Shadow & Light Gary S. Rea,2015-09-11 Gary Rea's approach to street photography is all about shadow and light and how they interplay with the urban environment and the people within that environment. The images presented here are a sampling of some of Rea's work from 2015, including a sampling of a few of his series projects, each of which has been produced at particular locations in downtown Seattle. Rea describes his development as a photographer, from his beginnings as a photo lab technician in the U.S. Air Force during the Vietnam era to his latest work as a street photographer on the streets of downtown Seattle. He also explains in detail his approach to street photography and his views on what street photography is and what it is not. 8.5x11, 28 pages, 39 black and white photos

Quotation and Modern American Poetry Elizabeth Gregory,1996-07 In this volume Elizabeth Gregory addresses a number of key issues surrounding the formation of the American poetic canon. Taking as

her primary examples T. S. Eliot's *Waste Land*, William Carlos Williams' *Paterson*, and selected poems by Marianne Moore, she examines the ways in which modern American writers struggled with questions of literary authority and cultural identity in relation to pre-existing European models. Gregory focuses on these issues through analysis of the use of quotation in modern and postmodern literature, a practice that was strikingly divergent from the accepted use of literary allusion. Her introduction traces a history of quotation as it has been practiced in literature from classical to modern times. She then focuses on the texts of Eliot, Williams, and Moore--three central figures of American modernism whose work the author believes represents a spectrum of responses to the established European model of poetical discourse. Gregory's selection of Moore also allows her to deal with feminist concerns as they emerge in the more general modernist dialogue. How was a female writer to make use of a literary canon that traditionally excluded female participation? The implications of Gregory's argument . . . will surely be of especial interest to feminist scholars of American poetry.--Lois Parkinson Zamora, University of Houston.

La mesure de la réalité Alfred W. Crosby,2003 La

familiarité de la civilisation occidentale avec la quantification remonte certainement au moins aussi haut que le Néolithique (mon troupeau a douze chèvres, le tien n'en a que sept), mais des millénaires se sont écoulés avant qu'elle ne devienne une passion. Les Occidentaux croyaient en la Bible, où il était dit que Dieu a tout disposé avec mesure, nombre et poids, mais jusque vers le début du XIIIe siècle ils n'accordèrent que peu d'attention délibérée à la notion de réalité quantifiable. Puis, entre 1250 et 1350, un tournant fut pris, moins dans la théorie que dans les applications concrètes. Nous pouvons probablement réduire cette durée à cinquante ans : 1275-1325. Quelqu'un en Europe fabriqua la première horloge mécanique et le premier canon, instruments qui obligeaient les Européens à penser en termes d'espace et de temps quantifiés. Les cartes marines appelées portulans, la peinture en perspective et la comptabilité en partie double, techniques à l'état naissant, datent également de ce demi-siècle ou des années qui ont immédiatement suivi. Roger Bacon mesura l'angle de l'arc-en-ciel, Giotto peignit en ayant la géométrie à l'esprit, et les musiciens occidentaux commencèrent à écrire, selon leur propre expression, des chansons précisément mesurées. Il n'y eut rien de comparable à ce demi-siècle jusqu'au tournant du XXe, où la radio, la radioactivité, Einstein, Picasso et Schönberg entraînèrent l'Europe dans une révolution d'une ampleur analogue.

LA REALITE□TELLE QUELLE CHEIKH DJA'FAR AL-HÂDÎ, NESSECITE D'UNE CONNAISSANCE MUTUELLE L'islam regroupe en son sein des peuples aux cultures différentes, qu'il a, grâce à ses enseignements orientés vers de nobles idéaux, tout en substituant le moindre sentiment d'hostilité interr raciale par une fraternité universelle, le culte de l'égo centrisme et de l'orgueil par un esprit d'humilité et de solidarité mutuelle. Ce mode de comportement constitua la base d'une grande communauté rayonnante, sous forme d'une civilisation universelle qui, en se dressant contre toute injustice et tyrannie, pu s'offrir une place historique essentielle. L'islam a su, de nos jours, braver les obstacles d'inégalité au niveau de l'évolution dialectique existant entre les diverses sociétés, en transformant les points apparemment négatifs en une sorte de force positive grâce à la perspicacité de ses croyances et l'harmonie universelle de sa doctrine. ...

Novel Stages Pratima Prasad,Susan McCreedy,2007
The essays in *Novel Stages* examine the myriad intersections between drama and the novel in nineteenth-century France, a period when the two genres were in constant engagement with one

another. The collection is unified by common intellectual concerns: the inscription of theatrical esthetics within the novel; the common practice among nineteenth-century novelists of adapting their works for the stage; and the novel's engagement with popular forms of theater. The essays provide insight into a specific aspect of the relationship between the theater and the novel in the nineteenth century. Their distinct perspectives form an overview of the literary landscape of nineteenth-century France, and demonstrate many ways in which all major nineteenth-century French novelists, including Hugo, Flaubert, Sand, and Zola, participated in the theatrical culture of their century.
