Compendium of Innovative Practices in Public Governance and Administration for Sustainable Development United Nations Department of Economic and Social Affairs, 2016-12-30 In September 2015 the United Nations Member States adopted the 2030 Agenda for Sustainable Development, a vision for transforming the world by ending poverty, transforming societies and protecting the planet. At the heart of the 2030 Agenda are 17 Sustainable Development Goals (SDGs) and 169 targets covering areas of critical importance for humanity and the planet - people, planet, prosperity, peace, and partnership. From reaching social and economic equality to combating climate change, the SDGs cannot be achieved without determined and sustained efforts from public institutions. More than ever, continuous innovation and integrated approaches are needed. The critical role of public institutions in realizing the SDGs is highlighted in the Goal 16 which calls for building effective, accountable institutions at all levels. This *Compendium of Innovative Practices in Public Governance and Administration for Sustainable Development* explores three shifts in government-society interactions that have had significant impact on public administration and public service. These are the (i) demand for more people-centered governance, (ii) greater use of ICT technologies in public sector, and (iii) demand for high-quality human resources in public sector to deal with increasingly more complex development imperatives. The *Compendium* contains both substantive analysis and case studies on these three important themes. It can function as a useful reference and illustrate that promoting innovative practices in public service delivery is vital for achieving the sustainable development goals and leaving no one behind.

Jugaad Innovation Navi Radjou, Jaideep Prabhu, Simone Ahuja, 2012-06-18 Jugaad is a word often heard in general conversation in India. Whether to find ingenious solutions to problems or turn adversity into opportunity—Indians swear by it. In this seminal book, Navi Radjou, Jaideep Prabhu, and Simone Ahuja challenge the very way a traditional organization thinks and acts. Leading companies such as Facebook, Future Group, GE, Google, PepsiCo, Philips, Renault-Nissan, Siemens, Suzlon, Tata Group, and YES BANK, among others, are already practising jugaad to generate original ideas and pioneer growth. In the midst of rising global competition and swelling R&D budgets, Jugaad Innovation presents ways to innovate, be flexible, and do more with less. Peppered with examples of innovative entrepreneurs in emerging markets such as Africa, India, China, and Brazil, Jugaad Innovation illuminates paths to engender breakthrough growth in a complex and resource-scarce world.

Revolutionizing Tropical Medicine Kerry Atkinson, Prof. David Mabey, 2019-05-29 A comprehensive resource describing innovative technologies and digital health tools that can revolutionize the delivery of health care in low- to middle-income countries, particularly in remote rural impoverished communities *Revolutionizing Tropical Medicine* offers an up-to-date guide for healthcare and other professionals working in low-resource countries where access to health care facilities for diagnosis and treatment is challenging. Rather than suggesting the expensive solution of building new bricks and mortar clinics and hospitals and increasing the number of doctors and nurses in these deprived areas, the authors propose a complete change of mindset. They outline a number of ideas for improving healthcare including rapid diagnostic testing for infectious and non-infectious diseases at a point-of-care facility, together with low cost portable imaging devices. In addition, the authors recommend a change in the way in which health care is delivered. This approach requires task-shifting within the healthcare provision system so that nurses, laboratory technicians, pharmacists and others are trained in the newly available technologies, thus enabling faster and more appropriate triage for people requiring medical treatment. This text: Describes the current burden of communicable and non-communicable diseases in low- to middle-income countries throughout the world Describes the major advances in healthcare outcomes in low-to middle-income countries derived from implementation of the United Nations/World Health Organisation's 2000 Millennium Development Goals Provides a review of inexpensive rapid diagnostic point-of-care

tests for infectious diseases in low-resource countries, particularly for people living in remote rural areas Provides a review of other rapid point-of-care services for assessing hematological function, biochemical function, renal function, hepatic function and status including hepatitis, acid-base balance, sickle cell disease, severe acute malnutrition and spirometry Explores the use of low-cost portable imaging devices for use in remote rural areas including a novel method of examining the optic fundus using a smartphone and the extensive value of portable ultrasound scanning when x-ray facilities are not available Describes the use of telemedicine in the clinical management of both children and adults in remote rural settings Looks to the future of clinical management in remote impoverished rural settings using nucleic acid identification of pathogens, the use of nanoparticles for water purification, the use of drones, the use of pulse oximetry and the use of near-infrared spectroscopy Finally, it assesses the potential for future healthcare improvement in impoverished areas and how the United Nations/World Health Organization 2015 Sustainable Development Goals are approaching this. Written for physicians, infectious disease specialists, pathologists, radiologists, nurses, pharmacists and other health care workers, as well as government healthcare managers, Revolutionizing Tropical Medicine is a new up-to-date essential and realistic guide to treating and diagnosing patients in low-resource tropical countries based on new technologies.
