How to Get Rich with Apps - for Real Mark Foster Junior, 2020-08-02 Programming apps and earning money: Here's how! The range of mobile applications is huge and the demand is growing rapidly. If you have a good idea that doesn't yet exist, you should simply try your own app. It is important that your idea is either incredibly meaningful or simply entertaining and funny. Read here how to do it and that with the best tips. You have probably already downloaded an app and used it on your smartphone. App stores have triggered a kind of gold rush among developers. The ability to sell or purchase all apps from a central location is valued by developers and users alike. In the age of smartphones, many options have opened up for making serious money. The number is now so overwhelming that not everyone keeps an overview. In

principle, many ways of making a living with smartphones or at least improving your income are accessible to everyone. For one or the other, however, you need certain specialist knowledge. So it looks with the development of apps. You can make money with your own apps, but without the necessary know-how, you will not be successful. In theory, you can have them programmed for a fee, but that costs a lot of money and it becomes difficult to implement individual wishes. But let's take a look at how to make money with your own apps. Step by step instructions:

Analyze the search algorithms of the app stores
Find suitable mobile niches
Program the corresponding apps
Offer apps in the Google and Apple app stores
Do marketing and develop apps
Offer apps for a fee or otherwise monetize them
Generate income from purchase proceeds, reimbursement of advertising costs etc.

If you really want to offer your own apps on the app stores and want to make money with them, you should bring the technical knowledge with you. Adequate computer science and programming skills are therefore highly recommended. Especially if you are well-versed here, you have a good chance of standing out from the competition. Many of the apps that are offered are dead apps. These are sometimes referred to as zombies. This is because these are hardly or not downloaded at all. This in turn means that the developers do not make any money from it. But the apps shouldn't just be technically mature. That's just a criterion for actually being successful. It is also important to offer the right apps. There are currently more than 1.3 million apps on the major Apple and Google marketplaces. Of course, to stand out from this crowd, you have to do it right. In principle, however, this is not that difficult if you acquire the necessary knowledge. You should first analyze the search algorithm of the app stores. These are in no way

comparable to the basic web algorithm from Google. Due to a much lower complexity, it can be made relatively easy to use. As with websites, you should look for possible niches. With a little experience, you should find something much faster here. Because although apps are becoming increasingly popular and have become an integral part of our society, the market is by no means saturated here. Nevertheless, you have to research carefully and show the right approach. Of course, this also requires the necessary analyzes. However, if you implement this well, it is comparatively easy to find suitable niches. Now do you think that you can also make money with an app? Then you are exactly right in this article. We want to show you how to do it!
