**Successful negotiation with the Driver-Seat Concept** Hermann Rock,2023-06-05 With this book, Hermann Rock provides time-structured core negotiation strategies that can be immediately applied in practice. The author's expertise comes primarily from negotiations in the context of M&A transactions and management investments. However, the concepts presented are equally applicable to

negotiations of financing, car purchase, lease or service contracts and thus universally applicable. Three (scientifically based) basic strategies are presented, which the reader can adapt to his or her specific negotiation situation. The examples chosen for illustration are concrete cases negotiated by the author himself. With the certainty of having understood the three basic strategies, the reader enters the negotiation with a positive basic mood and thus creates the basis for his negotiation success. Hermann Rock has successfully presented his strategies for negotiation management many times in lectures and magazines (Focus) and now presents them for the first time in book form as a consistent further development of the Harvard concept.

**Introduction to Information Systems** R. Kelly Rainer,Brad Prince,2023-09-20 Introduction to Information Systems, 10th Edition teaches undergraduate business majors how to use information technology to master their current or future jobs. Students will see how global businesses use technology and information systems to increase their profitability, gain market share, develop and improve their customer relations, and manage daily operations. This course demonstrates that IT is the backbone of any business, whether a student is majoring in accounting, finance, marketing, human resources, production/operations management, or MIS. In short, students will learn how information systems provide the foundation for all modern organizations, whether they are public sector, private sector, for-profit, or not-for-profit.
