R Bogdan

Border Radio Gene Fowler,Bill Crawford,2010-06-28 “Border Radio tells the 50,000-watt clear-channel story of the most outrageous and audacious phenomenon to ever hit the airwaves.”—Los Angeles Times Before the Internet brought the world together, there was border radio. These mega-watt “border blaster” stations, set up just across the Mexican border to evade U.S. regulations, beamed programming across the United States and as far away as South America, Japan, and Western Europe. This book traces the eventful history of border radio from its founding in the 1930s by “goat-gland doctor” J. R. Brinkley to the glory days of Wolfman Jack in the 1960s. Along the way, it shows how border broadcasters pioneered direct sales advertising, helped prove the power of electronic media as a political tool, aided in spreading the popularity of country music, rhythm and blues, and rock, and laid the foundations for today’s electronic church. The authors have revised the text to include even more first-hand information and a larger selection of photographs. “The magic of [a] wildly colorful chapter in broadcast history lives on in this entertainingly informative look at the forces and the people who contributed to the rise of the medium.”—Chicago Tribune “Characters like Wolfman Jack, Reverend Ike, Norman Baker, “Dr.” J. R. Brinkley, Pappy O’Daniel and others were master showmen and tremendously successful salesmen. Secret-formula medicines, magic prayer cloths, Crazy Water Crystals, and goat-gland rejuvenations are just part of this often hilarious telling of this outrageous period in broadcast history.”—Variety “If you’re wondering where Herbalife, Home Shopping Network, No-Money-Down Seminars, and Jim and Tammy Bakker found their inspiration and techniques, look no further than this superb book.”—Dallas Morning News

The Atmosphere and Ionosphere Vladimir Bychkov,Gennady Golubkov,Anatoly Nikitin,2010-07-17 From July 7 to 12, 2008 in Zelenogradsk, a cosy resort on the bank of the Baltic Sea near Kaliningrad in Russia, the 1st International Conference “Atmosphere, Ionosphere, Safety (AIS-2008)” has been carried out. The State Russian University of I. Kant, Semenov Institute of chemical physics of the Russian Academy of Sciences, Pushkov Institute of terrestrial magnetism and radio-waves propagation of the Russian Academy of Sciences, and Russian Committee on Ball Lightning (BL) have acted as organizers of the conference. Financial support was made by Russian Fund of Fundamental Research Project N. 08-03-06041 and European Of?ce of Aerospace Research and Development Grant award FA8655-08-1-5052. The International conference “Atmosphere, Ionosphere, Safety” (AIS-2008) was devoted to (i) the analysis of the atmosphere-ionosphere response on natural and man-made processes, the reasons of occurrence of the various accompanying geophysical phenomena, and an estimation of possible consequences of their in?uence on the person and technological systems; (ii) the study of the monitoring possibility and search of the ways for the risk level decrease. Discussion of the physical and chemical processes accompanying the observable geophysical p- nomena was undertaken. One can see from a list of the Conference sections that questions of safety took only rather modest place, so main topics of the Conference became discussion of processes taking place in the atmosphere, ionosphere and methods of monitoring these processes.

The Last Lecture Randy Pausch,2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

The chapter ‘WhatsApp in Politics?! Collaborative Tools Shifting Boundaries’ is open access under a CC BY 4.0 license at link.springer.com.

3D and Animated Lenticular Photography Kim Timby,2015-07-31 Scholars are increasingly investigating photography’s broad cultural role, expanding our understanding of the diversity of photographic practices. Kim Timby contributes to this new history of photography by examining the multifaceted story of images that animate with a flick of the wrist or appear vividly three-dimensional without the use of special devices—both made possible by the lenticular process. Using French case studies, this volume broadly weaves 3D and animated lenticular imagery into scientific and popular culture, from early cinema and color reproduction to the birth of modern advertising and the market for studio portraits, postcards, and religious imagery. The motivations behind the invention and reinvention of this pervasive form of imagery, from the turn of the twentieth century through the end of the pre-digital era, shed new light on our relationship to photographic realism and on the forceful interplay in photography between technological innovation and the desire to be entertained. *3D and Animated Lenticular Photography: Between Utopia and Entertainment* is a profusely illustrated and engaging interdisciplinary study of a wide-ranging body of images that have fascinated viewers for generations.
