ISCONTOUR 2013 Roman Egger,Christian Maurer,2013 This are the proceedings of ISCONTOUR 2013 - the first International Student Conference in Tourism Research, which was held at the Salzburg University of Applied Sciences on the 15th of April 2013.

Traffic Paul Josephson,2017-03-09 Object Lessons is a series of short, beautifully designed books about the hidden lives of ordinary things. Speed. Bump. Speed. Traffic considers the history and philosophy of roundabouts, speed bumps, the pedestrian mall, and other efforts to manage traffic. Exploring ways to reign in the power of the internal combustion engine, ramp back century-long efforts to increase the flows of traffic, and establish greater balance between humans and machines, Paul Josephson considers the history of traffic, and the political and other controversies that frame the belated technological efforts to calm it. Object Lessons is published in partnership with an essay series in The Atlantic.

Putin's Russia and the Falsification of History Anton Weiss-Wendt,2020-09-03 This book provides a bold examination of the political use of history in contemporary Russia. Anton Weiss-Wendt argues that history is yet another discipline misappropriated by the Kremlin for the purpose of rallying the population. He explains how, since the pro-democracy protests in 2011–12, the Russian government has hamstrung independent research and aligned state institutions in the promotion of militant patriotism. The entire state machinery has been mobilized to construe a single, glorious historical narrative with the focus on Soviet victory over Nazi Germany. Putin's Russia and the Falsification of History examines the intricate networks in Russia that engage in "historymaking." Whether it is the Holocaust or Soviet mass terror, Tsars or Stalin, the regime promotes a syncretic interpretation of Russian history that supports the notion of a strong state and authoritarian rule. That interpretation finds its way into new monuments, exhibitions, and quasi-professional associations. In addition to administrative measures of control, the Russian state has been using the penal code to censor critical perspectives on history, typically advanced by individuals who also happen to call for a political change in Russia. This powerful book shows how history is increasingly becoming an element of political technology in Russia, with the systematic destruction of independent institutions setting the very future of History as an academic discipline in Russia in doubt.

The Human Condition in Hilary of Poitiers Isabella Image,2017-08-04 While he is more commonly known for his Trinitarian works and theology, this study assesses mid-fourth-century bishop Hilary of Poitiers' view of the human condition. Isabella Image shows that the Commentary on Psalm 118 is more closely related to Origen's than previously thought. Image explains how his articulations of sin, body and soul, the Fall and the will all parallel or echo Origen's views in this work, but not necessarily in his Matthew Commentary. Hilary has a doctrine of original sin ('sins of our origin', peccata originis), which differs from the individual personal sins and for

which we are individually accountable. He also articulates a fallen will which is in thrall to disobedience and needs God's help, something God always gives as long as we show the initiative. Hilary's idea of the fallen will may have developed in tangent with Origen's thought, which uses Stoic ideas on the process of human action in order to articulate the constraints on purely rational responses. Hilary in turn influences Augustine, who writes against the Pelagian bishop Julian of Eclanum citing Hilary as an example of an earlier writer with original sin. Since Hilary is known to have used Origen's work, and Augustine is known to have used Hilary's, Hilary appears to be one of the stepping-stones between these two great giants of the early church as the doctrines of original sin and the fallen will developed. The Human Condition in Hilary of Poitiers not only identifies Hilary's anthropological thought, but also places it in the current of theological development of the fourth century. It considers reception of Origen in the mid-fourth century, before the criticisms of Epiphanius and the debates in the Egyptian monastic communities. This work also contributes to understanding of the tradition from which Augustine received his doctrine of original sin.

Russia's New Ground Forces Igor Sutyagin, Justin Bronk, 2017-12-22 This Whitehall Paper provides an in-depth analysis of Russia's Ground Forces, including airborne and naval troops. It examines their role in Russian foreign policy, reforms to units' equipment and operational roles, performance during combat operations against Ukraine, and current unit deployment locations and purposes in the Central, Southern and Western Military Districts. Russia perceives itself as operating from a position of weakness and surrounded by superior NATO forces. It is pursuing a programme of military reform, both in terms of equipment and structures. The Russian Ground Forces are being geared towards fighting in aggressive, short, sharp and complex operations into enemy territory, as well as being streamlined to increase readiness levels and deployability at short notice. However, operations against Ukraine have required force generation efforts from almost every Russian Ground Forces formation, including those in the Far East, which is evidence that the Kremlin's ability to sustain even a moderate tempo of operations in the medium term is limited. Furthermore, chronic undermanning and morale issues remain, which will be exacerbated by the political decision to re-establish division-scale formations. In addition, Western sanctions and Russia's difficult economic situation are severely hampering efforts to extend equipment reforms across the whole force. Russian Ground Forces should not be seen by the West as an unstoppable colossus. However, the West must not ignore the unmistakable Russian efforts to prepare for offensive, high-tempo operations against NATO, and the formidable political will that will use them if given the opportunity.

Key Features: Provides a comprehensive reference work on the formulation and manufacturing of parenteral dosage forms Addresses changes in the science and advances in the technology associated with parenteral medications and routes of administration Includes 13 new chapters and updated chapters throughout Contains the contributors of leading researchers in the field of parenteral medications Uses full color detailed illustrations, enhancing the learning process The fourth edition not only reflects enhanced content in all the chapters but also highlights the rapidly advancing formulation, processing, manufacturing parenteral technology including advanced delivery and cell therapies. The book is divided into seven sections: Section 1 - Parenteral Drug Administration and Delivery Devices; Section 2 - Formulation Design and Development; Section 3 - Specialized Drug Delivery Systems; Section 4 - Primary Packaging and Container Closure Integrity; Section 5 - Facility Design and Environmental Control; Section 6 - Sterilization and Pharmaceutical Processing; Section 7 - Quality Testing and Regulatory Requirements

Framing Mary Amy Singleton Adams, Vera Shevzov, 2018-04-24 Despite the continued fascination with the Virgin Mary in modern and contemporary times, very little of the resulting scholarship on this topic extends to Russia. Russia's Mary, however, who is virtually unknown in the West, has long played a formative role in Russian society and culture. *Framing Mary* introduces readers to the cultural life of Mary from the seventeenth century to the post-Soviet era. It examines a broad spectrum of engagements among a variety of people—pilgrims and poets, clergy and laity, politicians and political activists—and the woman they knew as the Bogoroditsa. In this collection of well-integrated and illuminating essays, leading scholars of imperial, Soviet, and post-Soviet Russia trace Mary's irrepressible pull and inexhaustible promise from multiple disciplinary perspectives. Focusing in particular on the ways in which both visual and narrative images of Mary frame perceptions of Russian and Soviet space and inform discourse about women and motherhood, these essays explore Mary's rich and complex role in Russia's religion, philosophy, history, politics, literature, and art. *Framing Mary* will appeal to Russian studies scholars, historians, and general readers interested in religion and Russian culture.

Convergence Estimates in Approximation Theory Vijay Gupta, Ravi P.

Agarwal, 2014-01-08 The study of linear positive operators is an area of mathematical studies with significant relevance to studies of computer-aided geometric design, numerical analysis, and differential equations. This book focuses on the convergence of linear positive operators in real and complex domains. The theoretical aspects of these operators have been an active area

of research over the past few decades. In this volume, authors Gupta and Agarwal explore new and more efficient methods of applying this research to studies in Optimization and Analysis. The text will be of interest to upper-level students seeking an introduction to the field and to researchers developing innovative approaches.

Singing the Self Rachel S. Platonov, 2012-07-31 A study of the phenomenon of guitar poetry, a type of acoustic protest music that flourished in the Soviet Union between the post-Stalinist and Gorbachev years.

After the Gulag Tyler C. Kirk, 2023 From 1929 to 1958, hundreds of thousands of prisoners and exiles from across the Soviet Union were sent to the harsh yet resource-rich Komi Republic. When the Soviet Union collapsed, former prisoners sent their autobiographies to Komi's local branches of the anti-Stalinist Memorial Society and history museums. Utilizing these previously unavailable personal records, alongside newspapers, photographs, interviews, and other non-state archival sources, *After the Gulag* sheds new light not only on how former prisoners experienced life after release but also how they laid the foundations for the future commemoration of Komi's dark past. Bound by a camp brotherhood, they used informal social networks to provide mutual support amid state and societal oppression. Decades later, they sought rehabilitation with the help of the newly formed Memorial Society—the civic organization largely responsible for the de-Stalinization of the Soviet Union. In sharing their life stories and family archives with Memorial, they sustained an alternate history of the Soviet Union. Offering an unprecedented look at the legacies of mass repression under Stalin, *After the Gulag* explores how ordinary political prisoners from across the Soviet Union navigated life after release, using memoirs, letters, and art to translate their experiences and shape the politics of memory in post-Soviet Russia--

Sites of International Memory Glenda Sluga, Madeleine Herren, Kate Darian-Smith, 2023-09-12 Whether we think of statues, plaques, street-names, practices, material or intangible forms of remembrance, the language of collective memory is everywhere, installed in the name of not only nations, or even empires, but also an international past. The essays in *Sites of International Memory* address the notion of a shared past, and how this idea is promulgated through sites and commemorative gestures that create or promote cultural memory of such global issues as wars, genocide, and movements of cross-national trade and commerce, as well as resistance and revolution. In doing so, this edited collection asks: Where are the sites of international memory? What are the elements of such memories of international pasts, and of internationalism? How and why have we remembered or forgotten sites of international memory? Which elements of these international pasts are useful in the present? Some contributors address specific sites and moments--World War II, liberation movements in India and Ethiopia, commemorations of genocide--while other pieces concentrate more on the theoretical, on the idea of cultural memory. UNESCO's presence looms large in the volume, as it is the most visible and iconic international organization devoted to creating critical heritage studies on a world stage. Formed in the aftermath of World War II, UNESCO was instrumental in promoting the idea of a humanity that exists beyond national, regional, or cultural borders or definitions. Since then, UNESCO's diplomatic and institutional channels have become the sites at which competing notions of international, world, and human communities have jostled in conjunction with politically specific

understandings of cultural value and human rights. This volume has been assembled to investigate sites of international memory that commemorate a past when it was possible to imagine, identify, and invoke international ideas, institutions, and experiences, in diverse, historically situated contexts. Contributors: Dominique Biehl, Kristal Buckley, Roland Burke, Kate Darian-Smith, Sarah C. Dunstan, David Goodman, Madeleine Herren, Philippa Hetherington, Rohan Howitt, Alanna O'Malley, Eric Paglia, Glenda Sluga, Sverker Sörlin, Carolien Stolte, Beatrice Wayne, Ralph Weber, Jay Winter.
