*Advances in Managing Humanitarian Operations*

Christopher W. Zobel, Nezhir Altay, Mark P.

Haselkorn, 2015-12-17 This volume provides a survey of current research problems and results in humanitarian operations research. Additionally, it discusses existing applications of humanitarian operations research, and considers new research efforts that clearly extend existing research and applications. The book is divided into three sections that provide an overview of the subject, a look at the theory, and an examination of applications. The overview section presents chapters on modeling approaches and metrics to evaluate nonprofit operations; chief findings of fieldwork research in disaster response logistics; the use of cash as a form of relief; and measuring markets that supply cash-based humanitarian interventions. The theory section includes chapters that examine the partner proliferation problem in disaster response networks; a case study of humanitarian logistics that examines how humanitarian culture informs change adoption; and a look at the current state of the art for information visibility in humanitarian operations. Finally, the application section focuses on blood products, vaccines, and food assistance, with individual chapters on efficient inventorying and distribution of blood products during disasters; a detailed look at modeling in the context of the

vaccine supply chain; a framework for achieving equity, effectiveness, and efficiency in food bank operations; and a spatio-temporal vulnerability assessment of the resilience of a population affected by sudden lack of food.

Mobile Communication in Everyday Life Joachim Höflich, Maren Hartmann, 2006-05-03 The mobile phone has become an integral part of our everyday life communication – in this sense a domestication of a 'nomadic' medium has taken place. For the very reason that the telephone has left its fixed home environment, it requires us to take an 'ethnographic view' in describing both this development and the changes taking place therein. Mobile Communication in Everyday Life takes a closer look at the mobile phone as an object of inquiry in the tradition of the so-called media ethnography. Consequently, the benefits and limitations of such research designs are the focus of the book. Some contributions focus on the tension between private and public communication, others on cultural dimensions. Overall, the book presents a range of the most up-to-date research in the field of mobile communication.
