The Art of the Racing Motorcycle Phillip Tooth, 2011-03-22 A lavishly illustrated and definitive look at the design evolution of the racing motorcycle. The dynamic between competition and design has always fueled the evolution of racing motorcycles and inspired astonishing feats of design and engineering. This book traces the development of the sport bike, from the earliest French motorcycles to the dominance of British machinery in the 1930s, the exotic Italian motorcycles of the 1950s and 1960s, the influence of American racing in the 1970s and 1980s, and today's Japanese superbikes. More than fifty classic motorcycles—from Harley-Davidsons to Peugeots, Velocettes, Moto Guzzis, BMWs, Kawasakis, and Ducatis—are presented chronologically illustrated with stunning studio photographs that present the machines as works of art and wonders of design in themselves, accompanied by rare and beautiful archival images that place the subjects in the contexts of classic races, rallies, and motorcycle shows, and accompanied by essays revealing the legends behind the machines. Some of the championship motorcycles featured include the 1902 Manon, the 1922 Harley Davidson 8-valve, the 1935 Terrot 500, the 1948 AJS Porcupine, the 1954 Moto Guzzi V8, the 1965 Honda GP 250, The 1976 Suzuki RK67, the 1986 Cagiva GP, and the 1990 Ducati Supermono.

*A Guide to Motorcycle Racing* Hedley J. Cox, 2015-05-14 United States motorcycle enthusiasts can learn a lot by looking to their peers in Europe, which has as rich a history as they do. Hedley J. Cox was living in England when he became involved in racing in the early 1950s. An engineer of the first order, he raced and designed machines and traveled with a team to International Grand Prix meetings in Europe. In this behind-the-scenes look at the world of motorcycle racing, you'll learn the answers to questions such as: How does management politics affect racing? Why did British motorcycle manufacturers lose the spirit of adventure that is so necessary in racing? What happened when

that sense of adventure was lost? He also examines the state of racing in the Canada, where he raced for a big manufacturer after moving to the United States. At every turn and curve, he encouraged others to embrace new ideas to beat competitors. Join the author on a fascinating journey that spans thousands of miles with three different manufacturers with *A Guide to Motorcycle Racing*.

*Motorcycle Road & Racing Chassis* Keith Noakes, 2015-10-14  
This book is an account of the companies and individuals, who have played a major part in the design and advancement of motorcycle frame (chassis) performance. These independent companies began to spring up in the early postwar years, when motorcycle racing began to take place again. Due to the lack of available factory machines and the urge to improve performance of the now aged equipment, riders began to build their own frames around whatever engines were available. Success brought recognition, and people were soon wanting to buy winning machines, so fledgling companies began to spring up to satisfy the growing demand for custom chassis. Some of these companies

soon began to grow, and others appeared in various European countries over the next few years. The state-of-the-art hand built frames were becoming a must for the discerning road bike rider, and so the independent motorcycle frame makers were beginning to put some designs into production, and a thriving business was beginning to emerge. In later years, with such a large choice of factory engines from around the world, the successful independent chassis manufacturers went from strength to strength and some are now producing highly prized road bikes, whilst building one-off machines as required. As the years have passed, one or two of the independent companies have disappeared, but in many cases their machines have become very collectable classics. The companies still thriving today, as well as producing modern machines with a wide range of engine options, are finding considerable business rebuilding and maintaining machines built in the earlier years. Some of the pioneer builders have become household names to the motorcycle fraternity, and those written about in this book include: Nico Bakker (The Netherlands), Bimota (Italy), Dresda Autos (United Kingdom), Egli (Switzerland), Harris Performance Products (United Kingdom), Hejira racing (United Kingdom), Magni (Italy), Maxton Engineering (United Kingdom), P&M Motorcycles (United Kingdom), Quasar (United Kingdom), Rickman UK (United Kingdom), Colin Seeley Racing (United Kingdom), Segale (Italy) and Spondon Engineering (United Kingdom). This book charts the history of these innovative companies with full specifications for many chassis, and is extensively illustrated throughout. A must for any motorcycle enthusiast, and a valuable reference for the trade.

In this colorful and creative tribute to his love of motorcycling and racing, Bonelli shares insights into life and death from the seat of a racing motorcycle that vividly celebrate the lifestyle he has embraced for fifty years. Bonelli offers a fascinating glimpse into the thought processes and life of a motorcycle racer, as he made lasting friendships, raced at speeds most would think insane, and met eclectic characters along the way. With his mind constantly on motorcycles and the next race, Bonelli details how the rest of his life seemed only incidental to his obsession with going fast. Whether racing on a 250 Harley Sprint or a TZ750 Yamaha, Bonelli shares anecdotes, poetry, and prose that illuminate the pure joy of what it is like to count down the minutes until he can zip his leathers, hop in his van with his bike in the back, and head out to race again. *Zen and the Art of Racing Motorcycles* shares a seasoned motorcycle racer's perspective on why he loves to ride with the wind with the throttle wide open and nothing but excitement and the possibility of a win before him.

**Mick Walker's German Racing Motorcycles** Mick Walker, 2004-09-02 Under very different political regimes for a considerable period, East and West Germany produced some highly innovative & competitive racing machinery. German motorcycles were often in the vanguard of technical progress & were good enough to win world titles. In this respect, the top names in the solo categories were NSU and Kreidler, while BMW, Fath, Munch, & König did the business on three wheels. Like Japan, Germany was faced with rebuilding a shattered country following World War II. Like the Japanese, they overcame all the problems not only to create an economic miracle, but also to construct world-beating motorcycles. Germany's success contributed to the development of the sport in a wide variety of ways -- engineers, machines, riders, circuits, & even record-breakers.
