**Research Objects in their Technological Setting** Bernadette Bensau de Vincent,Sacha Loeve,Alfred Nordmann,Astrid Schwarz,2017-02-24 What kind of stuff is the world made of? What is the nature or substance of things? These are ontological questions, and they are usually answered with respect to the objects of science. The objects of technoscience tell a different story that concerns the power, promise and potential of things – not what they are but what they can be. Seventeen scholars from history and philosophy of science, epistemology, social anthropology, cultural studies and ethics each explore a research object in its technological setting, ranging from carbon to cardboard, from arctic ice cores to nuclear waste, from wetlands to GMO seeds, from fuel cells to the great Pacific garbage patch. Together they offer fascinating stories and novel analytic concepts, all the while opening up a space for reflecting on the specific character of technoscientific objects. With their promise of sustainable innovation and a technologically transformed future, these objects are highly charged with values and design expectations. By clarifying their mode of existence, we are learning to come to terms more generally with the furniture of the technoscientific world – where, for example, the 'dead matter' of classical physics is becoming the 'smart material' of emerging and converging technologies.

**Children's Voices: Studies of interethnic conflict and violence in European schools** Mateja Sedmak,Zorana Medarić,Sarah Walker,2014-05-09 How are the processes of increasing ethnic and racial diversity reflected in European schools? How do children and educators experience and perceive interethnic relations in schools? This book examines the issues of interethnic coexistence, the management of ethnic diversity, xenophobic and racial attitudes and, in particular, the under-researched topic of interethnic violence among children in the school environment. Drawing together qualitative and quantitative data across five European countries it offers an insight into the views, personal experiences and responses of children from different ethnic backgrounds to interethnic violence in European schools. International contributors from England, Slovenia, Cyprus, Italy and Austria come together to provide a comparative study of experiences of interethnic conflict and violence in primary and secondary school classrooms. Each chapter focuses on positive measures that can combat discrimination, providing examples of good practice as well as considering the position of the school in promoting citizenship in an increasingly global world. By examining the experiences and perspectives of children, educators and experts, the book provides up-to-date research findings in the field and suggests key mechanisms for addressing interethnic violence in schools. With support, schools can play a key role in alleviating interethnic tensions and combatting ethnocentrism through the implementation of strong policies, acting as 'protected spaces'. Children's Voices: Studies of interethnic conflict and violence in European schools is of international relevance both within Europe, and beyond, and will appeal to researchers, teachers and policy makers concerned with race equality in the classroom.

Innovation and Marketing in the Video Game Industry David Wesley,Gloria Barczak,2016-05-23 Video games have had a greater impact on our society than almost any other leisure activity. They not only consume a large portion of our free time, they influence cultural trends, drive microprocessor development, and help train pilots and soldiers. Now, with the Nintendo Wii and DS, they are helping people stay fit, facilitating rehabilitation, and creating new learning opportunities. Innovation has played a major role in the long term success of the video game industry, as software developers and hardware engineers attempt to design products that meet the needs of ever widening segments of the population. At the same time, companies with the most advanced products are often proving to be less successful than their competitors. Innovation and Marketing in the Video Game Industry identifies patterns that will help engineers, developers, and marketing executives to formulate better business strategies and successfully bring new products to market. Readers will also discover how some video game companies are challenging normal industry rules by using radical innovations to attract new customers. Finally, this revealing book sheds light on why some innovations have attracted legions of followers among populations that have never before been viewed as gamers, including parents and senior citizens and how video games have come to be used in a variety of socially beneficial ways. David Wesley and Gloria Barczak's comparison of product features, marketing strategies, and the supply chain will appeal to marketing professionals, business managers, and product design engineers in technology intensive industries, to government officials who are under increasing pressure to understand and regulate video games, and to anyone who wants to understand the inner workings of one of the most important industries to emerge in modern times. In addition, as video games become an ever more pervasive aspect of media entertainment, managers from companies of all stripes need to understand video gaming as a way to reach potential customers.
