Econometric Modelling of Stock Market Intraday Activity Luc Bauwens,Pierre Giot,2001-08-31 The recent widespread availability of intraday tick-by-tick databases for stocks, options and currencies has had an important impact on research in applied financial econometrics and market microstructure. Econometric Modelling of Stock Market Intraday Activity focuses on the econometric modelling of intraday tick-by-tick transaction data (trades and quote) for stock traded on the New York Stock Exchange (NYSE). Recent quantitative modelling tools such as intraday duration models and GARCH modes are presented. A survey of trading mechanisms in financial markets and a review of market microstructure issues is also included, which allows to gain a better understanding of the motivation underlying the use of the quantitative models. In the empirical applications, the link is made with the models of the market microstructure literature that have proposed an explicit treatment of time in the trading process. Other empirical applications deal with the modelling of intraday volatility and intraday Value-at-Risk. Although the models are applied to data for stock traded on the NYSE, they are not specific to this exchange and could be used to analyze other existing trading mechanisms. Accordingly, this book should be of interest to academics and graduate students involved in empirical finance and applied econometrics, regulators working for exchanges, and practitioners in banks or brokerage firms.

And I Quote Vitchel Toussaint,2016-05-03 For the past 3 years I've created & recorded quotes about my daily life, world issues, random thoughts, meditation, love, money & more.This book is a compilation of 100 original quotes & thoughts by me. My entire life has been much like yours. It's been filled with plenty of hugs, laughter, heated arguments, love, fear, triumphs, failures and just about every other possible curve this rollercoaster called life decides to take us on the journey for. The beauty behind it all, of course, is not that we all experience the same curves but rather our seat on the coaster; which allows for a different vantage point at every turn. Today, I offer up my seat to you! So share with me. What do you see?

Ancient Memory Katharine Mawford,Eleni Ntanou,2021-07-05 Although the recent ‘memory boom’ has led to increasing interdisciplinary interest, there is a significant gap relating to the examination of this topic in Classics. In particular, there is need for a systematic exploration of ancient memory and its use as a critical and methodological tool for delving into ancient literature. The present volume provides just such an approach, theorising the use and role of memory in Graeco-Roman thought and literature, and building on the background of memory studies. The volume’s contributors apply theoretical models such as memoryscapes, civic and cultural memory, and memory loss to a range of authors, from Homeric epic to Senecan drama, and from historiography to Cicero’s recollections of performances. The chapters are divided into four sections according to the main perspective taken. These are: 1) the Mechanics of Memory, 2) Collective memory, 3) Female Memory, and 4) Oblivion. This modern approach to ancient memory will be useful for scholars working across the range of Greek and Roman literature, as well as for students, and a broader interdisciplinary audience interested in the intersection of memory studies and Classics.
