The Quran Allah,2023-12-16 The Quran is the central religious text of Islam, believed by Muslims to be a revelation from Allah. Muslims regard the Quran as Muhammad's most important miracle; a proof of his prophethood; and the culmination of a series of divine messages. The Quran describes itself as a book of guidance for mankind. It offers detailed accounts of specific historical events, and it often emphasizes the moral significance of an event over its narrative sequence. The Quran consists of 114 chapters of varying lengths, each known as a sūrah. Chapters are classified as Meccan or Medinan, depending on whether the verses were revealed before or after the migration of Muhammad to the city of Medina. Each sūrah consists of several verses, known as āyāt, which originally means a sign or evidence sent by God. The Quranic content is concerned with basic Islamic beliefs including the existence of God and the resurrection. Narratives of the early prophets, ethical and legal subjects, historical events of Muhammad's time, charity and prayer also appear in the Quran. The Quranic verses contain general exhortations regarding right and wrong and historical events are related to outline general moral lessons. In this edition of Quran the sūrah are ordered chronologically.

The Numerical And Time Correlations In The Quran Sahal A. Mohamed,2018 Scholars have analyzed the Holy Quran for centuries, adopting practices and guidelines drawn from its wisdom. Their studies, however, focus on the literal meaning of its verses. In this ground-breaking work, Sahal A. Mohamed uses a numerological approach to interpret the hidden meanings in the holy book. He begins with a simple question: If the Quran is truly the word of Allah, can this be shown mathematically? Through simple equations, his study uncovers correlations and patterns that prove the holy text is beyond the ability of any human, and is indeed the work of the Almighty. From the central tenets of the Islamic faith to the complexities of the human body, these numerical correlations show that the Holy Quran reflects Allah's mastery not only in its content, but in the very structure of the book itself. Its secrets are astounding in their elegance, and will help to unlock a greater understanding of our life on Earth and the foundations of space and time.

Prophets in the Quran Brannon M. Wheeler, 2002-06-18 What was the name of Noah's son who did not survive the Flood? Why do Pharaoh and Haman build the Tower of Babel? For what reasons does Moses travel to the ends of the Earth? Who is the 'Horned-One' who holds back Gog and Magog until the Day of Judgement? These are some of the questions answered in the oral sources and Quran commentaries on the stories of the prophets as they are understood by Muslims. Designed as an introduction to the Quran with particular emphasis on parallels with Biblical tradition, this book provides a concise but detailed overview of Muslim prophets from Adam to Muhammad. Each of the chapters is organized around a particular prophet, including an English translation of the relevant verses of the Quran and a wide selection of classical, medieval and modern Muslim commentaries on those verses. Quran commentaries include references to Sunni and Shi'i sources from Spain, Central Asia, the Middle East and Africa. An extensive glossary provides an annotated list of all scholarly transmitters and cited texts with suggestions for further reading. This is an excellent book for undergraduate courses, and students in divinity and seminary programmes. Comparisons between the Quran and Bible, and among Jewish, Christian and Islamic exegesis are highlighted. Oral sources, references adapted from apocryphal and pseudepigraphical works, and inter-religious dialogue are all evident throughout these stories of the prophets. This material shows how the Quran and its interpretation are integral to a fuller and more discerning understanding of the Bible and its place in the history of Western religion.

The Quran: With or Against the Bible? Ejaz Naqvi, MD, 2012-06-11 Too often we are tempted into thinking how wrong other people's religions and scriptures are, rather than focusing on what's right about our own. We act like some of our politicians during election campaigns rather than following the teachings of our own holy books. Breaking the trend, author Dr. Ejaz Naqvi provides an objective, topic-by-topic review of the two most read books in the world—the Holy Bible and the Holy Quran. The Quran: With or Against the Bible? addresses the key themes of the Quran and answers commonly asked questions in search of finding common ground: • Who wrote the Quran? • Who is the "God" of the Quran? • What is the Quranic view of the prophets, especially Moses and Jesus? • What does the Quran teach about interfaith relations? • Does the Quran promote peace and harmony between Muslims and the People of the Book, or does it promote violence? • How does the Quran compare to the Bible on important themes like worshipping God, the prophets, human rights, moral values, and fighting for justice and human dignity? • Does the Quran render women as second-class citizens? Dispelling major myths, The Quran: With or Against the Bible? Systematically analyzes and compares the similarities in the paths of guidance the two scriptures have bestowed upon mankind.

The Amazing Quran, Many centuries before the onset of Muhammad's prophethood, there was a well-known theory of atomism advanced by the Greek philosopher, Democritus. He and the people who came after him assumed that matter consists of tiny, indestructible, indivisible particles called atoms. The Arabs too, used to deal in the same concept; in fact, the Arabic word dharrah commonly referred to the smallest particle known to man. Now, modern science has discovered that this smallest unit of matter (i.e., the atom, which has all of the same properties as its element) can be split into its component parts. This is a new idea, a development of the last century; yet; interestingly enough, this information had already been documented in the Quran (Surah Saba', 34:3) which states: "He [i.e., Allah] is aware of an atom's weight in the heavens and on the earth and even anything smaller than that..."
