The Dramatic Works of William Shakespeare, Adapted for Family Reading William Shakespeare, Thomas Bowdler, 1861

History of Linguistic Thought in the Early Middle Ages Vivien A. Law, 1993-11-11 Surveys of linguistics in the Middle Ages often begin with the twelfth century, dismissing the preceding six centuries as 'devoid of originality' or 'dependent upon Donatus and Priscian'. This collection of articles devoted to linguistics in the early Middle Ages attempts to redress the balance by presenting a variety of approaches to new and controversial questions. The volume opens with a study of the historiography of early medieval grammar, with a bibliography of primary and secondary literature. The history of linguistic doctrine is discussed in articles dealing with Virgilius Maro Grammaticus, with the Irish contribution to the analysis of Latin, and with the Carolingian grammarians. A paper discussing a grammar from late Anglo-Saxon England (Beatus quid est) offers new insights into pedagogical techniques and the integration of literary texts into grammar teaching. The attitudes towards varieties of Latin in late antique and early medieval grammars are discussed in a wider context of cultural history. Finally, the volume includes two articles on the transmission of the grammars of the later Roman Empire to the early Middle Ages (Priscian and Dynamius).

Intertwined Rebecca Kormos, 2024-04-30 A powerful argument that greater inclusion of women in conservation and climate science is key to the future of the planet Women are disproportionately impacted by climate change—floods, droughts, and extreme temperatures overwhelmingly affect women in the short and long term. In some cases, women make up almost 90 percent of casualties during dangerous climate events, and the majority of those displaced in the aftermath are women. Despite this disparity, women are underrepresented at every level of decision-making about the future of our planet: only 24 percent of CEOs in nonprofit conservation and around one-third of the representatives in national and global climate negotiating bodies have been women. In *Intertwined*, writer and wildlife biologist Rebecca Kormos elevates the voices of women working to prevent the climate crisis, weaving together their stories to make a powerful case for why women are essential to changing our current trajectory toward catastrophic global warming and environmental degradation. Kormos argues that empowering women is one of the most important solutions to climate change and biodiversity loss: women's leadership and equal representation is linked to lower CO2 emissions, better forest management, better land protection, less land grabbing, and fewer conflicts over resources. For readers of *All We Can Save* and *Braiding Sweetgrass*, Kormos joins the ranks of recent breakthrough efforts to showcase women's voices in the movement to combat climate change. Kormos takes this endeavor one step further with a global, intersectional narrative of how women and gender nonconforming individuals are doing the crucial work at the local and national levels to reframe how we think about environmental activism. Ultimately, *Intertwined* proves that climate justice is inextricable from gender equality.

Storytelling Organizational Practices David M. Boje, 2014-06-20 Once upon a time the practice of storytelling was about collecting interesting stories about the past, and converting them into soundbite pitches. Now it is more about foretelling the ways the future is approaching the present, prompting a re-storying of the past. Storytelling has progressed and is about a diversity of voices, not just one teller of one past; it is how a group or organization of people negotiates the telling of history and the telling of what future is arriving in the present. With the changes in storytelling practices and theory there is a growing need to look at new and different methodologies. Within this exciting new book, David M. Boje develops new ways to ask questions in interviews and make observations of practice that are about storytelling the future. This, after all, is where management practice concentrates its storytelling, while much of the theory and method work is all about how the past might recur in the future. *Storytelling Organizational Practices* takes the reader on a journey: from looking at narratives of past experience through looking at living stories of emergence in the present to looking at how the future is arriving in ways that prompts a re-storying of the past.

The Tryal of Nathaniel Reading, Esq., for Attempting to Stifle the King's Evidence as to the Horrid Plot Nathaniel Reading, 1679

Rude Awakenings Turquoise Grace, There's no one in her life that Kate Grayson despises more than Colton James; he's inconsiderate, rude, irresponsible and perverted, and yet he has an effect on her she can't even begin to explain. Determined not to fall for the resident bad boy, Kate falls into a vicious cycle of being pulled into his attractive charm before forcing herself to stay away. For his part, Colton finds Kate intriguing and when he warns his friend away from her, he realizes that perhaps her lack of desire for him only enhances his own desire for her.

The Last Lecture Randy Pausch, 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled *The Last Lecture*. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—*Really Achieving Your Childhood Dreams*—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Persian Girls Nahid Rachlin, 2007-12-27 For many years, heartache prevented Nahid Rachlin from turning her sharp novelist's eye inward: to tell the story of how her own life diverged from that of her closest confidante and beloved sister, Pari. Growing up in Iran, both refused to accept traditional Muslim mores, and dreamed of careers in literature and on the stage. Their lives changed abruptly when Pari was coerced by their father into marrying a wealthy and cruel suitor. Nahid narrowly avoided a similar fate, and instead negotiated with him to pursue her studies in America. When Nahid received the unsettling and mysterious news that Pari had died after falling down a flight of stairs, she traveled back to Iran—now under the Islamic regime—to find out what happened to her truest friend, confront her past, and evaluate what the future holds for the heartbroken in a tale of crushing sorrow, sisterhood, and ultimately, hope.
