Battling for Hearts and Minds Steve J. Stern, 2006-09-04 Battling for Hearts and Minds is the story of the dramatic struggle to define collective memory in Chile during the violent, repressive dictatorship of General Augusto Pinochet, from the 1973 military coup in which he seized power through his defeat in a 1988 plebiscite. Steve J. Stern provides a riveting narration of Chile's political history during this period. At the same time, he analyzes Chileans' conflicting interpretations of events as they unfolded. Drawing on testimonios, archives, Truth Commission documents, radio addresses, memoirs, and written and oral histories, Stern identifies four distinct perspectives on life and events under the dictatorship. He describes how some Chileans viewed the regime as salvation from ruin by Leftists (the narrative favored by Pinochet's junta), some as a wound repeatedly reopened by the state, others as an experience of persecution and awakening, and still others as a closed book, a past to be buried and forgotten. In the 1970s, Chilean dissidents were lonely "voices in the wilderness" insisting that state terror and its victims be recognized and remembered. By the 1980s, the dissent had spread, catalyzing a mass movement of individuals who revived public dialogue by taking to the streets, creating alternative media, and demanding democracy and human rights. Despite long odds and discouraging defeats, people of conscience—victims of the dictatorship, priests, youth, women, workers, and others—overcame fear and succeeded in creating truthful public memories of state atrocities. Recounting both their efforts and those of the regime's supporters to win the battle for Chileans' hearts and minds, Stern shows how profoundly the struggle to create memories, to tell history, matters. Battling for Hearts and Minds is the second volume in the trilogy The Memory Box of Pinochet's Chile. The third book will examine Chileans' efforts to achieve democracy while reckoning with Pinochet's legacy.

**Mobilizing for Human Rights** Beth A. Simmons, 2009-10-29 Beth Simmons demonstrates through a combination of statistical analysis and case studies that the ratification of treaties generally leads to better human rights practices. She argues that international human rights law should get more practical and rhetorical support from the international community as a supplement to broader efforts to address conflict, development, and democratization.

*Performing Utopias in the Contemporary Americas* Kim Beauchesne, Alessandra Santos, 2017-05-09 This book offers an innovative examination of the utopian impulse through performance as a proposition of practical engagement in the contemporary Americas. The volume compiles unique multidisciplinary and exploratory texts, applying diverse critical and artistic approaches. Its contributors reconceptualize utopia as a creative and theoretical method based on a commitment to sociopolitical transformation. Chapters are organized around notions of mapping utopias, indigenizing practices, political manifestations, and the construction of social identities.

*Eruptions, Initiatives and Evolution in Citizen Activism* Rajesh Tandon, L. David Brown, 2016-02-08 *Eruptions, Initiatives and Evolution in Citizen Activism* is the result of a collaborative research project spanning Asia, Africa, Latin America, and Europe. The book analyses internal and external challenges to civil society in more than twenty countries. It investigates through studies of countries that include South Africa, India and the Netherlands of civil society evolution; examinations of citizen activism, such as Occupy London, the Chilean student movement, the Cambodian farmers campaign against land grabs; regional overviews such as the Southern Cone

of Latin America, Southern Africa, and Russia. The studies identify changing roles, capacities, contributions and limitations of civil society in response to changing political, economic and social contexts. The book goes on to present selected studies, identifies patterns and lessons that emerge across countries and regions. It articulates implications of those lessons for practitioners and policy makers concerned with civil society contributions to national and regional development. This book was published as a special double issue of *Development in Practice*.

Pinochet's Economic Accomplices Juan Pablo Bohoslavsky, Karinna Fernández, Sebastián Smart, 2021-01-12 With a focus on Chile, this book demonstrates, with theoretical arguments and empirical studies, that focusing on the behavior of economic actors of the dictatorship is crucial to achieve basic objectives in terms of justice, memory, reparation, and non-repetition measures.

*Labor Politics in Latin America* Paul W. Posner, Viviana Patroni, Jean François Mayer, 2018-08-14 In recent decades, Latin American countries have sought to modernize their labor market institutions to remain competitive in the face of increasing globalization. This book evaluates the impact of such neoliberal reforms on labor movements and workers' rights in the region through comparative analyses of labor politics in Chile, Mexico, Argentina, Brazil, and Venezuela. Using these five key cases, the authors assess the capacity of workers and working-class organizations to advance their demands and bring about a more just distribution of economic gains in an era in which capital has reasserted its power on a global scale. In particular, their findings challenge the purported benefits of labor market flexibility—the freedom of employers to adjust their workforces as needed—which has been touted as a way to reduce income inequality and unemployment. In-depth case studies show how flexibilization as well as privatization, trade liberalization, and economic deregulation have undermined organized labor in all of these countries, leading to the

current internal fragmentation of unions and their inability to promote counterreforms or increase collective bargaining. This assessment concludes that even with substantial variation among countries in how reforms have been implemented, most workers in the region have experienced increasing precarity, informal employment, and weaker labor movements. This book provides vital insights into whether these movements have the potential to regain influence and represent working people's interests effectively in the future.

*Chineseness in Chile* Maria Montt Strabucchi, Carol Chan, María Elvira Ríos, 2021-12-15 This book explores the role of Chineseness or lo chino in the production of Chilean national identity. It does so by discussing the many voices, images, and intentions of diverse actors who contribute to stereotyping or problematizing Chineseness in Chile. The authors argue that in general, representing and perceiving China or Chineseness as the Other is part of a broader cultural and political strategy for various stakeholders to articulate Chile as either a Western country or one that is becoming-Western. The authors trace the evolution of the symbolic role that China and Chineseness play in defining racial, gendered, and class aspects of Chilean national social imaginary. In doing so, they challenge a common idea that Chineseness is a stable signifier and the simplistic perception of the ethnic Chinese as the unassimilable foreigner within the nation. In response, the authors call for a postmigrant approach to understanding identities and Chilean society beyond stubborn Orient-Occident and us-them dichotomies.

Centuries of Silence Leonardo Ferreira, 2006-10-30 The history of Latin American journalism is

ultimately the story of a people who have been silenced over the centuries, primarily Native Americans, women, peasants, and the urban poor. This book seeks to correct the record propounded by most English-language surveys of Latin American journalism, which tend to neglect pre-Columbian forms of reporting, the ways in which technology has been used as a tool of colonization, and the Latin American conceptual foundations of a free press. Challenging the conventional notion of a free marketplace of ideas in a region plagued with serious problems of poverty, violence, propaganda, political intolerance, poor ethics, journalism education deficiencies, and media concentration in the hands of an elite, Ferreira debunks the myth of a free press in Latin America. The diffusion of colonial presses in the New World resulted in the imposition of a structural censorship with elements that remain to this day. They include ethnic and gender discrimination, technological elitism, state and religious authoritarianism, and ideological controls. Impoverished, afraid of crime and violence, and without access to an effective democracy, ordinary Latin Americans still live silenced by ruling actors that include a dominant and concentrated media. Thus, not only is the press not free in Latin America, but it is also itself an instrument of oppression.

**Flight from Chile** Thomas Wright, Rody Oñate, 2023-08-15 2023 marks the fiftieth anniversary of General Pinochet's coup on September 11, 1973. During the wave of mass arrests, torture, and executions that followed, people began fleeing Chile. Over the next fifteen years some two hundred thousand Chileans sought exile in countries around the world. Out of their anguish and anger come these moving and powerful testimonies of their fractured lives—the first oral history of the Chilean diaspora, now revised and updated. Many who fled had been tortured, and they clung to the principle that the dictatorship was an evil that had to be destroyed. But their zeal and solidarity with other refugees often failed to sustain families. Many marriages collapsed, and children lost interest

in their native land and culture. After civilian rule returned in 1990, many returning exiles felt estranged from a homeland forever changed. This timely update of the 1998 collection continues to remind us of the fracturing legacy and enduring oppression of usurpation and authoritarian rule long after its time has passed.

The impact of the Chilean law on food labelling on the food production sector Food and Agriculture Organization of the United Nations, 2021-07-02 The worrying increase in overweight and obesity in the Region has led the countries to develop regulations and public policies to overcome this problem. Many of these aim to transform food environments to be healthier, improving access and influencing people's behavior, discouraging the purchase and consumption of unhealthy foods. In Chile, in 2016 a Law on Nutritional Composition of Foods and its advertising was implemented, which mandates the use of warning stamps HIGH IN on foods with high sugar, sodium, saturated fat or energy content, also prohibiting their sale in schools and advertising with a focus on children under 14 years of age. The food industry in Chile played a very active role during the discussion and implementation of the law, having as major concern the impact it could have on the productive sector. At the time of its implementation, it showed good compliance with the use of stamps, also responding with reformulation and development of new products, also adjusting its advertising and marketing campaigns. This document evaluates four aspects of the response of the food production sector in the implementation of the first phase of the Law: attitudes of the main actors of the food sector, food reformulation, use of stamps as a marketing strategy and impact on variables of the manufacturing sector and commercial. This information is an additional input to the discussion of

the impact of the labeling laws that are being implemented in countries of the Region.

**Fashion, Gender and Agency in Latin American and Spanish Literature** Stephanie N.

Saunders, 2021 In the last two decades, the glorification of sewing - whether involving needlework, tailoring, or fashion design - has thrived in Latin American and Iberian cultural works, particularly literature. In the last two decades, the glorification of sewing - whether involving needlework, tailoring, or fashion design - has thrived in Latin American and Iberian cultural works, particularly literature. While fast fashion has relegated the handicraft to maquiladoras in the Global South, Spanish and Latin American authors have created protagonists whose skill with needle and thread allows them to break out of culturally confining roles and spaces. In this fictional realm, seamstresses and tailors enter exciting adventures as spies, peacemakers, or explorers, all facilitated by their artistry and expertise. This book examines the depiction of women and the textile arts in contemporary Hispanic and Brazilian literature. Employing space and gender theories, the book explores how sewing, traditionally viewed as respectable only if practiced at home, gives agency and encourages self-reflection and mobility, allowing protagonists to transgress physical and socially prescribed limits. Texts analyzed include María Dueñas's *El tiempo entre costuras* (2009), César Aira's *La costurera y el viento* (1994), Pedro Lemebel's *Tengo miedo torero* (2001), Frances Poon's *The Seamstress* (2009), and children's literature. Encouraging readers to look behind garments to the agents of production, the book shows how contemporary authors, through their celebrations of an age-old skill, help to renew interest in sewing, tailoring, upcycling, and embroidery. **Advocacy Coalitions and Democratizing Media Reforms in Latin America** Christof Mauersberger, 2015-07-27 This book examines democratizing media reforms in Latin America. The author explains why some countries have recently passed such reforms in the broadcasting sector, while others have not. By offering a civil society perspective, the author moves beyond conventional accounts that perceive media reforms primarily as a form of government repression to punish oppositional media. Instead, he highlights the pioneering role of civil society coalitions, which have managed to revitalize the debate on communication rights and translated them into specific regulatory outcomes such as the promotion of community radio stations. The book provides an in-depth, comparative analysis of media reform debates in Argentina and Brazil (analyzing Chile and Uruguay as complementary cases), supported by original qualitative research. As such, it advances our understanding of how shifting power relations and social forces are affecting policymaking in Latin America and beyond.
