Mobile Test Automation with Appium Nishant Verma,2017-06-30 Automate your mobile app testing About This Book How to automate testing with Appium Apply techniques for creating comprehensive tests How to test on physical devices or emulators Who This Book Is For Are you a mobile developer or a software tester who wishes to use Appium for your test automation? If so, then this is the right book for you .You must have basic Java programming knowledge. You don't need to have prior knowledge of Appium. What You Will Learn Discover Appium and how to set up an automation framework for mobile testing Understand desired capabilities and learn to find element locators Learn to automate gestures and synchronize tests using Appium Take an incremental approach to implement page object pattern Learn to run Appium tests on emulators or physical devices Set up Jenkins to run mobile automation tests by easy to learn steps Discover tips and tricks to record video of test execution, inter app automation concepts Learn to run Appium tests in parallel on multiple devices simultaneously In Detail Appium is an open source test automation framework for mobile applications. It allows you to test all three types of mobile applications: native, hybrid, and mobile web. It allows you to run the automated tests on actual devices, emulators, and simulators. Today, when every mobile app is made on at least two platforms, iOS and Android, you need a tool that allows you to test across platforms. Having two different frameworks for the same app increases the cost of the product and time to maintain it as well. Appium helps save this cost. With mobile app growth exploding, mobile app automation is mainstream now. In this book, author Nishant Verma provides you with a firm grounding in the concepts of Appium while diving into how to set up appium & Cucumber-jvm test automation framework, implement page object design pattern, automate gestures, test execution on emulators

and physical devices, and implement continuous integration with Jenkins. The mobile app we have referenced in this book is Quikr because of its relatively lower learning curve to understand the application. It's a local classifieds shopping app. Style and approach This book takes a practical, step-by-step approach to testing and automating individual apps such as native, hybrid, and mobile web apps using different examples.

Bank Exam Pedia Bharath Seeman, 2015-02-17 In this present era of competition, every competitive examination consists of 5 sections Quantitative Aptitude, Reasoning, General English, Computer Science and General Awareness related to banking industry. After teaching more than 18,000 students in 28 years, we have seen a lot of students spending their time practicing aptitude and reasoning alone. But the students who cleared the exam would definitely say the above method of practicing would not help because merely passing in Aptitude and Reasoning sections will not help. Students should also think about the other sections and overall cut off. We know a lot of students who cleared all the sections but failed to clear the overall cut off. In fact, Practicing GK and English is the only way to raise the overall cut-off. So, we have decided to dedicate this entire magazine just for General Awareness & Banking awareness. We sincerely believe that students who practice the next 100 pages would secure 40 marks from the Banking awareness section. We thank Google Play for publishing our e-magazine on their mobile platform. We also thank our students who assisted to bring this magazine out.

Boom Country? Alan Rosling, 2017-05-20 In Boom Country?, Alan Rosling, entrepreneur and strategic advisor in India for over 35 years, explores an unmistakable and profound change that is underway in the Indian business landscape. A fresh wave of enterprise

and start-ups; rapid advancements in technology; government reform; and recently developed pools of risk capital, he holds, are contributing increasingly to a massive expansion in new business ? all of it underpinned by a deep social change, a willingness to `do things differently?, especially among the young. Drawing upon his own experiences and more than 100 interviews with Indian entrepreneurs ? representing traditional leading business houses (Tata, Mahindra and Godrej), established first-generation entrepreneurs (Sunil Mittal, Kishore Biyani and Narayana Murthy, among others) and new-generation start-ups (including Sachin Bansal, Bhavish Aggarwal and Vijay Shekhar Sharma) ? as well as forces of the government, Rosling provides an incisive and in-depth analysis of the opportunities and challenges, both traditional and contemporary, of doing business in India. Yet, the growing uncertainty of global trends and India's own record of under-performing despite its massive potential, lead him to one vital question: Can the current upsurge in entrepreneurial activity ? imperfect and early as it may be ? really reshape India's economy and propel it towards becoming a true boom country for new enterprise?

Research Anthology on Strategies for Using Social Media as a Service and Tool in Business Management Association, Information Resources, 2021-05-28 Social media has become an integral part of society as social networking has become a main form of communication and human interaction. To stay relevant, businesses have adopted social media tactics to interact with consumers, conduct business, and remain competitive. Social technologies have reached a vital point in the business world, being essential in strategic decision-making processes, building relationships with consumers, marketing and branding efforts, and other important areas. While social media continues to gain importance in modern society, it is essential to determine how it functions in contemporary business. The Research Anthology on Strategies for Using Social Media as a Service and Tool in Business provides updated information on how businesses are strategically using social media and explores the role of social media in keeping businesses competitive in the global economy. The chapters will discuss how social tools work, what services businesses are utilizing, both the benefits and challenges to how social media is changing the modern business atmosphere, and more. This book is essential for researchers, instructors, social media managers, business managers, students, executives, practitioners, industry professionals, social media analysts, and all audiences interested in how social media is being used in modern businesses as both a service and integral tool.

VUCA in Start-ups Dr. Aseem Chauhan, Prof. (Dr.) Manoj Joshi, Prof. (Dr.) Ashok Kumar & Suhayl Abidi, 2021-12-25 How to Thrive as a Start-Up in an Uncertain World What motivates a start-up in its journey? Wealth and fame? Or is it hunger for innovation? VUCA in Start-Ups attempts to capture a start-up's entrepreneurial journey and find out why some do well when others don't. It's a highly volatile environment out there for entrepreneurs and start-ups, thanks to the unprecedented Covid-19 crisis filled with volatility, uncertainty, complexity and ambiguity (VUCA). Many businesses that did well in the past had to shut shop as a result. So what went wrong? To find the answer, it's important to understand what worked in the past and why a new venture must discover fresh and innovative opportunities to survive. Learn from those who chose the road less travelled, including Zomato, Paytm, Flipkart, Ola Cabs and Quikr, and discover the underlying causes for start-up successes and failures. These well-researched case studies aim to inspire those who wish to

embark on an entrepreneurial journey.

Entrepreneurship in India Alexander Newman,Andrea North-Samardzic,Madhura Bedarkar,Yogesh Brahmkar,2021-09-30 The economic liberalization in India over the last three decades has provided a wealth of opportunity for entrepreneurs looking to start and expand their businesses. Since the economy opened up in the 1990s, entrepreneurial activity in the private sector has been largely responsible for the strong economic growth experienced in the country. India is presently the world's third largest source of start-ups, and was ranked the second most entrepreneurial country in the world in the recent Global Entrepreneurship Monitor (GEM) report, ahead of large economic powerhouses such as the United States, China and the UK. Entrepreneurship in India looks at the dynamic and changing nature of entrepreneurship in India. The book examines the history of entrepreneurship in India, different entrepreneurship models adopted, the entrepreneurial ecosystem and looks at the future of entrepreneurship in the country. This book will benefit businesspeople, policy makers and researchers looking to understand more about entrepreneurship in India, and offers guidance to foreign businesses looking to engage with entrepreneurs in India.

The Millennials Subramanian S Kalpathi,2016-09-15 Born between the early 1980s and 2000s, the millennials are the youngest (and on several occasions, the largest) generation at work today. In this first comprehensive book with discerning research, Subramanian Kalpathi turns the modern workplace on its head and asks pressing questions about what makes this raring-to-go generation tick. With case studies of millennial organizations and interviews with over 100 achievers, The Millennials will give you an informed view of how the future will look by explaining the goals, motivations and dreams of the people who will run it.

Internet Altering Indian Households Avani Maniar,Leena Chauhan,2020-08-25 Technological advancement is helping mankind to live a better life. Internet being one of the best examples of technological advancement is a boon to society. The present research aimed to study the extent of internet usage by married women of Vadodara city for performing their household responsibilities. The sample of the study was selected through purposive and snowball techniques. However, the data was collected through both qualitative and quantitative methods. A structured questionnaire was used to collect the quantitative data whereas an interview schedule was used to collect qualitative data. The data were analyzed using different statistical measures viz ANOVA, Postdoc, Intensity Indices. The findings of the study also revealed that the internet was used to a moderate extent by married women for performing their household responsibilities. Internet usage for household responsibilities was high for socializing and entertainment related household responsibilities whereas it was moderate for kitchen management and child care management related household responsibilities. There were significant differences in usage of internet for overall household responsibilities performed by married women in relation with their age, years of marriage, type of internet user, and experience of using the internet. Married women who were- younger mothers, recently married, heavy internet user, had a single child and good experiences of using internet showed high usage of internet for performing household responsibilities. The findings also indicated that married women had overall fair experiences while using the internet. A higher percentage of married women (37.50%) did not face any problem while using the internet. A little less than forty percent (39.40%) of them faced more personal problems whereas little more than one third (35.69%) of them faced more technical problems. The qualitative findings also reflected the use of the internet by married women for kitchen management, childcare, finance management and socialization and entertainment related household responsibilities. Married women suggested to have a training

session on the effective use of the internet for performing household responsibilities. The findings of the study highlighted the varied use of the internet for the performance of household responsibilities.

Asymmetric information on non-cognitive skills in the Indian labor market: An experiment using an online job portal Yamauchi, Futoshi, Nomura, Shinsaku, Imaizumi, Saori, Areias, Ana, Chowdhury, Afra, 2018-07-20 This paper examines the impact of non-cognitive (socio-emotional) skills on job market outcomes using a randomized control trial implemented in an online job portal in India. Job seekers who registered in the portal were asked to take a Big Five type personality test and, for a random sub-sample of the test takers, the results were displayed to potential employers. Outcomes are measured by whether a potential employer shortlists a seeker by opening (unlocking) his/her application and background information. The results show that the treatment group for whom test results

were shown generally enjoyed a higher probability of unlock. That is, employers are more interested in those for whom they can see personality test results. Such a relationship was not seen in the pre-test period, which confirms that the above results are unlikely to be spurious. We also found a significant impact among organized, calm, imaginative and/or quiet applicants (no effect was detected among easy-going, sensitive, realistic and/or out-going applicants), which seems to display employers' preferences.
