Local Energy Autonomy Fanny Lopez,Margot Pellegrino,Olivier Coutard,2019-04-29 In recent years, interest for local energy production, supply and consumption has increased in academic and public debates. In particular, contemporary energy transition discourses and strategies often emphasize the search for increased local energy autonomy, a phrase which can refer to a diverse range of configurations, both in terms of the spaces and scales of the local territory considered and in terms of what is meant by energy autonomy. This book explores policies, projects and processes aimed at increased local energy autonomy, with a particular focus on their spatial, infrastructural and political dimensions. In doing so, the authors – Sabine Barles, Bruno Barroca, Guilhem Blanchard, Benoit Boutaud, Arwen Colell, Gilles Debizet, Ariane Debourdeau, Laure Dobigny, Florian Dupont, Zélia Hampikian, Sylvvy Jaglin, Allan Jones, Raphael Ménard, Alain Nadaï, Angela Pohlmann, Cyril Roger-Lacan, Eric Vidalenc – improve our understanding of the always partial and controversial processes of energy relocation that articulate forms of local metabolic self-sufficiency, socio-technical decentralization and political empowerment. Comprising fifteen chapters, the book is divided into four parts: Governance and Actors; Urban Projects and Energy Systems; Energy Communities; and The Challenges of Energy Autonomy.

Paediatric Nursing Skills for Australian Nurses Elizabeth Forster,Jennifer Fraser,2017-10-30 Paediatric Nursing Skills for Australian Nurses is the first Australia-focused, dedicated paediatric skills text for undergraduate students. Integrating the theoretical and clinical components of nursing knowledge, the authors outline the clinical skills needed in the care of children and young people. The journey begins with an introduction to communication - an essential skill for any paediatric nurse - before exploring crucial topics such as mental health, nutrition and medication. These discussions are presented in connection with the latest national competency standards for registered nurses to help equip readers with these necessary abilities. Pedagogical features include case studies, clinical tips and reflection questions to encourage active thinking and analysis of key concepts. Each chapter concludes with a set of review questions, a research topic and a list of recommended readings to consolidate student understanding. Geopolitics of Governance A. Kakabadse,2001-07-04 Considerable attention has been given to the topic of governance and its relevance to private and public sector organisations. However, little attention has been given to the impact of adopting different governance models on societies and nations which are unaccustomed to alternative ways of working. With both an enterprise level and a societal level of analysis in mind, this book explores the governance impact on both the structure of organisation and performance of organisation, and also examines what are the likely stakeholder reactions and social repercussions of the emerging encroachment of the shareholder value philosophy championed by Anglo-American enterprises on stakeholder societies such as France, Germany, Japan and the Scandinavian countries.
