Peter Williams Designed To Race Peter Williams, 2012-10-14 On his day, Peter Williams was the best motorcycle road racer in the world and is one of that small band of sportsmen, 'the best never to win a World Championship'. Peter's unique career in the 1960s and 1970s as racer, designer and development engineer culminated in many great victories on bikes from 125cc to 750cc. For two months in 1967 he lead the 500cc class of the World Championship on his single cylinder 500cc MkI Arter Matchless Special against the much more powerful Honda and MV Augusta multis of Mike Hailwood and Giacomo Agostini. Just when he was, perhaps, due for a 'works' ride, the Japanese withdrew from Grand Prix road racing and Peter joined the re-emergent manufacturers of Norton. Peter had two consuming passions; riding his motorcycles at 10/10ths of the limit, and for Britain to regain motorcycle supremacy. Indeed, the latter was his mission, his crusade, and so he rode almost exclusively British motorcycles but, interestingly, won his only Grand Prix on a foreign one. Peter's engineering designs gave him advantage on the race track and set the trends for what motorcycles are today. He was one of the first to design and race with disc brakes, the first in the world to design and use cast magnesium wheels and tubeless tyres. Peter won the 1970 500cc class British Championship and was the first in motorcycle racing to benefit from tobacco sponsorship. The 1973 John Player Norton 'Monocoque' incorporated all his previous experiments and the first twin spar frame. The pinnacle of his career came on this machine when he won the Formula 750 TT in the Isle of Man with record race and lap speeds. Peter's racing career

came to an end in 1974 with a terrible crash at Oulton Park but his engineering continued with work at Cosworth Engineering and Lotus Engineering. Motorcycle innovation continues, too, with his true monocoque design, his Shell Chassis, which, in its electric drive form, finished 5th in its very first outing in the 2010 TT Zero.

Top Dead Center 2 Kevin Cameron, 2009-11-12 A second collection of articles and columns by one of the world's best motorcycle writers, arranged thematically and with brief new introductions by the author.

Motorcycle Road & Racing Chassis Keith Noakes, 2015-10-14 This book is an account of the companies and individuals, who have played a major part in the design and advancement of motorcycle frame (chassis) performance. These independent companies began to spring up in the early postwar years, when motorcycle racing began to take place again. Due to the lack of available factory machines and the urge to improve performance of the now aged equipment, riders began to build their own frames around whatever engines were available. Success brought recognition, and people were soon wanting to buy winning machines, so fledgling companies began to spring up to satisfy the growing demand for custom chassis. Some of these companies soon began to grow, and others appeared in various European countries over the next few years. The state-of-the-art hand built frames were becoming a must for the discerning road bike rider, and so the independent motorcycle frame makers were beginning to put some designs into production, and a thriving business was beginning to emerge. In later years, with such a large choice of factory engines from

around the world, the successful independent chassis manufacturers went from strength to strength and some are now producing highly prized road bikes, whilst building one-off machines as required. As the years have passed, one or two of the independent companies have disappeared, but in many cases their machines have become very collectable classics. The companies still thriving today, as well as producing modern machines with a wide range of engine options, are finding considerable business rebuilding and maintaining machines built in the earlier years. Some of the pioneer builders have become household names to the motorcycle fraternity, and those written about in this book include: Nico Bakker (The Netherlands), Bimota (Italy), Dresda Autos (United Kingdom), Egli (Switzerland), Harris Performance Products (United Kingdom), Hejira racing (United Kingdom), Magni (Italy), Maxton Engineering (United Kingdom), P&M Motorcycles (United Kingdom), Quasar (United Kingdom), Rickman UK (United Kingdom), Colin Seeley Racing (United Kingdom), Segale (Italy) and Spondon Engineering (United Kingdom). This book charts the history of these innovative companies with full specifications for many chassis, and is extensively illustrated throughout. A must for any motorcycle enthusiast, and a valuable reference for the trade.

Motorcycle Racing for Beginners I. G. Edmonds, 1977 Discusses aspects of motorcycle racing such as bike selection, riding techniques, and types of competitions.

This age-appropriate book gives readers a comprehensive look at motorcycle racing, with a focus on today's most popular events, such as Motocross and Supercross. This book will cover the entire streetbike extreme scene, from the early riders like Knievel and Domokos to the Starboyz and some of the other current popular groups.

A Guide to Motorcycle Racing Hedley J. Cox, 2015-05-14 United States motorcycle enthusiasts can learn a lot by looking to their peers in Europe, which has as rich a history as they do. Hedley J. Cox was living in England when he became involved in racing in the early 1950s. An engineer of the first order, he raced and designed machines and traveled with a team to International Grand Prix meetings in Europe. In this behind-the-scenes look at the world of motorcycle racing, you'll learn the answers to questions such as: How does management politics affect racing? Why did British motorcycle manufacturers lose the spirit of adventure that is so necessary in racing? What happened when that sense of adventure was lost? He also examines the state of racing in the Canada, where he raced for a big manufacturer after moving to the United States. At every turn and curve, he encouraged others to embrace new ideas to beat competitors. Join the author on a fascinating journey that spans thousands of miles with three different manufacturers with *A Guide to Motorcycle Racing*.

From the Race Shop Floor Hedley J. Cox, 2009-11 This is the inside story of how motorcycle race team of the 'forties worked. How a division in the company's outlook drove it to bankruptcy. The story of how a member of the racing team saw it all. How he participated in racing, and devised a new machine, but was swept aside. How he emigrated, and tried to get a factory to embrace a new world view but was frustrated again. Lessons that Detroit might heed. How he moved into an

academic program, and aided the US Air Force in its search for lower costs.

Mick Walker's German Racing Motorcycles Mick Walker, 2004-09-02 Under very different political regimes for a considerable period, East and West Germany produced some highly innovative & competitive racing machinery. German motorcycles were often in the vanguard of technical progress & were good enough to win world titles. In this respect, the top names in the solo categories were NSU and Kreidler, while BMW, Fath, Munch, & König did the business on three wheels. Like Japan, Germany was faced with rebuilding a shattered country following World War II. Like the Japanese, they overcame all the problems not only to create an economic miracle, but also to construct world-beating motorcycles. Germany's success contributed to the development of the sport in a wide variety of ways -- engineers, machines, riders, circuits, & even record-breakers.
