Pyramid Rising Zach Royer,2014-05-19 In this book, I write about a connection I noticed between natural disasters and ancient stone structures like pyramids and megaliths. I suggest a new approach to reducing the intensity of earthquakes and other natural disasters with specific placements of pyramids and other massive constructions. Plans are already underway to stabilize the earth's grid with new megalithic constructions being built today. Based on years of study into environmental science, climate change, natural disasters, worldwide famine and planetary unbalance -- coupled with my life long thirst of ancient history (and mystery), I truly believe that most of the unusual ancient structures like Stonehenge and the pyramids of Giza were built to interact with the Earth's energies, forces of nature such as magnetism, gravity, light, heat, and telluric energy. Think of it as acupuncture on a planetary scale. Human beings seek acupuncture for certain ailments, when energy pathways, known as meridians, are blocked, a condition which can lead to disease and fatigue. The human body and the earth are constructed in a similar way, the saying As Above, So Below is more than just a saying...it's a universal Truth. I emphasize that in this book. While researching for Pyramid Rising, I learned from a colleague that rebuilding the pyramid grid could also repair the wandering North and South Poles, locking them into place once again, giving us back the perfect 360 day year. Could that have been the ultimate reason for their construction? Possibly.

Pyramid Rising Zach Royer,John Shaughnessy,2013-09-22 In this book I outline a radical solution based on years of personal research to the ever increasing problems of climate change, natural disasters, worldwide famine and planetary unbalance -- building and repairing pyramids and megaliths that correlate to the World Grid such as the ones built long ago in a lost and forgotten age. At some point in earth's history (the actual dates vary) there was a massive global undertaking involving the construction of pyramids, megaliths and other incredible structures. I have to think it was more than just coincidence that distant cultures built incredibly similar structures along a common grid. The decision to build these gigantic works in ancient times, I believe, was part of a globally coordinated attempt by a lost civilization to stabilize the earth's violent energies using the most sophisticated technology of the time -- Stone. Big stones. The Ancient pyramid building civilizations constructed a global network for this purpose, but it is thought they didn't complete the network in time. Disaster struck and history records the latest global disaster as the Great Flood. Certain pyramids were built in conjunction with certain volcanoes as part of a global thermostat as demonstrated by Shaughnessy's Law of Gravity in the book Pyramid Gravity Force - which ties right in to the Pyramid Rising planetary acupuncture solution. I ask, it is possible to minimize or possibly prevent a disaster such as a major earthquake from happening again? Is humanity ready for the changes that lie ahead as a result of current solar activity? Now is our chance to combine Ancient Wisdom with modern technology before history repeats itself.

Voyages of the Pyramid Builders Robert M. Schoch,2004-05-24 Is it a mere coincidence that pyramids are found throughout our globe? Did cultures ranging across vast spaces in geography and time, such as the ancient Egyptians; early Buddhists; the Maya, Inca, Toltec, and Aztec civilizations of the Americas; the Celts of the British Isles; and even the Mississippi Indians of pre-Columbus Illinois, simply dream the same dreams and envision the same structures? Robert M. Schoch-one of the world's preeminent geologists in recasting the date of the building of the Great Sphinx-believes otherwise. In this dramatic and meticulously reasoned book, Schoch, like anthropologist Thor Heyerdahl in his classic Kon-Tiki, argues that ancient cultures traveled great distances by sea. Indeed, he believes that primeval sailors traveled from the Eastern continent, primarily Southeast Asia, and spread the idea of pyramids across the globe, particularly to the New World of the Americas where they abounded until the days of the Conquistadors.

Viperhand Douglas Niles,2012-09-04 This 2nd novel in the Maztica Trilogy by Douglas Niles brings to life an exotic setting within the Forgotten Realms world. Erix, the former slave girl, and Halloran, the legionnaire, flee from the waves of catastrophe sweeping Maztica. The God of War feasts upon chaos while the desperate lovers strive to escape from enemies on all sides. Finally each is forced into a choice of historical proportions and deeply personal emotion. The gods themselves awaken, and the destruction of the fabulously wealthy continent of Maztica looms on the horizon. Yet Erix bears with her a desperate secret, and with that secret comes the lone hope that Maztica can survive.

The Great Pyramid John Romer,2007-03-19 This book offers an explanation of how the Great Pyramid was designed and built.

The Secret Doctrine (Complete) Helena Petrovna Blavatsky,1974 Since the appearance of Theosophical literature in England, it has become customary to call its teachings “Esoteric Buddhism.” And, having become a habit—as an old proverb based on daily experience has it—“Error runs down an inclined plane, while Truth has to laboriously climb its way up hill.” Old truisms are often the wisest. The human mind can hardly remain entirely free from bias, and decisive opinions are often formed before a thorough examination of a subject from all its aspects has been made. This is said with reference to the prevailing double mistake (a) of limiting Theosophy to Buddhism; and (b) of confounding the tenets of the religious philosophy preached by Gautama, the Buddha, with the doctrines broadly outlined in Esoteric Buddhism. Any thing more erroneous than this could hardly be imagined. It has enabled our enemies to find an effective weapon against Theosophy, because, as an eminent Pâli scholar very pointedly expressed it, there was in the volume named “neither Esotericism nor Buddhism.” The esoteric truths, presented in Mr. Sinnett's work, ceased to be esoteric from the moment they were made public; nor did the book contain the religion of Buddha, but simply a few tenets from a hitherto hidden teaching, which are now explained and supplemented by many more in the present volumes. And even the latter, though giving out many fundamental tenets from the Secret Doctrine of the East, raise but a small corner of the dark veil. For no one, not even the greatest living Adept, would be permitted to, or could—even if he would—give out promiscuously to a mocking, unbelieving world that which has been so effectually concealed from it for long æons and ages. Esoteric Buddhism was an excellent work with a very unfortunate title, though it meant no more than does the title of this work, The Secret Doctrine. It proved unfortunate, because people are always in the habit of judging things by their appearance rather than by their meaning, and because the error has now become so universal, that even most of the Fellows of the Theosophical Society have fallen victims to the same misconception. From the first, however, protests were raised by Brâhmans and others against the title; and, in justice to myself, I must add that Esoteric Buddhism was presented to me as a completed volume, and that I was entirely unaware of the manner in which the author intended to spell the word “Budh-ism.”

Sticks, Stones, and Shadows Martin Isler,2001 What do the pyramids of Egypt really represent? What could have driven so many to so great, and often so dangerous, an effort? Was the motivation religious or practical? Illustrated with more than 300 photographs and drawings, this book presents an original approach to the subject of pyramid building. It reveals the connection between devices that served both a practical need for survival and a spiritual belief in gods and goddesses. It examines Egyptian technologies and techniques from the origins of pyramid development to the step-by-step details of how the ground was leveled, how the site was oriented, and how the stone was raised and placed to meet at a distant point in the sky. Here the author also asks and answers

questions virtually ignored for the last century. He discloses, for example, the ancient use of shadows, now denigrated to the ornamental back-yard sundial, but once an important tool for telling the height of an object, geographical directions, the seasons of the year, and the time of day. He also reinterprets the ancient stretching of the cord ceremony, which once was thought to have only religious significance but here is shown as the means of establishing the sides of a pyramid.

Pyramids Charles George,Linda George,2008 Ancient pyramids found throughout the world, especially Egypt and Mesoamerica, have mystified people for centuries. This title explores the controversial theories related to why they were built, who built them, and where did these ancient peoples acquire the necessary technology to construct such mysterious and enormous structures.

Historic Lodgings of Ocean City: The Fisher Collection Robert M. Craig,2023-03-20 This is a visual history of the architecture of tourist accommodations in Maryland's famous beach resort. These have ranged from the Atlantic Hotel to the most recent chain hotels and condominiums that have so altered the streetscapes and skyline of the barrier island. Ocean City's architectural evolution paralleled national developments; it began on boardwalk-adjacent and beachfront sites with turreted and gabled cottages and shingle-clad Victorian hotels. By the 1920s, porticoed boardwalk hostelryes emerged, and as the popularity of the automobile increased, auto camps and groups of cottages developed into motor courts and mom-and-pop motels during the mid-20th century. After the 1970s, lodgings changed, with infill condominium blocks, time-shares, and megastructures casting afternoon shadows across the beach.
