Gerald G. Duffy

Pyramid Rising M. K. Welsch,Randy L. Griffith,2022-01-30 Pyramid Rising presents a new theory about the origins of the Great Pyramid. Offering previously unimagined ideas supported by 150 photos, illustrations, and sidebars, it is a must-read for anyone fascinated by ancient mysteries

Pyramid Rising Zach Royer,2014-05-19 In this book, I write about a connection I noticed between natural disasters and ancient stone structures like pyramids and megaliths. I suggest a new approach to reducing the intensity of earthquakes and other natural disasters with specific placements of pyramids and other massive constructions. Plans are already underway to stabilize the earth's grid with new megalithic constructions being built today. Based on years of study into environmental science, climate change, natural disasters, worldwide famine and planetary unbalance -- coupled with my life long thirst of ancient history (and mystery), I truly believe that most of the unusual ancient structures like Stonehenge and the pyramids of Giza were built to interact with the Earth's energies, forces of nature such as magnetism, gravity, light, heat, and telluric energy. Think of it as acupuncture on a planetary scale. Human beings seek acupuncture for certain ailments, when energy pathways, known as meridians, are blocked, a condition which can lead to disease and fatigue. The human body and the earth are constructed in a similar way, the saying As Above, So Below is more than just a saying...it's a universal Truth. I emphasize that in this book. While researching for Pyramid Rising, I learned from a colleague that rebuilding the pyramid grid could also repair the wandering North and South Poles, locking them into place once again, giving us back the perfect 360 day year. Could that have been the ultimate reason for their construction? Possibly.

Pyramid Rising Zach Royer,John Shaughnessy,2013-09-22 In this book I outline a radical solution based on years of personal research to the ever increasing problems of climate change, natural disasters, worldwide famine and planetary unbalance -- building and repairing pyramids and megaliths that correlate to the World Grid such as the ones built long ago in a lost and forgotten age. At some point in earth's history (the actual dates vary) there was a massive global undertaking involving the construction of pyramids, megaliths and other incredible structures. I have to think it was more than just coincidence that distant cultures built incredibly similar structures along a common grid. The decision to build these gigantic works in ancient times, I believe, was part of a globally coordinated attempt by a lost civilization to stabilize the earth's violent energies using the most sophisticated technology of the time -- Stone. Big stones. The Ancient pyramid building civilizations constructed a global network for this purpose, but it is thought they didn't complete the network in time. Disaster struck and history records the latest global disaster as the Great Flood. Certain pyramids were built in conjunction with certain volcanoes as part of a global thermostat as demonstrated by Shaughnessy's Law of Gravity in the book Pyramid Gravity Force - which ties right in to the Pyramid Rising planetary acupuncture solution. I ask, it is possible to minimize or possibly prevent a disaster such as a major earthquake from happening again? Is humanity ready for the changes that lie ahead as a result of current solar activity? Now is our chance to combine Ancient Wisdom with modern technology before history repeats itself.

Math and the Mona Lisa Bulent Atalay,2011-09-20 Leonardo da Vinci was one of history's true geniuses, equally brilliant as an artist, scientist, and mathematician. Readers of The Da Vinci Code were given a glimpse of the mysterious connections between math, science, and Leonardo's art. Math and the Mona Lisa picks up where The Da Vinci Code left off, illuminating Leonardo's life and work to uncover connections that, until now, have been known only to scholars. Bülent Atalay, a distinguished scientist and artist, examines the science and mathematics that underlie Leonardo's work, paying special attention to the proportions, patterns, shapes, and symmetries that scientists and mathematicians have also identified in nature. Following Leonardo's own unique model, Atalay searches for the internal dynamics of art and science, revealing to us the deep unity of the two cultures. He provides a broad overview of the development of science from the dawn of civilization to today's quantum mechanics. From this base of information, Atalay offers a fascinating view into Leonardo's restless intellect and modus operandi, allowing us to see the source of his ideas and to appreciate his art from a new perspective.

Pyramids Charles George,Linda George,2008 Ancient pyramids found throughout the world, especially Egypt and Mesoamerica, have mystified people for centuries. This title explores the controversial theories related to why they were built, who built them, and where did these ancient peoples acquire the necessary technology to construct such mysterious and enormous structures.

Historic Lodgings of Ocean City: The Fisher Collection Robert M. Craig,2023-03-20 This is a visual history of the architecture of tourist accommodations in Maryland's famous beach resort. These have ranged from the Atlantic Hotel to the most recent chain hotels and condominiums that have so altered the streetscapes and skyline of the barrier island. Ocean City's architectural evolution paralleled national developments; it began on boardwalk-adjacent and beachfront sites with turreted and gabled cottages and shingle-clad Victorian hotels. By the 1920s, porticoed boardwalk hostelryes emerged, and as the popularity of the automobile increased, auto camps and groups of cottages developed into motor courts and mom-and-pop motels during the mid-20th century. After the 1970s, lodgings changed, with infill condominium blocks, time-shares, and megastructures casting afternoon shadows across the beach.

The Rise of Professional Society Professor Harold Perkin,Harold Perkin,2003-10-04 The Rise of Professional Society lays out a stimulating and controversial framework for the study of British society, challenging accepted

paradigms based on class analysis. Perkins argues that the non-capitalist professional class represents a new principle of social organization based on trained expertise and meritocracy, a forgotten middle class conveniently overlooked by classical social theorists.

The World of Ancient Egypt [2 volumes] Peter Lacovara,2016-11-21 This absorbing reference covers everyday life in ancient Egypt, spanning a period of more than 5,000 years—from the Stone Age to the advent of Christianity. The mysteries surrounding ancient Egypt continue to pique interest and prompt study thousands of years later. Intriguing questions—such as Why were certain Egyptians mummified after death, while others were not?, How were the pyramids constructed?, and Were sexuality and courtship accurately portrayed in movies about the period?—incite curiosity and inspire the imagination in the modern world. This comprehensive encyclopedia addresses these questions and more, revealing fascinating facts about all aspects of daily life in ancient Egypt. Starting with the beginning of the First Dynasty to the death of Cleopatra, this compendium explores the family life, politics, religion, and culture of the Nile Valley from Aswan to the Delta, as well as the peripheral areas of Nubia, the Oases, the Sinai, and the southern Levant. Each topical section opens with an introductory essay, followed by A–Z entries on such topics as food, fashion, housing, politics, and community. The book features a timeline of events, an extensive bibliography of print and digital resources, and numerous photographs and illustrations throughout.

Sticks, Stones, and Shadows Martin Isler,2001 What do the pyramids of Egypt really represent? What could have driven so many to so great, and often so dangerous, an effort? Was the motivation religious or practical? Illustrated with more than 300 photographs and drawings, this book presents an original approach to the subject of pyramid building. It reveals the connection between devices that served both a practical need for survival and a spiritual belief in gods and goddesses. It examines Egyptian technologies and techniques from the origins of pyramid development to the step-by-step details of how the ground was leveled, how the site was oriented, and how the stone was raised and placed to meet at a distant point in the sky. Here the author also asks and answers questions virtually ignored for the last century. He discloses, for example, the ancient use of shadows, now denigrated to the ornamental back-yard sundial, but once an important tool for telling the height of an object, geographical directions, the seasons of the year, and the time of day. He also reinterprets the ancient stretching of the cord ceremony, which once was thought to have only religious significance but here is shown as the means of establishing the sides of a pyramid.

The New World Order is the Old World Order George Radanovich,2011-05 Politicians in Washington are grappling with a soaring national debt that threatens our status in the world and, indeed our very future. The government funded by this debt is seen as too big and intrusive ... But the way forward will never be found until we understand how our nation fits within a higher purpose for all men and women. The Four Institutions of the Cultural Mandate provide this understanding and clarifies what the American people must do to secure our country's future.--Page 4 of cover.
