Reading Plato's Dialogues to Enhance Learning and Inquiry Mason

Marshall, 2020-12-29 This scholarly volume proposes protreptic as a radically new way of reading Plato's dialogues leading to enhanced student engagement in learning and inquiry. Through analysis of Platonic dialogues including Crito, Euthyphro, Meno, and Republic, the text highlights Socrates' ways of fostering and encouraging self-examination and conscionable reflection. By focusing his work on Socrates' use of protreptic, Marshall proposes a practical approach to reading Plato, illustrating how his writings can be used to enhance intrinsic motivation amongst students, and help them develop the thinking skills required for democratic and civic engagement. This engaging volume will be of interest to doctoral students, researchers, and scholars concerned with Plato's dialogues, the philosophy of education, and ancient philosophy more broadly, as well as post-graduate students interested in moral and values education research.

The Witchcraft Reader Darren Oldridge, 2002 The excellent reader offers a selection of the best historical writing on witchcraft, exploring how belief in witchcraft began, and the social and context in which this belief flourished.

Pro VS 2005 Reporting using SQL Server and Crystal Reports Rod

Paddock, Kevin Goff, 2007-02-01 Creating clear and comprehensive reporting functionality is one of the most important, and most misunderstood, tasks that developers do in professional life. The reports they generate are used by both their clients and their own managers to assess the performance of their applications and to gauge how well the application meets business objectives. This book shows how to use Visual Studio 2005 and complementary technologies, such as Crystal Reports, to quickly and simply create fast, flexible reporting for applications of any size. In this book our experienced author team shows how to create the best results as efficiently as possible.

The Saturday Review of Politics, Literature, Science and Art ,1888

Using Computers in the Law Office Brent D. Roper, 2003-08-07

This is the text instructors and students turn to for up-to-date, practical information about how legal assistants can maximize the use of computers to do their work most effectively. Legal timekeeping and billing, case management and docket control software, litigation support software, and Internet legal/factual research are just some of the computer-related topics covered. The material also includes legal applications related to database management, word processing, spreadsheets and presentation graphics. Students will welcome the greatly expanded, hands-on tutorials in this edition. The text also examines the expanded role of new technologies, mobile computing, document management,

security, ethics, the electronic courthouse and many other trends in legal computing.
