Career Diplomacy Harry W. Kopp,2011-03-22 Career Diplomacy—now in its second edition—is an insider's guide that examines the foreign service as an institution, a profession, and a career. Harry W. Kopp and Charles A. Gillespie, both of whom had long and distinguished careers in the foreign service, provide a full and well-rounded picture of the organization, its place in history, its strengths and weaknesses, and its role in American foreign affairs. Based on their own experiences and through interviews with over 100 current and former foreign service officers and specialists, the authors lay out what to expect in a foreign service career, from the entrance exam through midcareer and into the senior service—how the service works on paper, and in practice. The second edition addresses major changes that have occurred since 2007: the controversial effort to build an expeditionary foreign service to lead the work of stabilization and reconstruction in fragile states; deepening cooperation with the U.S. military and the changing role of the service in Iraq and Afghanistan; the ongoing surge in foreign service recruitment and hiring at the Department of State and U.S. Agency for International Development; and the growing integration of USAID's budget and mission with those of the Department of State.

Democracy Under Siege? Timothy Hellwig,Yesola Kweon,Jack Vowles,2020-07-14 The Global Financial Crisis of 2008-2009 was catalyst for the most precipitous economic downturn in eight decades. This book examines how the GFC and ensuing Great Recession affected electoral politics in the world's developed democracies. The initial wave of research on the crisis concluded it did little to change the established relationships between voters, parties, and elections. Yet nearly a decade since the initial shock, the political landscape has changed in many ways, the extent to which has not been fully explained by existing studies. *Democracy Under Siege?* pushes against the received wisdom by advancing a framework for understanding citizen attitudes, preferences, and behaviour. It makes two central claims. First, while previous studies of the GFC tend to focus on an immediate impact of the crisis, Hellwig, Kweon, and Vowles argue that economic malaise has a long lasting impact. In addition to economic shock, the economic recovery has a significant impact on citizens' assessment of political elites. Second, the authors argue that unanticipated exogenous shocks like the GFC grants party elites an opening for political manoeuvre through public policy and rhetoric. As a result, political elites have a high degree of agency to shape public perceptions and behaviour. Political parties can strategically moderate citizens' economic uncertainty, mobilise/demobilise voters, and alter individuals' political preferences. By leveraging data from over 150,000 individuals across over 100 nationally-representative post-election surveys from the 1990s to 2017, this book shows how economic change during a tumultuous era affected economic perceptions, policy demands, political participation, and the vote. The Comparative Study of Electoral Systems (CSES) is a collaborative program of research among election study teams from around the world. Participating countries include a common module of survey questions in their post-election studies.

The resulting data are deposited along with voting, demographic, district, and macro variables. The studies are then merged into a single, free, public dataset for use in comparative study and cross-level analysis. The set of volumes in this series is based on these CSES modules, and the volumes address the key theoretical issues and empirical debates in the study of elections and representative democracy. Some of the volumes will be organized around the theoretical issues raised by a particular module, while others will be thematic in their focus. Taken together, these volumes will provide a rigorous and ongoing contribution to understanding the expansion and consolidation of democracy in the twenty-first century. Series editors: Hans-Dieter Klingemann and Ian McAllister.
