Pastels and Pedophiles Mia Bloom, Sophia Moskalenko, 2021-06-15 A NEW YORK TIMES EDITORS' PICK / TOP 10 RECOMMENDED READ Two experts of extremist radicalization take us down the QAnon rabbit hole, exposing how the conspiracy theory ensnared countless Americans, and show us a way back to sanity. In January 2021, thousands descended on the U.S. Capitol to aid President Donald Trump in combating a shadowy cabal of Satan-worshipping pedophiles. Two women were among those who died that day. They, like millions of Americans, believed that a mysterious insider known as Q is exposing a vast deep-state conspiracy. The QAnon conspiracy theory has ensnared many women, who identify as members of pastel QAnon, answering the call to save the children. With *Pastels and Pedophiles*, Mia Bloom and Sophia Moskalenko explain why the rise of QAnon should not surprise us: believers have been manipulated to follow the baseless conspiracy. The authors track QAnon's unexpected leap from the darkest corners of the Internet to the filtered glow of yogi-mama Instagram, a frenzy fed by the COVID-19 pandemic that supercharged conspiracy theories and spurred a fresh wave of Q-inspired violence. *Pastels and Pedophiles* connects the dots for readers, showing how a conspiracy theory with its roots in centuries-old anti-Semitic hate has adapted to encompass local grievances and has metastasized around the globe—appealing to a wide range of alienated people who feel that something is not quite right in the world around them. While QAnon claims to hate Hollywood, the book demonstrates how much of Q's mythology is ripped from movie and television plot lines. Finally, *Pastels and Pedophiles* lays out what can be done about QAnon's corrosive effect on society, to bring Q followers out of the rabbit hole and back into the light.

Answering Yes/no Questions by the BERT Language Model Chin-yi Wu, 2020 As the Graphics Processing Unit (GPU) technology advances, there is a boom in the use of deep learning for tasks in Machine Learning and Natural Language Processing (NLP). Recently NLP has seen a considerable amount of literature about Question Answering (QA) using deep learning approaches. Most of these works concentrate on short answer and dialogue tasks in English. In this paper, answering the yes/no questions in Chinese using the deep learning approach will be our topic of research as it is less studied in the literature. Based on a public Chinese QA dataset, a pre-trained Chinese BERT (Bidirectional Encoding Representation of Transformer) language model will be fine-tuned and evaluated. The result shows that for the five expanded datasets, our two-class or three-class models can all obtain a good accuracy using the 10-fold cross validation. Our approach can achieve a high accuracy using 10-fold cross validation. We expanded our

dataset to create five different datasets to use. In addition, we also provided the model to predict the three-class task.

Power, Politics, and Paranoia Jan-Willem van Prooijen,Paul A. M. van Lange,2014-05-29 Powerful societal leaders - such as politicians and Chief Executives - are frequently met with substantial distrust by the public. But why are people so suspicious of their leaders? One possibility is that 'power corrupts', and therefore people are right in their reservations. Indeed, there are numerous examples of unethical leadership, even at the highest level, as the Watergate and Enron scandals clearly illustrate. Another possibility is that people are unjustifiably paranoid, as underscored by some of the rather far-fetched conspiracy theories that are endorsed by a surprisingly large portion of citizens. Are societal power holders more likely than the average citizen to display unethical behaviour? How do people generally think and feel about politicians? How do paranoia and conspiracy beliefs about societal power holders originate? In this book, prominent scholars address these intriguing questions and illuminate the many facets of the relations between power, politics and paranoia.

Dictionary of Languages Andrew Dalby,2015-10-28 Covering the political, social and historical background of each language, Dictionary of Languages offers a unique insight into human culture and communication. Every language with official status is included, as well as all those that have a written literature and 175 'minor' languages with special historical or anthropological interest. We see how, with the rapidly increasing uniformity of our culture as media's influence spreads, more languages have become extinct or are under threat of extinction. The text is highlighted by maps and charts of scripts, while proverbs, anecdotes and quotations reveal the features that make a language unique.

Educational Values and Cognitive Instruction Lorna Idol,Beau Fly Jones,2013-12-16 This volume is a comprehensive guide to state-of-the-art research on thinking, cognitive instruction, social values, and reform. Cognitive instruction for at-risk students is discussed in great detail along with a thorough examination of the teaching of thinking skills from the viewpoint of educational values and school culture. The issues of thinking, learning, and cognitive instruction are linked to the educational reform movement from numerous perspectives. Specifically, the reader can better anticipate which aspects of research on thinking will conflict with existing paradigms and which aspects of schooling will be most resistant to change.

Stress Tested: The Covid-19 Pandemic and Canadian National Security Leah West,2021-12 The emergence of COVID-19 has raised urgent and important questions about the role of Canadian intelligence and national security within a global health crisis. Some argue that the effects of COVID-19 on Canada represent an intelligence failure, or a failure of early warning. Others argue that the role of intelligence and national security in matters of health is--and should remain--limited. At the same time, traditional security threats have rapidly evolved, themselves impacted and influenced by the global pandemic. Stress Tested brings together leading experts to examine the role of Canada's national security and intelligence community in anticipating, responding to, and managing a global public welfare emergency. This interdisciplinary collection offers a clear-eyed view of successes, failures, and lessons learned in Canada's pandemic response. Addressing topics including supply chain disruptions, infrastructure security, the ethics of surveillance within the context of pandemic response, the threats and potential threats of digital misinformation and fringe beliefs, and the challenges of

maintaining security and intelligence operations during an ongoing pandemic, *Stress Tested* is essential reading for anyone interested in the lasting impacts of the COVID-19 pandemic.

Basic Course in Azerbaijani Fred W. Householder, Mansour Lofti, 1965 This collection of essays and reviews represents the most significant and comprehensive writing on Shakespeare's *A Comedy of Errors*. Miola's edited work also features a comprehensive critical history, coupled with a full bibliography and photographs of major productions of the play from around the world. In the collection, there are five previously unpublished essays. The topics covered in these new essays are women in the play, the play's debt to contemporary theater, its critical and performance histories in Germany and Japan, the metrical variety of the play, and the distinctly modern perspective on the play as containing dark and disturbing elements. To compliment these new essays, the collection features significant scholarship and commentary on *The Comedy of Errors* that is published in obscure and difficult accessible journals, newspapers, and other sources. This collection brings together these essays for the first time.
