Scorpion Andrew Kaplan,2014-10-07 This

supercharged thriller from master storyteller Andrew Kaplan introduces the Scorpion, the CIA's top agent in the Middle East, and launches the bestselling espionage series Kelly Ormont sprints down the narrow streets of Paris. When a car pulls up and a man points a gun at her, life as she knows it is over. Within days, this beautiful congressman's daughter will be in the Middle East, where some of the wealthiest men in the world will bid to make her their slave. Only the Scorpion can save her now. An American raised among the Bedouin, the Scorpion is the CIA's top agent in the Arabian peninsula. Quicksand Geoffrey Wawro,2010-04-01 An

unprecedented history of our involvement in the Middle East that traces our current quandaries there-in Iraq, Israel, Iran, Afghanistan, and elsewhere-back to their roots almost a century ago. Geoffrey Wawro approaches America's role in the Middle East in a fundamentally new way-by encompassing the last century of the entire region, rather than focusing narrowly on a particular country or era. The result is a definitive and revelatory history whose drama, tragedy, and rich irony he relates with unprecedented verve. Wawro combed archives in the United States and Europe and traveled the Middle East to unearth new insights into the hidden motivations, backroom dealing, and outright espionage that shaped

some of the most tumultuous events of the last one hundred years. Wawro offers piercing analysis of iconic events from the birth of Israel to the death of Sadat, from the Suez crisis to the energy crisis, from the Six-Day War to Desert One, from Iran-contra to the wars in Iraq and Afghanistan and the rise of al- Qaeda. Throughout, he draws telling parallels between America's past mistakes and its current quandaries, proving that we're in today's muddle not just because of our old errors, but because we keep repeating those errors. America has juggled multiple commitments and conflicting priorities in the Middle East for nearly a century. Strands of idealism and ruthless practicality have alternated- and sometimes run together-in our policy. Quicksand untangles these strands as no history has done before by showing how our strategies unfolded over the entire century and across the entire region. We've persistently misread the intentions and motivations of every major player in the region because we've insisted on viewing them through the lens of our own culture, hopes, and fears. Most administrations since Eisenhower's have adopted their own doctrine for the Middle East, and almost every doctrine has failed precisely because it's a doctrine-a template into which events on the ground refuse to fit. Geoffrey Wawro's peerless and remarkably lively history is key to understanding our errors and the Middle East-at last- on its own terms.

In the Valleys of the Noble Beyond John

Zada, 2019-08-15 This evocative work of nature writing traverses the world's largest temperate rainforest to uncover the legend of the Sasquatch. Canada's Great Bear Rainforest is home to trees as tall as skyscrapers and moss as thick as carpet. According to the people who live there, another giant may dwell in these woods. For centuries, locals have reported encounters with the Sasquatch—a

species of hairy man-ape that could inhabit this pristine wilderness. Driven by his childhood obsession with the Sasquatch, yet trying to remain objective, journalist John Zada seeks out the people and stories surrounding this enigmatic creature. He speaks with local Indigenous peoples and a Sasquatch-studying scientist. He hikes with a former bear hunter. Soon, he finds himself on quest for something infinitely more complex, cutting across questions of human perception, scientific inquiry, Indigenous traditions, the environment, and the power of the human imagination to believe in—or to outright dismiss—one of nature’s last great mysteries.

Black Site Dalton Fury,2012-01-31 A first entry in a new series by the best-selling author of Kill Bin Laden finds Delta Force operator Kolt Raynor seeking redemption by attempting the rescue of teammates he caused to be captured three years earlier, a mission that leads to his discovery of an al Qaeda plot to take over a secret U.S. military prison.

A Poet of the Invisible World Michael Golding,2015-10-06 In the tradition of SIDDHARTHA by Hermann Hesse comes a new spiritual novel that is a stunning feat of storytelling and imagination. A Poet of the Invisible World follows a boy named Nouri, born in thirteenth-century Persia, with four ears instead of two. Orphaned as an infant, he's taken into a Sufi order, where he meets an assortment of dervishes and is placed upon a path toward spiritual awakening. As he stumbles from one painful experience to the next, he grows into manhood. Each trial he endures shatters another obstacle within--and leads Nouri on toward transcendence.

Breaking a Horse to Harness Sallie Walrond,2022-03 In this completely revised, enlarged and updated edition of Sallie Walrond's classic work, a new series of step-by-step colour photographs, taken especially for the book by talented equestrian photographer Anthony Reynolds, takes the reader through basic lungeing and biting techniques, shows the correct way to introduce both harness and vehicle and demonstrates by means of the author's own tried and tested methods the way to produce an animal who will go willingly and happily in harness. Safety is a priority at every stage and training for road work is included. The author's lucid, easy-to-follow text provides all the necessary information to enable any averagely competent rider to train a horse to go in harness with success whether the animal concerned is an unbroken two year old or an outgrown family pony. AUTHOR: Sallie Walrond's reputation as a driving expert is renowned all over the world. She has ridden and driven since she was nine years old. She is council member, judge, instructor, examiner and area commissioner for the British Driving Society. She teaches, lectures and judges internationally and has shown harness horses with success for many years.

Palestine Nur Masalha,2018-08-15 This rich and magisterial work traces Palestine's millennia-old heritage, uncovering cultures and societies of astounding depth and complexity that stretch back to the very beginnings of recorded history. Starting with the earliest references in Egyptian and Assyrian texts, Nur Masalha explores how Palestine and its Palestinian identity have evolved over thousands of years, from the Bronze Age to the present day. Drawing on a rich body of sources and the latest archaeological evidence, Masalha shows how Palestine's

multicultural past has been distorted and mythologised by Biblical lore and the Israel–Palestinian conflict. In the process, Masalha reveals that the concept of Palestine, contrary to accepted belief, is not a modern invention or one constructed in opposition to Israel, but rooted firmly in ancient past. Palestine represents the authoritative account of the country's history.

Fundamentals of Aircraft and Rocket Propulsion

Ahmed F. El-Sayed,2016-05-25 This book provides a comprehensive basics-to-advanced course in an aero-thermal science vital to the design of engines for either type of craft. The text classifies engines powering aircraft and single/multi-stage rockets, and derives performance parameters for both from basic aerodynamics and thermodynamics laws. Each type of engine is analyzed for optimum performance goals, and mission-appropriate engines selection is explained. Fundamentals of Aircraft and Rocket Propulsion provides information about and analyses of: thermodynamic cycles of shaft engines (piston, turboprop, turboshaft and propfan); jet engines (pulsejet, pulse detonation engine, ramjet, scramjet, turbojet and turbofan); chemical and non-chemical rocket engines; conceptual design of modular rocket engines (combustor, nozzle and turbopumps); and conceptual design of different modules of aero-engines in their design and off-design state. Aimed at graduate and final-year undergraduate students, this textbook provides a thorough grounding in the history and classification of both aircraft and rocket engines, important design features of all the engines detailed, and particular consideration of special aircraft such as unmanned aerial and short/vertical takeoff and landing aircraft. End-of-chapter exercises make this a valuable student resource, and the provision of a

downloadable solutions manual will be of further benefit for course instructors.
