Migrating Through the Web Nicole Braida,2022-03-31 How to study a media object on the web that is at the same time a documentary, a reportage, and a game which combines both fiction and non-fiction elements? Nicole Braida digs into the discursive and material structures and infrastructures of serious games, text-adventures, newsgames, interactive maps, and data visualizations, in which refugees and migrants become the subject of humanitarian discourse. Although the goal is to arouse empathy towards migrants, these »interactive practices« distinguish who is vulnerable and who is not. It supports the idea of a »migratory crisis«, which, the author argues, is actually the symptom of a deeper crisis of the humanitarian system itself.

Teaching Music Improvisation with Technology Michael Fein,2017-02-03 Incorporating technology in music classrooms can take the mystery out of improvisation. What music technology does is establish a strong foundation for chord, scale, phrase, ear training, and listening exercises, creating a solid backdrop for student expression. As author and educator Mike Fein shows, technology is a valuable

tool that can be used effectively to supplement student practice time while also developing the skills necessary to become a proficient improviser. Complete with notated exercises, accompaniment tracks, and listening resources, this book gives teachers methods to set their students free to make mistakes and to develop their own ear for improvisation at their own pace. Broken down into significant areas of music technology, each chapter focuses on developing a new skill and guides readers to tangible outcomes with the assistance of hands-on activities that can be immediately implemented into the classroom. In addition to these hands-on activities, each chapter provides the reader with an iPad Connection to various iOS applications, which allows teachers and students another, albeit significantly less expensive, medium through which to learn, share, and create art. This book will appeal to music educators of students in grades K-12. It will serve collegiate music education courses secondarily, and will also appeal to those music educators who work with improvisation and technology.
