Enabling Mobile Apps with IBM Worklight Application Center Megan Irvine, Jason Maddocks, IBM Redbooks, 2013-06-11 IBM®

Worklight® Application Center is an enterprise application store. It allows you to install, configure, and administer a repository of mobile applications for use by individuals and groups within your enterprise or organization. It is built on top of the IBM MobileFirst Platform and the IBM Worklight mobile application platform that enables you to develop, deploy, and manage mobile applications. This IBM Redpaper™ publication provides detailed step-by-step guidance on how to install, configure, and use Worklight Application Center. It provides instructions for installing mobile applications (apps) into Application Center, and for browsing, installing, and rating those apps through the mobile client running on an Android, iOS, or BlackBerry smartphone. This paper also positions Application Center next to the Enterprise App Management component of IBM Endpoint Manager for Mobile Devices, and describes how to integrate the two solutions. This IBM Redpaper is of interest to those who are looking to understand, implement, or use an application store in their own enterprise. Smarter Banking with CICS Transaction Server Chris Rayns,Neil Ashworth,Peter Beevers,Vesna Eibel,Fabrice Jarassat,Claus T Jensen,Alison Lucas,Anthony Papageorgiou,Alain Roessle,Nigel Williams,IBM Redbooks,2010-04-22 It goes without saying that 2009 was a year of unprecedented change in global banking. The challenges that financial institutions are facing require them to cut costs but also to regain trust and improve the service that they provide to an increasingly sophisticated and demanding set of customers. In the past, siloed and rigid IT systems often inhibited banks in their attempts to re-engineer their business processes. The IBM® smarter banking initiative highlights how more intelligent software can be used to significantly improve the end-to-end integration of banking processes. In this IBM Redbooks® publication, we aim to show how software technologies, such as SOA, Web 2.0 and event driven architectures, can be used to implement smarter banking solutions. Our focus is on CICS® Transaction Server, which is at the heart of most bank's core banking implementations.
