Quran Teaching Made Simple for Women (Goodword) Saniyasnain Khan,2014-02-19 The Prophet Muhammad Storybook-2 takes the reader back to the early days of Makkah when the Prophet reached manhood. It tells of how he became a successful merchant, married Khadija, a wealthy business woman, and then soon thereafter gave up all worldly activities in search of the truth. How he attained prophethood and began his mission is related in a series of fascinating stories. Everything is covered from the first revelation of the Quran by the Archangel Jibril, to the early preaching of the Prophet and the opposition of the people of Makkah. This book then goes on to narrate amazing tales of how Islam began to spread in Makkah. The Prophet Muhammad Storybook-2, meant for 7 year olds and above, encourages children to discover for themselves the message of the life of the Prophet and to find their own ways of applying the Prophet's timeless teachings to their lives. Hashtag Islam Gary R. Bunt,2018-09-25 Gary R. Bunt is a twenty-year pioneer in the study of cyber-Islamic environments (CIEs). In his new book, Bunt explores the diverse and surprising ways digital technology is shaping how Muslims across vast territories relate to religious authorities in fulfilling spiritual, mystical, and legalistic agendas. From social networks to websites, essential elements of religious practices and authority now have representation online. Muslims, embracing the immediacy and general accessibility of the internet, are increasingly turning to cyberspace for advice and answers to important religious questions. Online environments often challenge traditional models of authority, however. One result is the rise of digitally literate religious scholars and authorities whose influence and impact go beyond traditional boundaries of imams, mullahs, and shaikhs. Bunt shows how online rhetoric and social media are being used to articulate religious faith by many different kinds of Muslim organizations and individuals, from Muslim comedians and women's rights advocates to jihad-oriented groups, such as the Islamic State and al-Qaeda, which now clearly rely on strategic digital media policies to augment and justify their authority and draw recruits. This book makes clear that understanding CIEs is crucial for the holistic interpretation of authority in contemporary Islam.

Proceedings of the 2nd UPY International Conference on Education and Social Science (UPINCESS 2023) Ari Kusuma Wardana,2024-01-31 This is an open access book. Technology has had a huge impact on education and social dynamics around the world. Since the introduction of information and communication technologies (ICTs), such as the internet, smartphones and social media, much has changed in the way we learn and interact with others. In education, technology has enabled students and teachers to access more diverse and engaging educational resources. With internet access, students and teachers can access educational resources from all over the world and learn about various topics and disciplines. In addition, technology also enables distance learning, which allows students and teachers to connect from different locations. However, there are also negative impacts of using technology in education. For example, excessive use of social media and the internet can cause concentration disorders and addiction in students. In addition, too much reliance on technology can also reduce students' ability to think critically and solve problems independently. In social dynamics, technology has allowed us to connect with people from all over the world and paved the way for greater collaboration and cultural exchange. However, technology has also brought negative impacts on social dynamics, such as the spread of fake news or hoaxes, cyberbullying, and social media addiction. In this regard, technology can be a very useful tool if used wisely and with proper understanding of its impact. Therefore, to support this, Universitas PGRI Yogyakarta was hold an international conference and Call for Papers The 2nd UPY International Conference on Education and Social Science (UPINCESS) "The Impact of Technology on Education and Social Dynamics" on September 27, 2023.
