics of visual representation in these practices. The third part, beginning with a chapter by Hartmut Stöckl, considers organizational contexts where users deploy visual resources for more transactional, often commercial ends.

Email, SMS, MMS Carmen Frehner, 2008 Are email and SMS forms of writing or speech? This question cannot be answered easily because their registers are hybrid; they make use of both orality and literacy. This book offers an accurate placement of emails and text messages along the written/spoken continuum. Emails and text messages are also compared to letters and phone calls while a closer comparison of SMS and telegrams shows how far text messaging can be regarded as a renaissance of telegrams. Attention is further paid to multimedia messaging and questions concerning the proportion of image to text, picture categories as well as MMS dialogues are approached. The book finally comments on linguistic changes and deals with the German language community's concern with regard to the increasing use of Anglicisms.

The many attack samples present the severity of this problem, while the delivered methodologies and countermeasures show how to build a truly secure mobile computing environment.

Reset Ronald J. Deibert, 2020-09-29 In the 2020 CBC Massey Lectures, bestselling author and renowned technology and security expert Ronald J. Deibert exposes the disturbing influence and impact of the internet on politics, the economy, the environment, and humanity. Digital technologies have given rise to a new machine-based civilization that is increasingly linked to a growing number of social and political maladies. Accountability is weak and insecurity is endemic, creating disturbing opportunities for exploitation. Drawing from the cutting-edge research of the Citizen Lab, the world-renowned digital security research group which he founded and directs, Ronald J. Deibert exposes the impacts of this communications ecosystem on civil society. He tracks a mostly unregulated surveillance industry, innovations in technologies of remote control, superpower policing practices, dark PR firms, and highly profitable hack-for-hire services feeding off rivers of poorly secured personal data. Deibert also unearths how dependence on social media and its expanding universe of consumer electronics creates immense pressure on the natural environment. In order to combat authoritarian practices, environmental degradation, and rampant electronic consumerism, he urges restraints on tech platforms and governments to reclaim the internet for civil society.

Data Science and Big Data Computing Zaigham Mahmood, 2016-07-05 This illuminating text/reference surveys the state of the art in data science, and provides practical guidance on big data analytics. Expert perspectives are provided by authoritative researchers and practitioners from around the world, discussing research developments and emerging trends, presenting case studies on helpful frameworks and innovative methodologies, and suggesting best practices for efficient and effective data analytics. Features: reviews a framework for fast data applications, a technique for complex event processing, and agglomerative approaches for the partitioning of networks; introduces a unified approach to data modeling and management, and a distributed computing perspective on interfacing physical and cyber worlds; presents techniques for machine learning for big data, and identifying duplicate records in data repositories; examines enabling technologies and tools for data mining; proposes frameworks for data extraction, and adaptive decision making and social media analysis.

Time of the Octopus Anatoly Kucherena, 2018-01-01 A frightening, prophetic vision of our world... In Moscow's Sheremetyevo airport, fugitive US intelligence officer Joshua Kold is held in limbo, unable to leave the airport's transit area. He is on the run, after blowing the lid off the terrifying reach of covert American global surveillance operations. Will the Russian authorities grant him asylum, or will they hand him over the clutches of the global octopus eager for revenge for his betrayal? As this gripping psychological and political thriller unfolds, a Moscow lawyer takes Kold to a secret bunker and grills him intently on just why he did it. Upon Kold's answers hang not only his own fate, but much, much more as the true extent of this chilling 1984 world unfolds. Anatoly Kucherena is the famous Russian lawyer who took on the case of the American whistleblower Edward Snowden whose revelations about US intelligence operations sent shockwaves around the world in 2013. Time of the Octopus is a fiction, but it is based on Kucherena's own interviews with Snowden at Sheremetyevo, and provides the basis for Oliver Stone's major Hollywood movie 'Snowden' starring Joseph Gordon-Levitt, one of the movie events of 2016. According to Stone, Anatoly has written a 'grand inquisitor'-style Russian novel weighing the soul of his fictional whistleblower against the gravity of a 1984 tyranny that has achieved global proportions. His meditations on the meaning of totalitarian power in the 21st century make for a chilling, prescient horror story." Is Kold simply a traitor, or the courageous hero of a terrifying struggle against the dark forces of oppression? Translated by John Farndon with Akbota Sultanbekova and Olga Nakston.

It introduces typ

m-Profits Tomi T. Ahonen, 2004-04-02 UMTS as a technology allows for exciting new applications of some of the best ideas of services in the fixed telecoms, cellular/mobile telecoms, and internet environments, with many revolutionary new possibilities which simply do not exist in the current media and communications vehicles. The current worldwide interest in UMTS/3G is driven partly by the imminent roll-out of the new infrastructure during 2002/3. The general consensus in the telecoms industry is that that services will be driving this new UMTS/3G industry, and with no historical reference points, a large worldwide demand exists for this type of book. 'm-Profits: Making Money from 3G Services' will discuss 3G services from the view of what is needed for the service to provide value to the user, which technical features of the 3G network will be used, what is the value proposition for the user, how will money be made out of delivering the service, and discussions on how revenue sharing propositions might work to benefit content providers and network operators. * Addresses subject from the viewpoints of network operator, virtual operator, service provider, content provider, and end-user * Explains how will money be made out of delivering 3G services * Covers the key issues of 'revenue sharing' and competition * Includes 12 service vignettes Essential reading for mobile operators dealing with marketing, product development, 3G people, content providers, business Development, mobile Services people, consultants, bankers and media professionals.

Classification Methods for Internet Applications Martin Holeňa, Petr Pulc, Martin Kopp, 2020-01-29 This book explores internet applications in which a crucial role is played by classification, such as spam filtering, recommender systems, malware detection, intrusion detection and sentiment analysis. It explains how such classification problems can be solved using various statistical and machine learning methods, including K nearest neighbours, Bayesian classifiers, the logit method, discriminant analysis, several kinds of artificial neural networks, support vector machines, classification trees and other kinds of rule-based methods, as well as random forests and other kinds of classifier ensembles. The book covers a wide range of available classification methods and their variants, not only those that have already been used in the considered kinds of applications, but also those that have the potential to be used in them in the future. The book is a valuable resource for post-graduate students and professionals alike.

Disruptive Technology and Digital Transformation for Business and Government Sandhu, Kamaljeet, 2021-05-07 With the far-reaching global impact of the COVID-19 pandemic, the demand and the necessity for digital enterprise transformation have accelerated exponentially. Management and strategies for the adoption and wider usage of newer digital technologies for the transformation of an enterprise through digital tools such as real-time video communications have shown that people no longer need to be required to be physically present in the same place; rather, they can be geographically dispersed. Technologies such as artificial intelligence, cloud computing, digital banking, and cloud data have taken over tasks that were initially done by human hands and have increased both the automation and efficiency of tasks and the accessibility of information and services. Inclusion of all these newer technologies has shown the fast pace at which the digital enterprise transformation is rapidly evolving and how new ecosystems are reshaping the digital enterprise model. Disruptive Technology and Digital Transformation for Business and Government presents interesting research on digital enterprise transformation at different stages and across different settings within government and industry, along with key issues and deeper insights on the core problems and developing solutions and recommendations for digital enterprise transformation. The chapters examine the three core leaders of transformation: the people such as managers, employees, and customers; the digital technology such as artificial intelligence and robotics; and the digital enterprise, including the products and services being transformed. They unravel the underlying process for management and strategies to fully incorporate new digital tools and technologies across all aspects of an enterprise undergoing transformation. This book is ideally intended for managers, executives, IT consultants, business professionals, government officials, researchers, students, practitioners, stakeholders, academicians, and anyone else looking to learn about new developments in digital enterprise transformation of business systems from a global perspective.

Living Forever Hussein Bassir, 2019-09-03 Self-presentation is the oldest and most common component of ancient Egyptian high culture. It arose in the context of private tomb records, where the character and role of an individual—invariably a well-to-do non-royal elite official or administrator—were presented purposefully: published by inscription and image, to a contemporary audience and to posterity. Living Forever: Self-presentation in Ancient Egypt looks at how and why non-royal elites in ancient Egypt represented themselves, through language and art, on monuments, tombs, stelae, and statues, and in literary texts, from the Early Dynastic Period to the Thirtieth Dynasty. Bringing together essays by international Egyptologists and archaeologists from a range of backgrounds, the chapters in this volume offer fresh insight into the form, content, and purpose of ancient Egyptian presentations of the self. Applying different approaches and disciplines, they explore how these self-representations, which encapsulated a discourse with gods and men alike, yield rich historical and sociological information, provide examples of ancient rhetorical devices and repertoire, and shed light on notions of the self and collective memory in ancient Egypt.
