World-maps for Finding the Direction and Distance to Mecca David King, 2021-09-06 Two remarkable Iranian world-maps were discovered in 1989 and 1995. Both are made of brass and date from 17th-century Iran. Mecca is at the centre and a highly sophisticated longitude and latitude grid enables the user to determine the direction and distance to Mecca for anywhere in the world between Andalusia and China. Prior to the discovery of these maps it was thought that such cartographic grids were conceived in Europe ca. 1910. This richly-illustrated book presents an overview of the ways in which Muslims over the centuries have determined the sacred direction towards Mecca (qibla) and then describes the two world-maps in detail. The author shows that the geographical data derives from a 15th-century Central Asian source and that the mathematics underlying the grid was developed in 9th-century Baghdad.

The Law of Exception Amuh, 2024-01-01 The law of exception is a law that reveals an object that has different and special characteristics from other objects in a group. The number of objects that become exceptions varies quite a lot and is usually less than the other objects. In this book, objects that are exceptions are generally divided into two types, namely one or a few. The laws of exception is arranged formulacally and arranged systematically by using a simple formula arrangement. From this arrangement, the law of exception creates a concept to seek and find an object that has different and special characteristics from other objects that have relationships between one with another in a group. After that, it is explained where the different and special characteristics lie. So that these different objects provide their own uniqueness from other objects. The law of

exception is a universal law in general. This is done to uncover a number of phenomena that often occur in natural and social life. This is intended to focus on objects that have different and special characteristics and become exception from other objects in a group. In this discussion, the description of each chapter reveals an exception object of the other objects in several parts of the verse in the Quran, the relationship between God and the creature, the history of several figures known by the community, Qibla and prayer, uniqueness of the calendar, organization, the uniqueness of numbers, soccer, solar systems, and recognize vulnerable past history to the future of relations between China and Taiwan.

Mathematics and the Divine Teun Koetsier, Luc Bergmans, 2004-12-09 Mathematics and the Divine seem to correspond to diametrically opposed tendencies of the human mind. Does the mathematician not seek what is precisely defined, and do the objects intended by the mystic and the theologian not lie beyond definition? Is mathematics not Man's search for a measure, and isn't the Divine that which is immeasurable ? The

present book shows that the domains of mathematics and the Divine, which may seem so radically separated, have throughout history and across cultures, proved to be intimately related. Religious activities such as the building of temples, the telling of ritual stories or the drawing of enigmatic figures all display distinct mathematical features. Major philosophical systems dealing with the Absolute and theological speculations focussing on our knowledge of the Ultimate have been based on or inspired by mathematics. A series of chapters by an international team of experts highlighting key figures, schools and trains of thought is presented here. Chinese number mysticism, the views of Pythagoras and Plato and their followers, Nicholas of Cusa's theological geometry, Spinozism and intuitionism as a philosophy of mathematics are treated side by side among many other themes in an attempt at creating a global view on the relation of mathematics and Man's quest for the Absolute in the course of history. · Mathematics and man's quest for the Absolute · A selective history highlighting key figures, schools and trains of thought · An international team of historians presenting specific new findings as well as general overviews · Confronting and uniting otherwise compartmentalized information

KaE ba Orientations Simon O'Meara, 2020-07-06 The most sacred site of Islam, the KaE ba (the granite cuboid structure at the centre of the Great Mosque of Mecca) is here investigated by examining six of its predominantly spatial effects: as the qibla (the direction faced in prayer); as the axis and matrix mundi of the Islamic world; as an architectural principle in the bedrock of this world; as a circumambulated goal of pilgrimage and site of spiritual union for mystics and Sufis; and as a dwelling that is imagined to shelter temporarily an animating force; but which

otherwise, as a house, holds a void.

Prayer (Solah) Abu Khadijah Damansari, 2024-03-15

In this book, Abu Khadijah Damansari embarks on a profound journey, delving deep into the essence of Islamic worship through the lens of Prayer (Solah). With care, the author carefully arranges sacred texts from the Qur'an, Hadiths of the Prophet Muhammad (may Allah's peace and blessings be upon him), the sayings of the prophetic Companions (may Allah be pleased with them), and insights from our esteemed Islamic scholars (may Allah have mercy on them). This compelling guide serves both - as a technical manual and a spiritual roadmap, compiled and written to nurture both the heart and mind of the reader. From the obligation of Solah to the intricate details of its performance, every aspect is elucidated with clarity and reverence. Readers will find themselves equipped with not only the knowledge of how to perform Solah correctly but also the inner disposition necessary for a meaningful connection with the Divine. The book meticulously outlines the essentials: from the times for prayer to the significance of the Adhan and Iqamah, from ensuring bodily purity to dressing appropriately for prayer. Each chapter unfolds seamlessly, addressing the compulsory, recommended, offensive, and forbidden elements of Solah. From the basic description of prayer to the details and nuances of prayers, from the significance of supererogatory prayers to the etiquette of group prayer, no stone is left unturned. Additionally, the author navigates through special circumstances, such as the prostrations of forgetfulness, shortening and combining prayers, and the prayers for various occasions like the two 'Eids and Jumu'a. Prayer (Solah) - invites readers to deepen their spiritual connection with the Lord Almighty through the profound worship of prayer. Whether you're just beginning your spiritual

journey to seek guidance or yearning for a deeper understanding, this book intends to illuminate your path towards spiritual fulfillment, InshaAllah.
