Webcasting Worldwide Louisa S. Ha,Richard J. Ganahl,2013-03-07 Webcasting Worldwide tackles one of the most timely topics in mass communication today—the delivery of audio and video content via the Web, or webcasting—employing a global perspective to explore the subject. It is unique in providing a theoretical framework by which to analyze business models of emerging media, and it also examines the business practices of leading webcasters in the world's most developed broadband markets. With webcasting in its early development, the approaches discussed in this volume set the standards for the webcasting industry. Representing the major broadband markets in the world, this text is an authoritative and valuable reference for both researchers and practitioners. The chapters relate the business practices of webcasting to the media market environment and established media industries, such as television and radio, as well as government and non-profit organizations. Downloadable resources offer PowerPoint charts for use in training, education, and research, along with tables, graphs, screenshots, and hyperlinks. Webcasting Worldwide is essential reading for academic researchers and media industry practitioners, and the volume will be a useful text in advanced courses addressing media technology, media management, and international communication. For updates about the book chapters and latest commentaries on topics related to webcasting business models, please visit the Webcasting Business Models Blog at http://webcastingworldwide.blogspot.com Winner of The Association for Education in Journalism and Mass Communication Picard Award for Media Management and Economics 2007.

Understanding World Media Dr Kumar Kaustubha, Dr Ajitabh & Mudita Agnihotri Sant,2021-08-14 Understanding World Media Understanding World Media sets out to mirror world media and the freedom it enjoyed across the globe in about 200 countries. While media is an important part of academic research, concerns have been raised globally on its content, intent and freedom of expression. To the extent that even as per the data compiled by Reporters Without Borders, democratic India ranks below par at 138 in the World Press Freedom Index 2018 out of the 180 listed nations. Though, it is a question of debate and discussions to what extent media in India is considered free or under censorship. When India is emerging as a global power with over 55 percent of its population is under 35 years of age, interest in the world community and media is growing leaps and bounds. It is in this context that this book magnifies its mirror to bring facts about the status and understanding of media in the world. For any book like this, it will always have its challenges to cover subjects like media in a nutshell, but for today, this book is timely and relevant. It is a balanced and thoughtful effort to present such a comprehensive book in a crisp and concise manner, as it is difficult to get experts on various countries to write on their respective domains. We have put our utmost effort to consolidate all necessary information and analysis required for this collection and we are very hopeful that it will serve its purpose, fulfill the void and information gap about the world media. Understanding World Media is structured around two clear themes, the status of media in various countries and its freedom of expression. It is divided into five parts covering vast geographical areas in Asia, Europe, the Americas, Africa and Australia-Oceania.

Walking With A Yellow Umbrella Bearing Witness to a Revolution Radio Free Asia ,2015-10-15 This e-book commemorates the one-year anniversary of the Umbrella Movement in Hong Kong, which took place over 79 days in late 2014. The student-led pro-democracy demonstration gained its name from the umbrellas used by protestors to shield themselves from tear gas fired at them by police. RFA's reporting has been able to circumvent censored news coverage inside and out of China.

Between Politics and Finance: Hong Kong's "Infinity War"? Alessia Amighini,2020-06-15 As the Covid-19 pandemic strikes hard, protests in Hong Kong appear to have abated. Distant seem the days when yellow umbrellas and balaclavas saturated global media. And yet, just like at the start of what has now come to be known as the 2019 "global protest wave", Hong Kong remains at the frontline of political contestation worldwide. The protests against the 2019 Hong Kong anti-extradition law unearthed one of the main points of contention between Hong Kong and mainland China. Through the protests, China's increasingly assertive stance has found a counterweight, revealing how important the city is to Beijing. China's actions towards Hong Kong might serve as a litmus test for Beijing's ability to mediate and pacify its neighbourhood. Meanwhile, the Covid-19 pandemic risks further heightening tensions between the Hong Kong and the mainland. What makes Hong Kong so special? To what extent have the protests exacerbated or eased over time? How will the city's role in mainland China's outward-looking plans change, if the protests continue?

A History of Journalism and Communication in China Yunze Zhao,Ping Sun,2018-05-11 From a modern perspective, journalism is highly relevant to modern society, along with the emergence of mass printing system and professionalisation. This book, however, expands the meaning of journalism and views it as a social process. It will not only explore the roots and development of Chinese journalism and communication, but also demonstrate how Chinese journalism and communication interact and struggle with social culture and politics. Arranged in chronological order mainly, this book examines the initial development of Chinese journalism in ancient times in chapter 1, which from then manifested strong political attributes. After the Opium War in 1840, missionaries and businessmen from the West started to set up newspapers and periodicals in China, which brought about the birth of China's modern journalism industry. Then China's private newspapers and political party's press are studied, which are closely linked with political revolutions and have a far-reaching impact on modern Chinese society. What happened to Chinese journalism and communication after the founding of People's Republic of China in 1949? This book reviews the newspaper reforms, and studies the great negative impacts brought by Cultural Revolution. Noteworthy news phenomena after the reform and opening-up are also covered. This book will appeal to scholars and students in journalism, communication and Chinese studies. Readers interested in Chinese society and modern Chinese history will also be attracted by it.

Telecommunications Research Trends Hans F. Ulrich,Ernst P. Lehrmann,2008 Telecommunication is the transmission of signals over a distance for the purpose of communication. In modern times, this process typically involves the sending of electromagnetic waves by electronic transmitters, but in earlier times telecommunication may have involved the use of smoke signals, drums or semaphore or heliograph. Today, telecommunication is widespread and devices that assist the process, such as the television, radio and telephone, are common in many parts of the world. There are also many networks that connect these devices, including computer networks, public telephone networks, radio networks and television networks. Computer communication across the Internet is one of many examples of telecommunication. This book presents the latest research from around the world.

Talk Radio, the Mainstream Press, and Public Opinion in Hong Kong Francis L. F. Lee,2014-07-01 Phone-in programs on public and commercial radio channels have been a staple of popular Hong Kong politics since the 1990s. In the absence of a fully democratic system, they have played an influential role in channeling and mediating public opinion. This work examines the phenomenon of talk radio in Hong Kong, using as its analytical framework the idea of remediation. It argues that the circulation and re-circulation of talk radio content through the mainstream media is crucial in explaining the medium's social prominence and influence. The process has not only widened the dissemination of talk radio content, but also established talk radio as a channel as well as a symbol for free political expression, giving it a role in shaping serious debate not seen in many other societies. Drawing on interviews with radio personnel, analysis of radio and newspaper content, and audience surveys, Talk Radio explores the vital and influential world of Hong Kong's phone-in programs. The book will be of interest to scholars of politics, media studies, and cultural studies both in Hong Kong and overseas. "This is the first comprehensive study on political radio phone-in talk shows that integrates analyses of the historical transformations of the genre, the conversational dynamics and the remediations of citizens' voices. Exceptionally rich in data, rigorous, and written in an accessible style, it contributes significantly to the fields of media studies, discourse analyses, public opinion and political communication." —Mats Ekström, Professor, Department of Journalism, Media and Communication, University of Gothenburg, Sweden "One of the most exciting developments in Hong Kong is the rise of talk radio as an interface between the political and public spheres. As this new volume demonstrates, no one is more qualified to discuss this process than Francis L. F. Lee, one of the most original analysts of modern Hong Kong and its media landscape." —Gary Rawnsley, author of Political Communications and Democracy and editor ofRoutledge Handbook of Chinese Media "A fascinating and extensively researched study of political opinion, the general public, and the mass media in Hong Kong." —Jan Servaes, editor of Sustainable Development and Green Communication: African and Asian Perspectives and author of Communication for Development: One World, Multiple Cultures
