The SAGE Handbook of Islamic Studies Akbar S Ahmed, Tamara Sonn, 2010-04-22
'... a welcome addition to the already available introductory works on Islam. The chapters of the book combine depth of analysis and erudition on a wide range of subjects. Thus in a single volume one finds several superbly written papers not only on the foundations of Islam and the manifestations of Islamic culture but also on issues which are at the centre of contemporary debates among Muslims such as multiculturalism, social justice, democracy and diversity. As a sourcebook this work is equally useful for students, academicians and general readers' - Zafar Ishaq Ansari, Director, Islamic Research Institute, International Islamic University
Islamic Studies is at a critical moment in its history. It seeks both to maintain its rich history and to engage with other - sometimes dominant - cultural and political studies. This tension is producing complex changes in both the theory and the practice of Islamic Studies. This timely and stimulating Handbook, edited by world-class experts in the field, provides a comprehensive guide to Islamic Studies today. It examines the main issues in the field and explores the key debates. It provides readers with an indispensable, balanced guide to the roots of Islam and the challenges it faces in the twenty-first century. The Handbook includes discussions of: - Islam as a community of discourse and a global system - Islam, diaspora and multiculturalism - The Qu'ran today - Islam as a moral and judicial system - Islam and politics - Islam and culture - Diversities and Islam
Concise, level-headed and penetrating, this collection will be of interest to anyone who studies contemporary Islam. It brings together an unparalleled collection of international scholars who illuminate some of the most urgent and complex issues in the world today.

The 'Ulama in Contemporary Pakistan Mashal Saif, 2020-10-22 In this book, Mashal Saif explores how contemporary 'ulama, the guardians of religious knowledge and law, engage with the world's most populated Islamic nation-state: Pakistan. In mapping these engagements, she weds rigorous textual analysis with fieldwork and offers insight into some of the most significant and politically charged issues in recent Pakistani history. These include debates over the rights of women; the country's notorious blasphemy laws; the legitimacy of religiously mandated insurrection against the state; sectarian violence; and the place of Shi'as within the Sunni majority nation. These diverse case studies are knit together by the project's most significant contribution: a theoretical framework that understands the 'ulama's complex engagements with their state as a process of both contestation and cultivation of the Islamic Republic by citizen-subjects. This framework provides a new way of assessing state - 'ulama relations not only in contemporary Pakistan but also across the Muslim world.

The Islamic World Andrew Rippin, 2013-10-23 The Islamic World is an outstanding guide to Islamic faith and culture in all its geographical and historical diversity. Written by a distinguished international team of scholars, it elucidates the history, philosophy and practice of one of the world's great religious traditions. Its grounding in contemporary scholarship makes it an ideal reference source for students and scholars alike. Edited by Andrew Rippin, a leading scholar of Islam, the volume covers the political, geographical, religious, intellectual, cultural and social worlds of Islam, and offers insight into all aspects of Muslim life including the Qur'an and law, philosophy, science and technology, art, literature, and film and much

else. It explores the concept of an 'Islamic' world: what makes it distinctive and how uniform is that distinctiveness across Muslim geographical regions and through history?

The Rise of Islamic Capitalism Vali Nasr, 2009-09-15 Leading authority on the Islamic world and influential advisor to the Obama administration Vali Nasr shows that the West's best hope of winning the battle against Islamic extremists is to foster the growth of a vibrant new Muslim middle class. This flourishing of Muslim bourgeoisie is reshaping the mind-set, politics, and even the religious values of Muslims in much the same way the Western bourgeoisie led the capitalist and democratic revolution in Europe. Whereas extremism has grown out of the dismal economic failures of the authoritarian Islamic regimes, Nasr explains, the wealth and aspirations of this Islamic "critical middle" put them squarely at odds with extremism. They have ushered in remarkable transformations already in Dubai, Turkey, and Indonesia, and they are the key to tipping the balance in both Iran and Pakistan. As he writes "the great battle for the soul of the Muslim world will be fought not over religion but over market capitalism."

The New Cambridge History of Islam: Volume 4, Islamic Cultures and Societies to the End of the Eighteenth Century Robert Irwin, 2010-11-04 Robert Irwin's authoritative introduction to the fourth volume of The New Cambridge History of Islam offers a panoramic vision of Islamic culture from its origins to around 1800. The introductory chapter, which highlights key developments and introduces some of Islam's most famous protagonists, paves the way for an extraordinarily varied collection of essays. The themes treated include religion and law, conversion, Islam's relationship with the natural world, governance and politics, caliphs and kings, philosophy, science, medicine, language, art, architecture, literature, music and even cookery. What emerges from this rich collection, written by an international team of experts, is the diversity and dynamism of the societies which created this flourishing civilization. Volume four of The New Cambridge History of Islam serves as a thematic companion to the three preceding, politically oriented volumes, and in coverage extends across the pre-modern Islamic world.

Islamic Art and Archaeology in Palestine Myriam Rosen-Ayalon, 2016-09-16 Despite political upheavals under Muslim domination in the Middle Ages, Palestine was a center of great artistic activity recognized for its incredible dynamism. Its unique contribution to the Islamic "macrocosm," however, never became the subject of extensive study. Numerous archeological excavations on this relatively small geographic area reveal the existence of extremely well preserved monuments of high architectural quality and exceptional religious value. This is what Myriam Rosen-Ayalon exposes in this thorough introduction to Palestinian Islamic art and archeology. In chronological order she presents here for the first time the multifaceted and long-lasting achievements of Islamic art in Palestine, filling the gap of years of neglect on the subject.

Islamic Architecture Robert Hillenbrand, 1994 This is the definitive survey of Islamic architecture. Working from a social, rather than a technical perspective, Hillenbrand shows how the buildings fulfilled their intended functions within the community. Lavishly illustrated.

Grove Encyclopedia of Islamic Art & Architecture: Three-Volume Set Jonathan Bloom, Sheila S. Blair, Sheila Blair, 2009-05-14 The Grove Encyclopedia of

Islamic Art and Architecture is the most comprehensive reference work in this complex and diverse area of art history. Built on the acclaimed scholarship of the Grove Dictionary of Art, this work offers over 1,600 up-to-date entries on Islamic art and architecture ranging from the Middle East to Central and South Asia, Africa, and Europe and spans over a thousand years of history. Recent changes in Islamic art in areas such as Afghanistan, Iran, and Iraq are elucidated here by distinguished scholars. Entries provide in-depth art historical and cultural information about dynasties, art forms, artists, architecture, rulers, monuments, archaeological sites and stylistic developments. In addition, over 500 illustrations of sculpture, mosaic, painting, ceramics, architecture, metalwork and calligraphy illuminate the rich artistic tradition of the Islamic world. With the fundamental understanding that Islamic art is not limited to a particular region, or to a defined period of time, The Grove Encyclopedia of Islamic Art and Architecture offers pathways into Islamic culture through its art.

A Companion to Islamic Art and Architecture Finbarr Barry Flood, Gulru Necipoglu, 2017-06-16 The two-volume Companion to Islamic Art and Architecture bridges the gap between monograph and survey text by providing a new level of access and interpretation to Islamic art. The more than 50 newly commissioned essays revisit canonical topics, and include original approaches and scholarship on neglected aspects of the field. This two-volume Companion showcases more than 50 specially commissioned essays and an introduction that survey Islamic art and architecture in all its traditional grandeur. Essays are organized according to a new chronological-geographical paradigm that remaps the unprecedented expansion of the field and reflects the nuances of major artistic and political developments during the 1400-year span. The Companion represents recent developments in the field, and encourages future horizons by commissioning innovative essays that provide fresh perspectives on canonical subjects, such as early Islamic art, sacred spaces, palaces, urbanism, ornament, arts of the book, and the portable arts while introducing others that have been previously neglected, including unexplored geographies and periods, transregional connectivities, talismans and magic, consumption and networks of portability, museums and collecting, and contemporary art worlds; the essays entail strong comparative and historiographic dimensions. The volumes are accompanied by a map, and each subsection is preceded by a brief outline of the main cultural and historical developments during the period in question. The volumes include periods and regions typically excluded from survey books including modern and contemporary art-architecture; China, Indonesia, Sub-Saharan Africa, Sicily, the New World (Americas).

The House of Wisdom Jonathan Lyons, 2011-02-05 For centuries following the fall of Rome, western Europe was a benighted backwater, a world of subsistence farming, minimal literacy, and violent conflict. Meanwhile Arab culture was thriving, dazzling those Europeans fortunate enough to catch even a glimpse of the scientific advances coming from Baghdad, Antioch, or the cities of Persia, Central Asia, and Muslim Spain. There, philosophers, mathematicians, and astronomers were steadily advancing the frontiers of knowledge and revitalizing the works of Plato and Aristotle. In the royal library of Baghdad, known as the House of Wisdom, an army of scholars worked at the behest of the Abbasid caliphs. At a time when the best book collections in Europe held several dozen volumes, the House of Wisdom boasted as many as four hundred thousand. Even while their countrymen waged bloody Crusades against Muslims, a handful of intrepid Christian scholars, thirsty for knowledge, traveled to Arab lands and returned with priceless jewels of science, medicine, and philosophy that laid the foundation for the Renaissance. In this brilliant, evocative book, Lyons shows just how much Western culture owes to the glories of medieval Arab civilization, and reveals the untold story of how Europe drank from the well of Muslim learning.

Islamisation A. C. S. Peacock, 2017-03-08 The spread of Islam and the process of Islamisation (meaning both conversion to Islam and the adoption of Muslim culture) is explored in the twenty-four chapters of this volume. Taking a comparative perspective, both the historical trajectory of Islamisation and the methodological problems in its study are addressed, with coverage moving from Africa to China and from the seventh century to the start of the colonial period in 1800. Key questions are addressed. What is meant by Islamisation? How far was the spread of Islam as a religion bound up with the spread of Muslim culture? To what extent are Islamisation and conversion parallel processes? How is Islamisation connected to Arabisation? What role do vernacular Muslim languages play in the promotion of Muslim culture? The broad, comparative perspective allows readers to develop a thorough understanding of the process of Islamisation over eleven centuries of its history.

Ibrahim background, not with the outer appearance of things, but with their inner reality, the meaning of Islamic ethical culture. Ibrahim opens doors to new dimensions of the unity and variety in form and meaning of the moral values since the dawn of the Muslim era.

Janson's Short History of Art Horst Woldemar Janson, Penelope J. E. Davies, 2009

The World of Art Robert Payne, 2014-10-23 Very few books try to capture a subject as vast as the world of art, and even fewer succeed. But Robert Payne has succeeded, and in this book he portrays, in vivid, fresh, nontechnical language, the entire history and achievement of the world's artists—from the original caveman painters who decorated their homes with animal paintings to contemporary artists, who fill their canvases with often bewildering abstract forms. Payne approaches each artistic period and each great artist with sympathetic understanding and an appreciation of the values and aesthetic ideals of the time. Through carefully chosen illustrations woven into his text, moreover, he shows exactly what makes a work of art great. WORLD OF ART casts its view over all the types of art: not only the Western tradition, but the contributions of Egypt, Persia, India, China, Japan, and other important cultures as well. Yet the book is more than a mere survey, for Robert Payne's special brilliance lies in showing the common spirit and aspiration that have united all the world's great artists. "The main value of this book is spontaneity. There is nothing pedantic about it. Although it ranges all over the world art from its earliest beginnings to the present, the author keeps the flow of his account moving at a rapid pace. Its importance is to offer a fast-paced critical reassessment of the history of art in terms of today's outlook. Mr. Payne relies chiefly on a beautiful use of language, which

enables him to telescope the essence of a culture or period into a few well-turned paragraphs. He gives the reader a dynamic reevaluation based on critical judgments and first-hand observations rather than a rehash of conventional academic views... "Rather than the pedantic accuracy of an encyclopedia approach, Mr. Payne's book possesses the rare quality of persuasiveness and enthusiasm, and it will send the reader off to go and look." —Henry A. La Farge, Senior Editor, Art News

Islamic Art and Architecture 650-1250 Richard Ettinghausen, Oleg Grabar, Professor Emeritus of Islamic Art and Architecture Oleg Grabar, Marilyn Jenkins, 2003-07-11 This richly illustrated book provides an unsurpassed overview of Islamic art and architecture from the seventh to the thirteenth centuries, a time of the formation of a new artistic culture and its first, medieval, flowering in the vast area from the Atlantic to India. Inspired by Ettinghausen and Grabar's original text, this book has been completely rewritten and updated to take into account recent information and methodological advances. The volume focuses special attention on the development of numerous regional centers of art in Spain, North Africa, Egypt, Syria, Anatolia, Iraq, and Yemen, as well as the western and northeastern provinces of Iran. It traces the cultural and artistic evolution of such centers in the seminal early Islamic period and examines the wealth of different ways of creating a beautiful environment. The book approaches the arts with new classifications of architecture and architectural decoration, the art of the object, and the art of the book. With many new illustrations, often in color, this volume broadens the picture of Islamic artistic production and discusses objects in a wide range of media, including textiles, ceramics, metal, and wood. The book incorporates extensive accounts of the cultural contexts of the arts and defines the originality of each period. A final chapter explores the impact of Islamic art on the creativity of non-Muslims within the Islamic realm and in areas surrounding the Muslim world.

International encyclopaedia of Islam A. H. Qasmi, 2006 Islam is a perfect faith and way of life. It is a complete system in itself, for the life in this world and the next world. For knowing Islam, it is essential to study its philosophy, ideology and principles and for that, one has to approach original sources, viz. Holy Quran and Tradition. However, it is not possible for every one to refer to these sources, which are originally in Arabic. Of course, there are commentaries and explanatory books in Persian, Urdu as well as in English and other western languages. Still, it remains difficult to take benefit of these voluminous secondary sources. Hence, a dire need for a comprehensive and exhaustive work on Islam was felt. This exclusive multi-volume is aimed at filling that room. The International Encyclopaedia of Islam consists of nine volumes and successfully covers all important aspects of Islam, as a religion and faith. These volumes, namely are: 1. Islamic Philosophy, 2. Faith in Islam, 3. Principles of Islam, 4. Islamic Manners, 5. Islam and Social Justice, 6. Judicial System in Islam, 7. Human Rights in Islam, 8. Islam and Education, 9. Science and Islam. These volumes virtually cover the whole Islam in a nutshell, which makes them reader-friendly. This multi-volume is essential for all scholars, researchers, students and general readers, the world over.
