The Complete Book of the World Rally Championship Henry Hope-Frost, John Davenport, 2004

For 30 years some of the most talented and bravest drivers have battled across the continents of the world to claim what is arguably motorsport's toughest prize: the World Rally Championship. Now a multi-million dollar, global technology battle and terrestrial television phenomenon played out over the frozen wastes of Finland, the dusty plains of Australia and the sun-kissed mountain roads of Corsica, the WRC has reached its 30th birthday. This book celebrates that important milestone and paints an exhaustively detailed picture of the people and personalities who have shaped this great sport. The Complete Book of the World Rally Champions provides a biographical account of the 65 men who have won at least one World Championship Rally since 1973. The biographies are compiled by the sport's leading writers and historians and complemented by stunning photography. The book includes a detailed and accurate statistical career record of each driver, plus highlights of all the significant cars.

A Sociology of the World Rally Championship H. Naess, 2014-09-23 Drawing upon interviews with key people in the World Rally Championship as well as trans-local ethnographic research, this book explores questions of commerciality and sporting identity, tackling the sport's controversial handling of the shift into 'the commercial age'. It is essential reading on combining sporting heritage and commercial progress.

The Cutting Edge Rod Millen, 2014-08-15 One of New Zealand's greatest rally drivers and a hill-climbing superstar tells his inspiring story for the very first time. Rod Millen was a hero of New Zealand rallying in the 1970s. Having won several championships he quickly established himself as New Zealand's number one driver. But thereafter Millen went on to do what very few Kiwis have

achieved, finding podium success in American motorsport. He won the North American Race and Rally Championship in 1979, 1980 and 1981, then in 1989 Millen achieved perhaps his greatest feat, winning the Pikes Peak International Hill Climb, America's second oldest motor-racing event. Writing his name into history, he went on to win the race more times than any driver. The hill-climb is often referred to as 'Millen's Mountain'. Rod Millen is also a highly successful businessman. As a continuation of his off-road driving interests, he founded Millenworks in California in 1980, specializing in cutting-edge light tactical vehicles, armored and off-road vehicles and subsystems for the US military and theme parks. Millen has recently returned to New Zealand, building a 140-acre, ocean-front estate at Hahei with a racetrack as a driveway, modeled on his favourite hill-climb corners around the world. He's also established Leadfoot Festival, a unique weekend held every two years at the estate, bringing together a mix of classic cars, vintage motorcycles and motorsport legends, inspired by the famous British Goodwood Festival of Speed. Aside from rallying, Rod is well known for other forms racing such as super touring, drifting and extreme off-road races like the Baja 1000 (often considered the most dangerous race in the world) and Transsyberia rally (which he won in 2007). Rod also won the Race to the Sky hill-climb in New Zealand in 2002 and posted the fastest time at the 2002 Goodwood Festival of Speed in England - and he still has the record up his own front driveway. The Cutting Edge is Rod's story, in his own words, of a life lived pushing the boundaries, of record-breaking off-road driving, working at the forefront of motorsport technology, and of creating the ultimate petrol-head heaven, right in his own backyard.

Voice In The Ear Miika Wuorela,2014-02-01 Since 1973 World Rally Championship has been a really competitive series measuring the striking power of man and machine. During the years many books about the drivers and the teams has been published. Not that many about co-drivers though - the navigators who faithfully sit alongside their drivers through the blizzards and blistering winds. This book will guide you through the same conditions and face the situations as they come. All the stories told by the stars themselves! These men have won ten world championship titles altogether and have been part in winning several manufacturers titles as well. Lean back, take a cosy position and enjoy. Starring: Seppo Harjanne, Ilkka Kivimäki, Luis Moya, Juha Piironen and Timo Rautiainen.

Ford Focus WRC Graham Robson,2017-10-15 When world rallying introduced a new formula for "World Rally Cars", Ford seized the opportunity. Malcolm Wilson's M-Sport organization was contracted to do the job, completed the design in less than a year, and spent the next 12 years campaigning this turbocharged, four-wheel-drive car all round the world. Working from state-of-the-art facilities, M-Sport built 97 Focus WRCs, all of which proved to be worthy of World level action when they won 44 World Championship events. Stellar drivers like Colin McRae, Carlos Sainz, Markko Märtin, Marcus Grönholm and Mikko Hirvonen all added to the mystique of an ultra-professional organization, along with substantial support and sponsorship from the likes of Martini, BP, and the state of Abu Dhabi. By building its in-house technical expertise, M-Sport not only

engineered and developed the entire car on behalf of Ford, but gradually took over development of the 300bhp, 2.0-litre, turbocharged engine, and led the design of the complex four-wheel-drive transmissions provided by Xtrac. M-Sport's reputation exploded to the point that when regulations changed, the company immediately produced a new-generation Fiesta WRC, and kept the winning days rolling.

Driven: My Story Hayden Paddon, 2019-08-20 Hayden Paddon was just a boy growing up in Geraldine – in love with racing and dreaming big. But it didn't come easy. In *Driven*, Paddon details the many highs and lows along the road to the top. He opens up about his struggles with bullying, depression and loss as a young man, and goes on public record for the first time about the 2017 accident in which a spectator was killed and his controversial dismissing from the Hyundai Motorsport team in 2018. It's the real account from Paddon himself, in his own words, as he sets the record straight about his dramatic life on and off the road. *Driven* is captivating, complex and inspirational – a mile-a-minute biography that celebrates self-belief, hard work, and turning dreams into a reality.

Lancia 037 Peter Collins, 2008-03-15 The world of rallying was changed forever on January 1st 1982 with the introduction of the new Group B rules. These virtually gave manufacturers carte blanche to design the fastest car they could for world rally special stages, so long as they built at

least 200 identical examples. This is the story of Lancia's mid-engined and supercharged rally. The reader is taken from initial thinking about the car and conception, through development to the full history of its rallying lifetime with the help of the car designer and chief engineer, Ing Sergio Limone. Featuring many of Limone's own photographs during development, and interviews with team members. Illustrated with 250 stunning and rare rally action photos.

Lancia 037 Peter Collins, 2017-10-17 In the late 1970s, the problem facing any manufacturer taking part in the World Rally Championship was that the rules kept being changed at short notice. This book looks at the solutions found for Lancia's rally car, the 037, and takes the reader through the new rules that all potential contenders would have to consider if they wanted to win rallies at World Championship level. Lancia's Rally was developed quickly to deal with the then-dominant Audi Quattro. The reasons it succeeded are featured here, along with an in-depth, behind-closed-doors look at the development of the car, with the close help and cooperation of its designer and chief engineer, Ing. Sergio Limone. Here you can read how he decided on the basic configuration of the car, what the rules would allow, and how the project unfolded in total secret at Fiat's various test tracks and centres in and around Turin, overlaid with rumour and counter-rumour as the world's motoring press tried to make sense of what little knowledge it had of the project's progress. In addition, Ing. Limone's own photographs from areas never accessed by the public tell their own story. The focus then moves to the world of top-level rallying, with all the associated glory and headaches. Accompanied by stunning photography and insights from team members, we follow the small and nimble 037s, as the cars have become popularly known, as they head out to take the World Rally Championship for Makes in 1983 and innumerable wins throughout the world. In addition, there are tests of various key examples of the cars, and appendices of events and chassis used. This book is illustrated with 250 stunning and rare rally action photos.

Memory Lanes ... the Beginning Peter Robinson,2017

The Last Works Minis Bryan Purves,Tim Brenchley,2014-08-20 The Mini, the car of the 20th Century and still in motorsport in 1997, 35 years after its 1st event. This is its story. In the 60 s the BMC works teams using Mini s were virtually unstoppable in their quest for recognition in the big world of rallying, they succeeded where others had failed and the BMC works teams were at the time probably the envy of the motorsport world. They introduced to the enthusiast the Special Tuning or ST as it was later known, a range of tuning products that the public could buy and fit to their own cars thus using the very same parts that the works team were using. Sadly the competition department was wound down and the ST finally went the same way in 1980. Imagine the excitement that hit the media when in the Autumn of 1993 Rover officially announced that they would fund the build of several cars to once again campaign the world famous Rallye Monte Carlo. Although they were not works cars, the large contribution of materials and money to the project it was regarded as tantamount to funding a works team, especially when Paddy Hopkirk was named as one of the drivers. It was this that started 4 years of Works backed mini s to varying degrees, culminating in 1996 to a full works backed team of 2 cars and a full campaign of rallies and races for the three years. Typically the Mini of the 90 s, similarly to the Mini of the 60 s, carried with it a fair degree of

controversy. Over the next four years there was plenty of it, with money being diverted by the sponsor from one team to another, one car even being stolen and top rallying stars carrying out secret test sessions, being just a few examples. All of this using cars that were designed way back in the 50 s and even still using the same basic design of engine and gearbox against competitors who were using cars designed over thirty years later with modern engines and transmissions. This book highlights how the use of fuel injection, distributor-less ignition, six speed gearboxes and modern tyres all helped to bring the mighty mini once again to the foreground of modern rallying and racing. In 1996 the ST range of competition parts was re-introduced, with the parts coming from the latest 1996 build of works cars but once again in mid 1997 the project was pulled amid secrecy, sackings and bitter recriminations that even to this day have prevented the authors from being able to speak to those that were involved behind the scenes at the end of the line for the Last Works Minis . With many unseen photo s of the cars development, copies of Rovers internal documents, copy pages from the road books of top rallies, all of this in colour this book truly brings this previously untold story to life.
