House Lust Daniel McGinn, 2008-01-08 A rich narrative that blends social commentary with incisive reporting, *House Lust* offers an astute, funny, and sometimes disturbing portrait of the behaviors that drove the greatest real estate boom in history—and its eventual bust. Owning a home has long been considered the fulfillment of the American Dream. But in the last decade, as the real estate market boomed, Americans' fascination with homes turned into a frenzy. Everywhere we turned, people were talking about,

scheming over, envying, shopping for, refinancing, or just plain ogling houses—in the process, we’ve transformed shelter from a basic necessity into an all-consuming passion. In *House Lust*, Newsweek’s Daniel McGinn travels the country to explore the roots of this mania. Even as the real estate boom has turned to bust, Americans remain obsessed with houses—many of us are still trading up, adding on, or doubling down to buy vacation property. But for others, this zeal for housing has carried a painful price, one that’s evident in the soaring foreclosure rates and mounting despair as millions of homeowners (and their lenders) realize they’ve stretched too far to buy the home of their dreams. In a compelling narrative that takes us inside the homes—and psyches—of the *House Lust*-afflicted throughout the nation, McGinn examines the forces that turned housing into the talk of dinner parties. He explores the arms race for square footage and introduces readers to a menagerie of characters from the real estate world—from “renovation psychologists” who treat remodeling-addled clients to a guy who trades vacation time-shares the way kids trade baseball cards. McGinn also jumps into the fray himself by enrolling in real estate school and buying an investment property, sight unseen, over the Internet. *House Lust* shows us just how contagious the ideal of owning the best home on the block can be. And as the real estate boom recedes into memory, McGinn offers cautionary tales to help us curb our lust when prices start rising again.

All Real Estate Is Local David Lereah, 2007-04-03 Whatever the national trends are with regard to real estate – whether they are booming or busting—what really matters is what the market conditions are in your region, town, or neighborhood. For as David Lereah points out, in the end, all real estate is local. What does that mean? Even during the real estate boom of 2001-2005, a great many cities and regions did not participate in the boom—they lagged behind, or even decreased in value. Similarly, when prices began to fall nationally, there were plenty of regions and locales where prices rose, and sales boomed. As Lereah makes clear, the most important factor in buying or selling a home isn’t what is going on nationally—it is what is going on in your local market. Evaluating present and future trends and influences in your region or neighborhood is essential to creating long term wealth, whether you are in a buyer’s or a seller’s market. And David Lereah, as the Chief Economist for the National Association of Realtors, shows you how to determine the conditions in your neighborhood. Lereah reveals how to: Evaluate the DNA of homes in the town or county or region you are considering (every town has its own real estate DNA—the characteristics that

make a region or city more or less desirable to live in). Determine whether property values in your targeted neighborhood are on the rise. Research future real estate influences and trends, from migration into or out of the region, to plans to attract or develop new businesses in the area. Understand the local factors that can affect your investment in the future. Countless books offer advice on how to buy and sell a home. But ALL REAL ESTATE IS LOCAL is the first book to explain how knowing the ins and outs of the local market you are targeting is essential to deciding when, where, and what to buy.
