The Denver Artists Guild Stan Cuba,2015-05-06 In 1928, the newly organized Denver Artists Guild held its inaugural exhibition in downtown Denver. Little did the participants realize that their initial effort would survive the Great Depression and World War II—and then outlive all of the group’s fifty-two charter members. The guild’s founders worked in many media and pursued a variety of styles. In addition to the oils and watercolors one would expect were masterful pastels by Elsie Haddon Haynes, photographs by Laura Gilpin, sculpture by Gladys Caldwell Fisher and Arnold Rönnebeck, ceramics by Anne Van Briggles Ritter and Paul St. Gaudens, and collages by Pansy Stockton. Styles included realism, impressionism, regionalism, surrealism, and abstraction. Murals by Allen True, Vance Kirkland, John E. Thompson, Louise Rönnebeck, and others graced public and private buildings—secular and religious—in Colorado and throughout the United States. The guild’s artists didn’t just contribute to the fine and decorative arts of Colorado; they enhanced the national reputation of the state. Then, in 1948, the Denver Artists Guild became the stage for a great public debate pitting traditional against modern. The twenty-year-old guild split apart as modernists bolted to form their own group, the Fifteen Colorado Artists. It was a seminal moment: some of guild’s artists became great modernists, while others remained great traditionalists. Enhanced by period photographs and reproductions of the founding members’ works, *The Denver Artists Guild* chronicles a vibrant yet overlooked chapter of Colorado’s cultural history. The book includes a walking tour of guild members’ paintings and sculptures viewable in Denver and elsewhere in Colorado, by Leah Naess and author Stan Cuba.

Gas Pipeline Hydraulics Shashi Menon,Pramila Menon,2013 This book is concerned with the steady state hydraulics of natural gas and other compressible fluids being transported through pipelines. Our main approach is to determine the flow rate possible and compressor station horsepower required within the limitations of pipe

strength, based on the pipe materials and grade. It addresses the scenarios where one or more compressors may be required depending on the gas flow rate and if discharge cooling is needed to limit the gas temperatures. The book is the result of over 38 years of the authors' experience on pipelines in North and South America while working for major energy companies such as ARCO, El Paso Energy, etc.
