International Communications Strategy Silvia Cambié, Yang-May Ooi, 2009-07-03 International Communications Strategy is about the cross-cultural challenges currently facing PR practitioners. Offshoring, globalisation and the rise of China and India have been triggering unprecedented change in the communication sector. New channels of global communications are also being opened up by social media tools, bringing different cultures across the world together instantaneously online. Understanding cross-cultural aspects of PR includes understanding the culture of different societies, online culture itself and cross-border uses of social media. Communication is seen less and less as an operational function. While in the past organizations seemed to need

communication practitioners only for colourful brochures and press releases, you are now expected to provide strategic advice and help senior executives to engage effectively with stakeholders in various parts of the world. At the same time, you are required to be knowledgeable about social media and internet cultures and to be able to link on-line and off-line PR work successfully. By providing information on alternative approaches as well as containing cross-cultural case-studies and examples, the book will give you points of reference and ideas that you will be able to use every time you are asked to provide strategic communication guidance to senior management/clients.

North Africa's Arab Spring George Joffé, 2013-10-18

This book addresses issues surrounding the evolution of the Arab Spring in North Africa. After a general introduction and explanation of the events on a region-wide basis, it turns to examine aspects of each of the countries concerned. The role of the Muslim Brotherhood during the Nasser regime and in the contemporary situation is compared, together with an analysis of the emergence of new political parties in Egypt. The book analyses the links between social media and satellite television during the revolution in Egypt. This is followed by a study of the intellectual and cultural background to the Tunisian revolution and an analysis of the new political parties in Tunisia. It also looks at the revolution process in Libya and concludes with a study of why there was no revolution in Algeria and how the Moroccan monarchy was able to sideline those who challenged it at the price of constitutional changes that are essentially cosmetic. This book was originally published as a special issue of The Journal of North African Studies.
