XtremeDigitalPhotography - Panorama Camera Design John Galuszka,2013-02-20 In order to get the highest quality photographs, you need to combine the best of film with the best of digital. This book uses step-by-step illustrated instructions to guide you in building a variety of panorama film cameras. We have two designs for the 6X12 format, a 6X18 format camera with a Super-Angulon lens, and a 6X36 monster which will give you the equivalent to THREE HUNDRED MEGAPIXEL images! We also show you how to convert a 120 roll film camera to 35mm film and how to adapt view camera lenses to Mamiya Press cameras. Once you get your film image, we show you how to convert it to digital so that you can minipulate and/or corredt the image in the computer. No darkroom work is needed. No machine shop work will be required to build the cameras, but you will need to be a competent mechanic, familiar with cutting metal, reading a micrometer, etc. The results will be worth the effort because you will end up with a camera capable of shooting museum-quality work. ===== BONUS ===== When you buy this paperback, you also get a FREE copy of the eBook version with color illustrations. Information and the password to download the eBook is in the back of the paperbook.
