Gustave Le Bon

PSYCHOLOGIE des FOULES / Psychology of Crowds (Bilingual French-English Edition) Gustave Le Bon, 2017-05-08 Psychologie des foules - Psychology of Crowds (1895) Psychologie des foules est un livre de Gustave Le Bon paru en 1895. Il s'agit d'un ouvrage de référence concernant la psychologie sociale, dont les théories sont encore discutées aujourd'hui. Gustave Le Bon montre dans cet ouvrage que le comportement d'individus réunis n'est pas le même que lorsque les individus raisonnent de manière isolée -- il explique ainsi les comportements des foules. The Crowd: A Study of the Popular Mind (French: Psychologie des Foules; literally: Psychology of Crowds) is a book authored by Gustave Le Bon that was first published in 1895. In the book, Le Bon claims that there are several characteristics of crowd psychology: impulsiveness, irritability, incapacity to reason, the absence of judgement of the critical spirit, the exaggeration of sentiments, and others... Le Bon claimed that an individual immersed for some length of time in a crowd soon finds himself - either in consequence of magnetic influence given out by the crowd or from some other cause of which we are ignorant - in a special state, which much resembles the state of fascination in which the hypnotized individual finds himself in the hands of the hypnotizer. Table of contents : Introduction: The Era of the Crowds. Book I: The Mind of Crowds Chapter I: General Characteristics of Crowds -- Psychological Law of Their Mental Unity Chapter II: The Sentiments and Morality of Crowds Chapter III: The Ideas,

Reasoning Power, and Imagination of CrowdsChapter IV: A Religious Shape Assumed By All the Convictions of CrowdsBook II: The Opinions and Beliefs of CrowdsChapter I: Remote Factors of the Opinions and Beliefs of CrowdsChapter II: The Immediate Factors of the Opinions of CrowdsChapter III: The Leaders of Crowds and Their Means of PersuasionChapter IV: Limitations of the Variability of the Beliefs and Opinions of CrowdsBook III: The Classification and Description of the Different Kinds of CrowdsChapter I: The Classification of CrowdsChapter II: Crowds Termed Criminal CrowdsChapter III: Criminal JuriesChapter IV: Electoral CrowdsChapter V: Parliamentary AssembliesL''unit  mentale des foules :   Peu aptes au raisonnement, les foules sont au contraire tr s aptes   l''action  . Si Le Bon compare parfois les foules   des individus dont les facult s de r flexion seraient faibles, il ne les identifie pas comme de simples agr gats, ni comme des super-individus. Au contraire, une foule est une entit  psychologique particuli re, irr ductible aux individus qui la composent : c''est pourquoi il faut l''analyser comme telle. La foule, dans le sens o  l''emploie Le Bon, est distincte du simple agr gat d''individus.   Dans certaines circonstances donn es, et seulement dans ces circonstances, une agglom ration d''hommes poss de des caract res nouveaux fort diff rents de ceux des individus composant cette agglom ration. La personnalit  consciente s'' vanouit, les sentiments et les id es de toutes les unit s sont orient s dans une m me direction.   La distinction entre foule et agr gat n''est pas une question de nombre : des centaines

d'individus se trouvant au même endroit dans des buts différents (par exemple, des gens sur un marché, parmi lesquels on trouve des promeneurs, des acheteurs, des vendeurs, des agents de police, etc.) ne forment qu'un agrégat, alors que quelques individus, dans certaines circonstances, constituent une foule. Les foules sont régies par une loi d'unité mentale des foules. Elles ont en quelque sorte une âme, avec des passions et un fonctionnement organique comparable à celui de l'esprit humain. Dans le livre I, Le Bon examine les passions et le mode de représentation d'une foule ; dans le livre II, il examine les origines et les caractéristiques de ses croyances.

Psychologie Des Foules Gustave Le Bon, Otto Klineberg, 1895

Psychology of Crowds (annotated) Gustave le Bon, 2009-10-05 In this clear and vivid book, Gustave Le Bon throws light on the unconscious irrational workings of group thought and mass emotion as he places crowd ideology in opposition to free-thinking and independent minded individuals. He also shows how the behaviour of an individual changes when she/he is part of a crowd. Editing The original of this work, *La Psychologie des Foules*, was first translated anonymously into English possibly by a group of French students. Sparkling Books has corrected errors and anomalies in the original translation by reference to the Alcan edition. We have shortened a few passages but maintained the original footnotes and have added some footnotes of our own.

Crowds, Psychology, and Politics, 1871-1899 Jaap van Ginneken, 1992-07-31

Jaap van Ginneken's study explores the social and intellectual history of the emergence of crowd psychology in the late nineteenth century. Both the popular work of the French physician LeBon and his predecessors are shown to be influenced and closely connected with both the dramatic events and academic debates of their day.

The Crowd: A Study of the Popular Mind - Crowd Psychology Gustav Le Bon, 2018-08-28 Le Bon's superb and innovative study of crowd psychology is published here without abridgment. First appearing in the 1890s, Gustav Le Bon's account of the crowd is an important work of early psychology. In life, Le Bon was famous for mastering aspects of several scientific disciplines, forging progress in each. This is true with his investigations on crowd psychology compiled in this book. Le Bon first examines the mental characteristics of all crowds. Whether they possess moral constraints, can adopt ideas or reason out circumstances, or carry a religious undercurrent is investigated. The second part investigates the various beliefs and sentiments which can develop within a crowd. What opinions a crowd may form about aspects remote to it, and close to it, are discussed. All are impeccably and comprehensively categorized by Le Bon, who turns to each in detail. The book's final stages classify various different crowds. He discusses types of crowd defined as criminal - such as rioters and looters.

crowd psychology is published here without abridgment. First appearing in the 1890s, Gustav Le Bon's account of the crowd is an important work of early psychology. In life, Le Bon was famous for mastering aspects of several scientific disciplines, forging progress in each. This is true with his investigations on crowd and group psychology, which he compiled in this book. In this treatise, Le Bon identifies a number of common characteristics all crowds possess: The first part, Le Bon examines the mental characteristics of all crowds. Whether they possess moral constraints, can adopt ideas or reason out circumstances, or carry a potential of religious undercurrent is investigated. The second part investigates the various beliefs and sentiments which can develop within a crowd. What opinions a crowd may form about aspects remote to it, and close to it, are discussed. All are impeccably and comprehensively categorized by Le Bon, who turns to each in detail. The book's final stages classify various different crowds. He discusses types of crowd defined as criminal - such as rioters and looters, before turning to groups such as criminal juries, and the crowds present at political rallies and elections. Finally, the behavior of elected officials in crowded assembly rooms is also considered. While partly theoretical, Le Bon's examinations of The Crowd as an entity remains valuable in the modern day. He identified the impulsive behavior, irritability and poverty of reason present in a typical crowd, and characterized those within a crowd as being under a type of frenzied hypnosis.

The Crowd - Study of the Popular Mind Gustav Le Bon, 2014-09-23 The Crowd: A Study of the Popular Mind is a book authored by Gustave Le Bon that was first published in 1895. In the book, Le Bon claims that there are several characteristics of crowd psychology: impulsiveness, irritability, incapacity to reason, the absence of judgment of the critical spirit, the exaggeration of sentiments, and others.... The Crowd Gustave Le Bon, 2014-01 In this fascinating book, Gustave Le Bon examines the psychology of crowds. He posits that crowds have personalities, just like individuals, and that individuals change when part of a crowd. The most careful observations seem to prove that an individual immersed for some length of time in a crowd in action soon finds himself-either in consequence of the magnetic influence given out by the crowd, or from some other cause of which we are ignorant-in a special state, which much resembles the state of fascination in which the hypnotized individual finds himself in the hands of the hypnotizer. The activity of the brain being paralysed in the case of the hypnotized subject, the latter becomes the slave of all the unconscious activities of his spinal cord, which the hypnotizer directs at will. The

conscious personality has entirely vanished; will and discernment are lost. All feelings and thoughts are bent in the direction determined by the hypnotizer. This edition has been completely reset in fresh type.

The Mob Mentality Gustave Le Bon, 2022-05-17 This edition brings to you Le Bon's two most celebrated works, *The Crowd: A Study of the Popular Mind* and *The Psychology of Revolution*, which made a breakthrough in what is now known as crowd psychology. Le Bon theorised about a new entity, psychological crowd, which emerges from incorporating the assembled population not only forms a new body but also creates a collective unconsciousness. As a group of people gather together and coalesces to form a crowd, there is a magnetic influence given out by the crowd that transmutes every individual's behaviour until it becomes governed by the group mind. _x000D_ Gustave Le Bon was a French polymath whose areas of interest included anthropology, psychology, sociology, medicine, invention, and physics. Ignored or maligned by sections of the French academic and scientific establishment during his life due to his politically conservative and reactionary views, Le Bon was critical of democracy and socialism. Le Bon's works were influential to such disparate figures as Theodore Roosevelt and Benito Mussolini, Sigmund Freud and José Ortega y Gasset, Adolf Hitler and Vladimir Lenin.

The Crowd Gustave Le Bon, 2014-10-29 *The Crowd: A Study of the Popular Mind* by French social theorist Gustave Le Bon is a short treatise on the principles of large gatherings of people. As the disclaimer on the title page

notes, the ideas in Le Bon's book were popular at the time of the late 19th century but are no longer in vogue today. The reasons for this are obvious, as LeBon unpretentiously puts to fault all the rhetoric about democracy, equality, fraternity, and equality as being mere catchphrases that self-serving demagogues use to control the spirit of the masses. He cites the French Revolution and the demands of Socialism and Communism during his time. Le Bon outlines the way crowds tend to think (in vivid images illogically connected), how they reason (they don't for all practical purposes), how they express exaggerated emotion, how they are very quick to take action without coherent thought and of the general extreme-conservatism and intolerance of crowds. The individual who becomes part of a crowd tends to loose himself, and feels invincible as he is aware of the similarity of mind and purpose of all those surrounding him. Le Bon notes how individuals become unthinking entities of the Herd, and can be unconsciously made to do acts, which can either be of great criminality or heroism. The reasoning of the solitary individual is superior to that of a crowd which has no individuality. All are equal in a crowd where, for instance, a mathematician is caught up in the same spirit as a laborer and class and intelligence differences fall to the lowest common denominator. One advantage of crowds is that they can express the spirit of a class, caste, or race of a people better than the individual can, and that crowds are capable of great deeds such as victory in a war or the spread of a religion that would be beyond simply one person's effort.

Hitler, Mussolini in addition to Freud were familiar with LeBon's work, and it is readily apparent that their followers acted very similar to the behavior that LeBon describes.
