Escape from Qatar Atilla Yusuf Guleker,2022-11-30 All eyes are on Qatar for the 2022 FIFA World Cup. Having lived there for 5 years, I have presented the reality of the situation in Qatar with research and current examples. It is almost like an X-ray of Qatar. From the air to the water, from the way people are educated to the way they are cured. The story of a country that looks beautiful on the outside, but where deception is hiding just beneath the surface... a country that is ornate on the outside but rusty on the inside. The case of Qatar through personal experiences, research, and current examples... When you realize the true face of this flashy country that has spent more money on the FIFA 2022 World Cup than all the money spent to date, you will want to escape, hence the title 'Escape from Qatar.' This book is also a survival guide full of tips, -some sad, some funny, for those who want to visit or live in Qatar. From the pen of journalist, educator, and writer Atilla Yusuf Guleker, who has been declared the 'imam of Qatar' by the Turkish media...

The Struggle for Influence in the Middle East Federica Bicchì,Benoit Challand,Steven Heydermann,2018-02-02 This collection of research papers explores the impact of the Arab uprisings on the politics and political economy of foreign aid provision in the MENA region. Contributions focus on the foreign assistance policies and strategies of key donors (United States, Europe, Gulf countries and Turkey), and on the relationship between donors and recipients of foreign aid in a select set of MENA cases (Tunisia, Egypt, Palestine and to a lesser extent Morocco). Despite widespread rhetoric among lead donors pledging to support the transformational potential of the Arab uprisings, the contributions find a more complex pattern in foreign aid provision since 2011. Among Arab donors, who have played a significant role as providers of aid to states most affected by mass protests, trends in foreign assistance reflect the competing priorities of donors, and their willingness to politicize aid provision in pursuit of their strategic interests. Among Western donors, authors find a high degree of continuity. Chapters that focus on Western donors seek to account for continuity on the part of Western governments and the EU at a moment of profound transformational potential. Two factors, bureaucratization and securitization, capture most of the explanations provided, which take into account a variety of local dimensions as well. Contributions also discuss the changing assistance environment, namely the globalization of foreign assistance, the complex bureaucratic arrangements presiding over the delivery of European and US aid, and the role of regional and international non-democracies in the provision of foreign assistance. This book was published as a special issue of Mediterranean Politics.

Political Aid and Arab Activism Sheila Carapico,2013-11-18 What does it mean to promote 'transitions to democracy' in the Middle East? How have North American, European and multilateral projects advanced human rights, authoritarian retrenchment or Western domination? This book examines transnational programs in Egypt, Jordan, Morocco, Yemen, Lebanon, Tunisia, Algeria, the exceptional cases of Palestine and Iraq, and the Arab region at large during two tumultuous decades. To understand the controversial and contradictory effects of political aid, Sheila Carapico analyzes discursive and professional practices in four key subfields: the rule of law, electoral design and monitoring, women's political empowerment and civil society. From the institutional arrangements for extraordinary undertakings such as Saddam Hussein's trial or Palestinian elections to routine templates for national women's machineries or NGO networks, her research explores the paradoxes and jurisdictional disputes confronted by Arab activists for justice, representation and 'non-governmental' agency.

Qatar and the 2022 FIFA World Cup Paul Michael Brannagan,Danyel Reiche,2022-03-28 This book offers the first, full academic analysis of the Qatar 2022 FIFA World Cup. Adopting an international relations perspective, the authors critically interrogate the politics and controversy that has surrounded arguably the most controversial sports event ever. In doing so, this text offers up an imperative examination of Qatar's desired objectives through their investment in global sport and sports events, as well as provides readers with an academic explanation on why major event hosts – such as Qatar – receive so much international scrutiny in the pre-event stage of the event hosting process. On the back of this international scrutiny, this text also provides the first full analysis on how such negative scrutiny has forced Qatar to implement various social-political changes at home.

The Economics of Renewable Energy in the Gulf Hisham M. Akhonbay,2018-09-27 The Cooperation Council for the Arab States of the Gulf (GCC) has been at the epicenter of global energy markets because of its substantial endowment of hydrocarbons. Yet countries in the region have also stated their intent to be global leaders in renewable energy. This collection explores the drivers for the widespread adoption of renewable energy around the GCC, the need for renewable energy and the policy-economic factors that can create success. All six countries within the GCC have plans to include renewable energy power generation in their energy mix for various reasons including: a growing demand for electricity because of increasing populations, an increasing government fiscal deficit due to inefficient subsidies, the need to diversify the economy and global pressure to meet climate change requirements. However, the decision of when and by how much to introduce renewable energy is fraught with complications. In this book, a stellar cast of regional policy and academic experts explore the reasons behind these renewable energy plans and the potential impediments to

success, whether it be the declining cost of producing energy from hydrocarbons, an infrastructure which needs to be updated, social acceptance, lack of financing and even harsh weather. Weighing up all these factors, the book considers the route forward for renewable energy in the Gulf region. The Economics of Renewable Energy in the Gulf offers an excellent examination of the adoption of renewable energy in the area. It will be of great interest to academic researchers and policy makers alike, particularly those working in the areas of energy economics, public policy and international relations.

The NATO Intervention in Libya Kjell Engelbrekt,Marcus Mohlin,Charlotte Wagnsson,2013-10-01 This book explores ‘lessons learned’ from the military intervention in Libya by examining key aspects of the 2011 NATO campaign. NATO’s intervention in Libya had unique features, rendering it unlikely to serve as a model for action in other situations. There was an explicit UN Security Council mandate to use military force, a strong European commitment to protect Libyan civilians, Arab League political endorsement and American engagement in the critical, initial phase of the air campaign. Although the seven-month intervention stretched NATO’s ammunition stockpiles and political will almost to their respective breaking points, the definitive overthrow of the Gaddafi regime is universally regarded as a major accomplishment. With contributions from a range of key thinkers and analysts in the field, the book first explains the law and politics of the intervention, starting out with deliberations in NATO and at the UN Security Council, both noticeably influenced by the concept of a Responsibility to Protect (R2P). It then goes on to examine a wide set of military and auxiliary measures that governments and defence forces undertook in order to increasingly tilt the balance against the Gaddafi regime and to bring about an end to the conflict, as well as to the intervention proper, while striving to keep the number of NATO and civilian casualties to a minimum. This book will be of interest to students of strategic studies, history and war studies, and IR in general.

Under Construction: Logics of Urbanism in the Gulf Region Steffen Wippel,Katrin Bromber,Birgit Krawietz,2016-02-17 Interdisciplinary in approach, this volume explores and deciphers the symbolic value and iconicity of the built environment in the Arab Gulf Region, its aesthetics, language and performative characteristics. Bringing together a range of studies by artists, curators and scholars, it demonstrates how Dubai appeared - at least until the financial crisis - to be leading the construction race and has already completed a large number of its landmark architecture and strategic facilities. In contrast, cities like the Qatari capital Doha still appear to be heavily ‘under construction’ and in countries like the Sultanate of Oman, ultra-luxury tourism projects were started only recently. While the construction of artificial islands, theme parks and prestige sport facilities has attracted considerable attention, much less is known about the region’s widespread implementation of innovative infrastructure such as global container ports, free zones, inter-island causeways and metro lines. This volume argues that these endeavours are not simply part of a strategy to prepare for the post-oil era for future economic survival and prosperity in the Lower Gulf region, but that they are also aiming to strengthen identitarian patterns and specific national brands. In doing so, they exhibit similar, yet remarkably diverse modes of engaging with certain global trends and present - questionably - distinct ideas for putting themselves on the global map. Each country aims to grab attention with regard to the world-wide flow of goods and capital and thus provide its own citizens with a socially acceptable trajectory for the future. By doing that, the countries in the Gulf are articulating a new semiotic and paradigm of urban development. For the first time, this volume maps these trends in their relation to architecture and infrastructure, in particular by treating them as semiotics in their own right. It suggests that recent developments in this region of the world not only represen

Libya: From Repression to Revolution M. Cherif Bassiouni,2013-12-13 This groundbreaking new volume provides the first comprehensive review of the Libyan conflict of 2011. The book expands on and complements the report of the Commission of Inquiry to the United Nations Human Rights Council, and provides the reader with the information essential to understanding the Libyan conflict, its causes and ramifications, and the difficulties the country faces as it rebuilds in the wake of 40 years of repression and the effects of a brutal civil war.

Routledge Handbook of Youth Sport Ken Green,Andy Smith,2016-01-08 The Routledge Handbook of Youth Sport is a comprehensive survey of the latest research into young people’s involvement in sport. Drawing on a wide diversity of disciplines, including sociology, psychology, policy studies, coaching, physical education and physiology, the book examines the importance of sport during a key transitional period of our lives, from the later teenage years into the early twenties, and therefore helps us develop a better understanding of the social construction of young people’s lives. The book covers youth sport in all its forms, from competitive game-contests and conventional sport to recreational activities, exercise and lifestyle sport, and at all levels, from elite competition to leisure time activities and school physical education. It explores youth sport across the world, in developing and developed countries, and touches on some of the most significant themes and issues in contemporary sport studies, including physical activity and health, lifelong participation, talent identification and development, and safeguarding and abuse. No other book brings together in one place such a breadth and depth of material on youth sport or the engagement of young people in physical activity.
