Advanced Programming in the UNIX Environment W. Richard Stevens, Stephen A. Rago, 2013-06-10 For more than twenty years, serious C programmers have relied on one book for practical, in-depth knowledge of the programming interfaces that drive the UNIX and Linux kernels: W. Richard Stevens' *Advanced Programming in the UNIX® Environment*. Now, once again, Rich's colleague Steve Rago has thoroughly updated this classic work. The new third edition supports today's leading platforms, reflects new technical advances and best practices, and aligns with Version 4 of the Single UNIX Specification. Steve carefully retains the spirit and approach that have made this book so valuable. Building on Rich's pioneering work, he begins with files, directories, and processes, carefully laying the groundwork for more advanced techniques, such as signal handling and terminal I/O. He also thoroughly covers threads and multithreaded programming, and socket-based IPC. This edition covers more than seventy new interfaces, including POSIX asynchronous I/O, spin locks, barriers, and POSIX semaphores. Most obsolete interfaces have been removed, except for a few that are ubiquitous. Nearly all examples have been tested on four modern platforms: Solaris 10, Mac OS X version 10.6.8 (Darwin 10.8.0), FreeBSD 8.0, and Ubuntu version 12.04 (based on Linux 3.2). As in previous editions, you'll learn through examples, including more than ten thousand lines of downloadable, ISO C source code. More than four hundred system calls and functions are demonstrated with concise, complete programs that clearly illustrate their usage, arguments, and return values. To tie together what you've learned, the book presents several chapter-length case studies, each reflecting contemporary environments. *Advanced Programming in the UNIX® Environment* has helped generations of programmers write code with exceptional power, performance, and reliability. Now updated for today's systems, this third edition will be even more valuable.

New Frontiers of Philanthropy Lester M. Salamon, 2014-06-13 The resources of both governments and traditional philanthropy are either barely growing or in decline, yet the problems of poverty, ill-health, and environmental degradation balloon daily. It is therefore

increasingly clear that we urgently need new models for financing and promoting social and environmental objectives. Fortunately, a significant revolution appears to be underway on the frontiers of philanthropy and social investing, tapping not only philanthropy, but also private investment capital, and providing at least a partial response to this dilemma. This book examines the new actors and new tools that form the heart of this revolution, and shows how they are reshaping the way we go about supporting solutions to social and environmental problems throughout the world. With contributions from leading experts in the field, *New Frontiers of Philanthropy* provides a comprehensive analysis of the many new institutions that have surfaced on this new frontier of philanthropy and social investment; the new tools and instruments these institutions are bringing to bear; the challenges that these actors and tools still encounter; and the steps that are needed to maximize their impact. The result is a powerful and accessible guide to developments that are already bringing significant new resources into efforts to solve the world's problems of poverty, ill-health, and environmental degradation; unleashing new energies and new sources of ingenuity for social and environmental problem-solving; and generating new hope in an otherwise dismal scenario of lagging resources and resolve. Investors, philanthropists, social entrepreneurs, nonprofit leaders, business executives, government officials, and students the world over will find much to build on in these pages.

Murphy, 2001-08-08 In a world where there is increasing choice for just about every kind of product and service, winning and holding the best customers is key to the success of any business. Customer Relationship Management, or CRM, is a concept that senior managers in any kind of business ignore at their peril. At its heart is the successful management of customer retention by being customer-focused as an organization. The concept is not rocket science, but its implementation is more of a challenge. It involves a fundamental change within the organization. In this book, John Murphy introduces *The Lifebelt* - quite literally an aid to keeping afloat in this pressured environment. The Lifebelt is a framework that offers a practical way forward to integrating and mobilizing the entire organization toward a holistic CRM programme. The proprietary framework features six key factors identified as being essential for consistent delivery of service: customer focus, processes, employee involvement, training, measurement, and continuous improvement. John Murphy outlines how each of the factors should be owned by an appropriate member of the top management team. When this framework is systematically and effectively implemented and managed it will considerably enhance the customer retention capacity of the company. The logic of the framework applies to virtually all industries internationally. Managers and marketers across the board will find this book one of the most practical guides to retaining customers published to date.

Summary of Anthony Iannarino's The Lost Art of Closing Everest

Media, 2022-04-26T22:59:00Z Please note: This is a companion version & not the original book. Sample Book Insights: #1 A philosophy is important for selling effectively. It should guide how you sell, not just what you sell. It should be in line with what you believe, and live your beliefs. #2 Caveat venditor is a more appropriate philosophy today, as it encourages buyers to protect themselves from merchants. It implies that buyers are responsible for protecting themselves from merchants. #3 Confidence in yourself and what you're selling comes from the belief that you can make a difference for your clients. It allows you to ask for the commitment to take the next step. It comes from the belief that you can and will deliver the outcomes your clients need. #4 Caring is the root of trust, and trust is the foundation of all relationships, including commercial ones. When you care about helping other people generate the results they can't generate on their own, your outward focus becomes part of what creates a preference and makes you easier to buy from.
