Women's American Football Russ Crawford,2022-11 Tackle football has been primarily viewed as a male sport, but at a time when men's participation rates are decreasing, an increasing number of women are entering the gridiron—and they have a long history of doing so. Women's American Football is a narrative history of girls and women participating in American football in the United States since the 1920s, when a women's team played at halftime during an early NFL game. The women's game became more organized in 1974, when the National Women's Football League was established, with notable teams such as the Dallas Bluebonnets, Toledo Troopers, Oklahoma City Dolls, and Detroit Demons. Today there are two main professional leagues in the United States: the Women's Football Alliance, with nearly seventy teams, and the Women's National Football Conference, with eighteen, in addition to a number of smaller leagues. The National Association of Intercollegiate Athletics and the NFL have recently begun sponsoring flag football teams at the college level, and the game is growing for high school girls as well. In 2021 more than two thousand girls played on mostly boys' teams, and there are currently four all-girls leagues in the United States and Canada, in Manitoba, Utah, Indiana, and New Brunswick. In addition to the rapid growth of women playing football, there have been advancements in other areas of the game. Beginning with Jennifer Welter in 2015, several women have earned positions coaching the professional game. In 2020 ESPN aired Born to Play, a documentary on the Boston Renegades, the 2019 champion of the Women's Football Alliance. Based on extensive interviews with women players and focusing closely on leagues, teams, and athletes since the passage of Title IX in 1972, Russ Crawford illuminates the rich history of the women who have played football, breaking barriers on and off the field.

Thursday Night Lights Michael Hurd, 2017-10-11 The history of black high school football in segregated Texas: “Though this book is long overdue, it is also right on time.” —Texas Observer At a time when “Friday night lights” shone only on white high school football games, African American teams across Texas burned up the gridiron on Wednesday and Thursday nights. Temple Dunbar, Austin Anderson, and other segregated high schools in the Prairie View Interscholastic League—the African American counterpart of the University Interscholastic League, which excluded black schools from membership until 1967—created an exciting brand of football that produced hundreds of outstanding players, many of whom became college All-Americans, All-Pros, and Pro Football Hall of Famers, including NFL greats such as “Mean” Joe Green, Otis Taylor, Dick “Night Train” Lane, Ken Houston, and Bubba Smith. Thursday Night Lights tells the inspiring, largely unknown story of African American high school football in Texas. Drawing on interviews, newspaper stories, and memorabilia, Michael Hurd introduces the players, coaches, schools, and towns where African Americans built powerhouse football programs under the PVIL leadership. He covers fifty years of history, including championship seasons and legendary rivalries such as the annual Turkey Day Classic game between Houston schools Jack Yates and Phillis Wheatley, which drew standing-room-only crowds of up to 40,000. In telling this story, Hurd explains why the PVIL was necessary, traces its development, and shows how football offered a potent source of pride and ambition in the black community, helping black kids succeed both athletically and educationally in a racist society. “[A] groundbreaking book.” —Houston Chronicle “In America’s current Colin Kaepernick-inspired moment, with sports once again taking on a conspicuous role in debates about black citizenship and the persistence of white racism, this book is especially timely and important.” —Great Plains Quarterly

A Sociology of Football in a Global Context Jamie Cleland, 2015-03-24 Association football is now the global sport, consumed in various ways by millions of people across the world. Throughout its history, football has been a catalyst as much for social cohesion, unity, excitement and integration as it can be for division, exclusion and discrimination. A Sociology of Football in a Global Context examines the historical, political, economic, social and cultural complexities of the game across Europe, Africa, Asia and North and South America. It analyses the key developments and sociological debates within football through a topic-based approach that concentrates on the history of football and its global diffusion; the role of violence; the global governance of the game by FIFA; race, racism and whiteness; gender and homophobia; the changing nature of fans; the media and football’s financial revolution; the transformation of players into global celebrities; and the growth of football leagues across the world. Using a range of examples from all over the world, each chapter highlights the different social and cultural changes football has seen, most notably since the 1990s, when its relationship with the mass media and other transnational networks became more important and financially lucrative.

Football Politics in Central Europe and Eastern Europe Roland Benedikter, Dariusz Wojtaszyn, 2020-07-07 Football in Central-Eastern and Eastern Europe has long functioned as a carrier of the three “non-normal” socio-political drivers that were effective below the surface of modernity, including the official self-image of European political systems, since the second half of the 20th century: Tribal Politics, Imaginal Politics, and Contextual Politics. All three are trends that are currently surfacing prominently on an international and global level. Long before the return of the now proverbial “Political Tribes” by the means of populisms and neo-authoritarianisms in societies around the world, football in Central-Eastern and Eastern Europe worked as a subconscious vehicle of group instincts and political moods that represented, mirrored, informed and influenced political behavior and governmental decisions both in the post-WWII communist and then, after 1989, the neo-capitalist societies located east of the former iron curtain. Football has always been used by both governments and their opponents, including the dissident civil society, to further coherence and to symbolically represent specific readings of power relations, system ideologies and history. Football in Central and Eastern Europe was always able to attract and include large parts of the population, inducing them to symbolically express protest against the government or to sustain the “politics from above”. Through football politics, aspects of the area’s specific political mechanisms are introduced and explained.
