Racket Programming the Fun Way James. W. Stelly,2021-01-08 An introduction to the Racket functional programming language and DrRacket development environment to explore topics in mathematics (mostly recreational) and computer science. At last, a lively guided tour through all the features, functions, and applications of the Racket programming language. You'll learn a variety of coding paradigms, including iterative, object oriented, and logic programming; create interactive graphics, draw diagrams, and solve puzzles as you explore Racket through fun computer science topics--from statistical analysis to

search algorithms, the Turing machine, and more. Early chapters cover basic Racket concepts like data types, syntax, variables, strings, and formatted output. You'll learn how to perform math in Racket's rich numerical environment, and use programming constructs in different problem domains (like coding solutions to the Tower of Hanoi puzzle). Later, you'll play with plotting, grapple with graphics, and visualize data. Then, you'll escape the confines of the command line to produce animations, interactive games, and a card trick program that'll dazzle your friends. You'll learn how to: Use DrRacket, an interactive development environment (IDE) for writing programs Compute classical math problems, like the Fibonacci sequence Generate two-dimensional function plots and create drawings using graphics primitives Import and export data to and from Racket using ports, then visually analyze it Build simple computing devices (pushdown automaton, Turing machine, and so on) that perform tasks Leverage Racket's built-in libraries to develop a command line algebraic calculator Racket Programming the Fun Way is just like the language itself--an embodiment of everything that makes programming interesting and worthwhile, and that makes you a better programmer.

  Professional Learning from Classroom-Based Inquiries Jyoti Rookshana Jhagroo,Patricia Martha Stringer,2023-10-31 This book provides authentic practice-based inquiries by pre-service teachers. Their reflective narratives showcase their individual inquiries as they navigated their self-chosen professional learning journeys through the

teaching as inquiry framework. The narratives advance what it means to be a reflective practitioner in practice and highlight necessary dispositional skill sets to attain valuable professional learning through inquiry. Through an inquiry stance, pre-service teachers are liberated from being knowledge consumers to local knowledge producers relevant to their practice. The dissonance this shift creates, negates the 'comfortable doing' of teaching to make the act of teaching authentic, relevant, and powerful.
